DEFINITION OF TERMS

Affected Household / Population / Entitled Persons

Refers to any person or persons, customary community, private or public institution who are physically displaced (relocation, loss of residential land, or loss of shelter) and/or economically displaced (loss of land, assets, access to assets, income sources, or means of livelihood) as result of i) acquisition of land; ii) restriction on land use or on access to legally designated parks and protected areas. The affected populations are parties who control or possess an object land acquisition.

Entitled party

Party that controls or possess land acquisition object

Land Acquisition object

Land, space above ground and below ground, buildings, plants, objects related to land, or any other objects that can be assessed

Census of affected persons

The census is a count of all displaced persons irrespective of their titled or non-titled land ownership status. Its purpose is to accurately document the number of displaced persons and to create an inventory of their losses finalized on the basis of a Detail Measurement Survey

A census describes the persons who are displaced, their livelihoods and income sources, and what they are likely to lose because of the project.

Compensation

Proper and equitable replacement provided in the form of cash or other agreed in kind at replacement cost to the affected person/entitled party in the process of land acquisition/resettlement for the assets and livelihoods lost or affected by the project.

Corridor of Impact

Area, which is impacted by civil works (including construction for footprint of towers, construction of substation and facilities, and restricted area due to transmission line ROW) in the implementation of Transmission Line 150 kV Tayan-Sanggau-Sekadau project. It is important in two particular respects: (a) Legally as the area within which AHs will be entitled to compensation and other measures for any loss of land, structures or land use and occupation and of livelihoods and (b) Operationally as the agreed and demarcated area within which construction activities will take place.

Cut-off date

The date prior to which the occupation or use of the project area make residents or users of the same eligible to be categorized as AP/entitled party to receive compensation and other assistances. The cut-off-date will coincide with the census of APs/entitled parties and the IOL that will be conducted by the PLN implementing land acquisition.

Detailed Measurement Survey With the use of approved detailed engineering drawings, this activity involves the finalization and/or validation of the results of the IOL, severity of impacts, and list of APs done during the preparation of the resettlement customary community plan (RCCP). The updating will be carried out during land acquisition implementation phase undertaken by the PLN land acquisition committee

Disclosure

Relevant information (whether positive or negative) about social and environmental safeguard issues is made available in a timely manner, in an accessible place, and in a form and language(s) understandable to affected people and to other stakeholders, including the general public, so they can provide meaningful inputs into project design and implementation

Eminent domain/ Compulsory Land Acquisition The right of the state using its sovereign power to acquire land for public purposes. National law establishes which public agencies have the prerogative to exercise eminent domain.

Entitlement

Refers to a range of measures of compensation and other forms of assistance provided to displaced/entitled persons in the respective eligibility category.

Impact

Extent of social and economic impacts resulting from the implementation of an activity. In land acquisition/resettlement, the degree of impact will be determined by (a) scope of economic loss and physical displacement/relocation; and (b) vulnerability of the affected population/entitled party. Impact can be positive or negative.

Impact Indicator

Effect of benefits derived from project activity. Impact indicators can only be known in medium and long term. Impact indicators show the rationale why a project is implemented, describe the macro aspects of project implementation, and the purpose of project either for sectorial or regional

Income restoration

This involves rehabilitating the sources of income and productive livelihoods of severely affected and vulnerable APs to enable income generation equal to or, if possible, better than earned by displaced persons before resettlement.

Indigenous People

A generic sense to refer to a distinct, vulnerable, social and cultural group possessing the following characteristics in varying degrees: (i) self-identification as members of a distinct indigenous cultural group and recognition of this identity by others; (ii) collective attachment to geographically distinct habitats or ancestral territories in the project area and to the natural resources in these habitats and territories; (iii) customary cultural, economic, social, or political institutions that are separated from those of the dominant society and culture; and (iv) a distinct language, often different from the official language of the country or region. In considerina these characteristics, national legislation. customary law, and any international conventions to which the country is a party will be taken into account.

Informed Consent

Informed consent means that the person involved is fully understand about the project and its implications and consequences, and freely agrees or disagrees to participate.

Inventory of Losses

This is the listing of assets as a preliminary record of affected or lost assets during the preparation of this RCCP where all fixed assets (i.e. land used for residence, commerce, agriculture; dwelling units; stalls and shops; secondary structures, such as fences, tombs, wells; standing crops and trees with commercial value; etc.) and sources of income and livelihood inside the COI

are identified, measured, their owners identified, their exact location pinpointed and their replacement costs calculated. The severity of impact on the affected assets and the severity of impact on the livelihood and productive capacity of the Affected Persons or entitled parties are likewise determined.

Land acquisition

The process and activity of acquiring all or part of land and assets attached to the land by way of giving compensation and other measures adequately and at replacement costs for damages/loss to the entitled parties/affected populations in order to reduce adverse social impacts due to the project. Land acquisition and resettlement are conducted involuntary for the benefit of the project.

Resettlement Customary Community Plan (RCCP) A time-bound action plan with budget, setting out the resettlement objectives and strategies considering customary culture, entitlements, activities and responsibilities, resettlement monitoring and resettlement evaluation.

Power of choice

Power of choice means that the person involved has the option to agree or disagree with the land acquisition, without adverse consequences being imposed formally or informally by the State.

Resettlement

It is the displacement of people, not of their own volition but involuntarily, from their homes, assets, sources of income and livelihood in the Corridor of Impact (COI) in connection with the Project.

Relocation

The physical displacement of an AP from his/her pre-project place of residence and/or business.

Relocation Assistance

Support provided to persons who are physically displaced by a project. It may include transportation, transitional assistance (food, shelter, and social service) that is provided to the displaced persons in connection with their relocation.

Replacement cost

Amount in cash or in kind needed to replace an asset in its existing condition, without deduction for transaction costs or depreciation, at prevailing market value or its nearest equivalent, at the time of compensation payment

Meaningful consultation

A process that (i) begins early in the project preparation stage and is carried out on an ongoing basis throughout the project cycle; (ii) provides timely disclosure of relevant and adequate information that is understandable and readily accessible to affected people; (iii) is undertaken in an atmosphere free of intimidation or coercion; (iv) is gender inclusive and responsive, and tailored to the needs of disadvantaged and vulnerable groups; and (v) enables the incorporation of all relevant views of affected people and other stakeholders into decision making, such as project design, mitigation measures, the sharing of development benefits and opportunities and implementation issues.

Severely affected persons

This refers to Affected/Displaced Persons who will i) lose 10% or more of their total productive assets, ii) have to relocate, and/or iii) lose 10% or more of their total income sources due to the project.

Suku Terisolir

Isolated ethnic minority groups.

Vulnerable groups

These are distinct groups of people who might suffer more or face the risk of being further marginalized due to the project and specifically include: i) households that are headed by women, ii) household heads with disabilities, iii) households falling under the regional poverty line, and iv) elderly household heads.¹

¹ This definition is in line with Law No. 39/1999 (Article 5 elucidation) on Human Rights. Vulnerable populations include the elderly, children, the poor, pregnant women and people with disabilities. ²Indonesia Valuation Standards 306 (SPI 306). Land Acquisition Assessment For Development for the Public Interest. Code of Ethics

EXECUTIVE SUMMARY

A. Project Background

- i. A draft of Resettlement and Customary Communities Plan for West Kalimantan Power Grid Strenghtening Project (Tayan Sanggau Sekadau) has been prepared by Perusahaan Listrik Negara (PLN) and was approved by Asian Development Bank (ADB) in August 2016. The Resettlement and Customary Communities Plan 2016 was prepared in line with the preliminary detailed engineering design and it needs to be updated in accordance with the final detailed engineering design. The updated RCCP reflects the latest information on project scopes and potential impacts, identification of affected persons (APs) and their entitlements, budget and schedule of resettlement activities.
- ii. The 150 kV Tayan-Sanggau-Sekadau Transmission Line will be built as the extension of West Kalimantan Power Grid Strengthening Project (275 kV Jagoibabang-Bengkayang Transmission Line and 150 kV Bengkayang-Ngabang-Tayan Transmission Line) where it will interconnect Sarawak/East Malaysia to West Kalimantan 150 kV grids. The proposed Project will include two sections i.e. 150 kV Transmission Lines running from Tayan to Sanggau and Sanggau to Sekadau in West Kalimantan. The Project includes transmission towers and lines, one extension of 150/20 kV substation in Tayan and two new 150/20 kV substations in Sanggau and Sekadau.
- iii. The RCCP 2016 needs to be updated following the Detailed Engineering Design and the final Detailed Measurement Survey (DMS) for affected persons and their assets by PLN Land Acquisition Committee, in which 360 tower and ROW to be be constructed along the final route. The final route changed from preliminary due to change in the location of the Sanggau substation from its original location that was getting near to the Sekadau substation, as for the Sekadau substation there was no change in location. The final route of transmission line is determined by not passing through the forestry area.
- iv. The 150 kV Transmission lines will improve electric power supply as well as reliability of the power service in Sanggau and Sekadau regencies, West Kalimantan. It is expected that these transmission lines will create multiplier effect in economic development at various scales in Sanggau and Sekadau regencies and surrounding regions in West Kalimantan.

B. Legal Policy Framework

v. The current legal framework applied for land acquisition is Law Number 2 year 2012 concerning Land Acquisition for the Development of Public Interest and its implementing regulations that include President Regulation Number 4 Year 2016 concerning the Acceleration of Development of Electricity Infrastructure. In the framework mentioned for efficiency and effectiveness, land acquisition of not more than 5 (five) hectares can be carried out directly by PT PLN (Persero) it is also mentioned in the PLN Decree Number 0344.P/DIR/2016 Concerning Land Acquisition within PT PLN (Persero). In addition, the Resettlement and Customary Communities Plan (RCCP) has been prepared in reference to other relevant law and regulations on land acquisition and customary communities. For compensation of land, building and vegetation along the space zone of high voltage transmission power line, the Minister of Energy and Mineral Resources (MEMR) promulgated the Regulation number 38 year 2013.

C. Scope of Resettlement Impacts

vi. IOL census and SES for RCCP 2016 were conducted by PLN survey team on November – December 2015 and continued during second week of January 2016. The DMS was conducted based on the final route on March 2016 up to September 2018. The DMS was conducted for 2 new substations and 358 from 360 tower bases with remaining 2 locations still in land acquisition process and need to be acquired in 2018. A total number of 340 private AHs were affected by substations and tower bases.

vii. For the construction of new substations in Sanggau and Sekadau, PLN has acquired 44,778 m2 of land which belongs to 5 AHs with 4,761 trees of rubber, 45 trees of oil palm and other various species. For construction of tower base: (i) a total of 89,925 m2 of farmland, belonging to 337 private lands, 1 customary land, and 8 institutions, has been acquired by PLN except two locations that need to be shifted. (ii) 6314 various species and commercial value were counted during DMS, whose owners have been identified. Of this number, 1,416 trees are big, 2,376 trees are small and 2,522 trees are productive.

viii. 150 kV transmission line RoW requires 20 m wide (10 m +10 m) along 77.7 km of the transmission line from Tayan to Sanggau and along 46.7 km from Sanggau to Sekadau. The total area of 2,488,525 m2 of the land under the RoW will be affected by the project and some restrictions on the use of the land and building, for instance to grow high standing trees and building, will be applied. Final route of transmission line RoW and detailed measurement survey for restricted asset under the RoW will be conducted after the foundation of the tower base is completed.

D. Project Entitlement

APs/AHs which are mostly customary communities have been provided compensation ix. for the loss of land at the replacement cost based on compensation valuation by independent appraisers. Solatium compensation (the amount of which will be determined by an independent property appraiser) will be provided for affected persons/entitled parties who lost structures. Land and non-land assets (structures, trees/crops, things attached to the lands) affected will be compensated at replacement cost at the time of compensation delivery without deductions for transaction costs and with incentive in taxes, including the costs involved in the issuance of amended certificates for affected lands. The current valuation standard issued by Indonesia Appraiser Association (Standard Penilaian Indonesia - Masyarakat Penilai Indonesia/SPI- MAPPI) does not apply provision of depreciation for affected structures. Compensation will also be provided for the affected trees/crops and land use restriction under the transmission line rights of way (ROW) in reference to the MEMR Regulation Number 38 year 2013, PLN Decree year 2013, and valuation of independent appraisers. Severely affected APs/AHs and vulnerable AHs which mostly are farmers will also take part in an income restoration program (IRP). Detailed, culturally-appropriate IRP will be prepared during sub project implementation in consultations with the APs/AHs. Opportunities for project-related jobs, if possible, will be provided for the local communities, including vulnerable groups.

E. Ethnicity, Vulnerability and Gender Issues

x. A majority of the AHs (73%) are Dayak, followed by Malay, Chinese, Javanese and other ethnics. All ethnic groups live in social harmony. Dayak is considered as customary communities (indigenous peoples). The detailed measurement survey identified that there are 122 vulnerable households and 11 severely affected households. The vulnerable and

severely affected groups will be provided with the culturally-appropriate IRP. IRP will be conducted within two batches. First batch, in the form of training and distribution of chicken husbandry to the AHs, it has been conducted in September 2018. For the second batch, the form of IRP will be determined after the monitoring of the implementation of the first batch. Job Opportunities will be available in the project to ensure that at least, their standard of living will not be worse off due to the loss of their assets and livelihood by the project. Woman will be prioritized to be involved in the income and restoration program.

F. Participation, Disclosure, and Grievance Redress

xi. All the APs and stakeholders (including local government staff and officials, customary leaders) from village to district levels were consulted during the preparation of the updated RCCP, conducted from March 2016 up to August 2018. Their concerns and suggestions were noted and incorporated within this RCCP. Consultations have also been conducted for the project location determination. The consultations will continue during implementation of land acquisition and construction phase. A grievance mechanism has been prepared in reference to the Land Acquisition Law of 2012, PLN Decree, and based on practical experiences in handling the complaints in other PLN projects, and to ensure that the concerns and complaints of APs/AHs are addressed and resolved in a timely and satisfactory manner. Relevant information on resettlement has been disclosed to the APs/AHs and the updated RCCP will also be disclosed to the APs/AHs through the distribution of project information leaflets to AHs and the posting in local government offices, particularly in Sub-district and village offices. The agreed updated RCCP in Bahasa will also be made and available in PLN UPP and UIP.

G. Implementation Arrangements

PT PLN (Persero) Head Quarter (PLN Pusat) is the Executing Agency (EA) of the xii. project; who is responsible for overall coordination and administration of the project, including those related to resettlement. The project implementation was conducted by PT PLN (Persero) Unit Induk Pembangunan (UIP) Kalimantan Bagian Barat or Principal Development Project located in Pontianak West Kalimantan. The PIU responsible on the preparation and implementation of this RCCP, including designation of Independent Appraisal for appraising the unit rate for affected assets. A Project Implementation Consultant (PIC) has been recruited to assist the IAs in overall Project management and to ensure construction quality. Social resettlement consultant has been recruited as part of the PIC, and responsible to assist PLN in implementing the land acquisition in accordance with the RCCP. Land acquisition for the transmission line have been conducted separately for each tower and thus the amount of land acquired in any case would be less than 5 ha. Therefore, Land acquisition for the transmission line has been carried out by PLN Land Acquisition Committee, in coordination with the BPN in related District. Since the location of the project is between Tayan, Sanggau and Sekadau, development of transmission line in this project has been under supervision of PLN UPP KITRING KBB 2, Sintang.

H. RCCP Budget

xiii. The estimated cost of resettlement for the 150 kV Tayan-Sanggau-Sekadau transmission line is estimated at Rp 153.639.684.798,- and the current budget utilization is Rp 29,998,282,666,-. The budget is managed by PLN UIP Kalimantan Bagian Barat.

I. Monitoring

xiv. The PLN UIP Kalimantan Bagian Barat, assisted by PIC, conducts the Project internal monitoring. An independent monitoring agency (IMA as external monitoring agency) has been mobilized to verify internal monitoring of RCCP implementation and monitored the achievement of resettlement principles and objectives. The external monitoring agency submits semiannual monitoring reports to PLN and ADB. The internal monitoring report is uploaded on ADB and PLN website and external monitoring report is uploaded after it is completed.

J. Implementation Schedule

xv. Implementation of resettlement activities is coordinated with the schedule of civil works and safeguard actions are timely implemented to avoid project delays. Compensation payment will be delivered after. The acquisition of assets and payment of compensation of AHs will be completed before any construction activities takes place. The PLN UIP Kalimantan Bagian Barat already carried out its best efforts to minimize the resettlement transition period. A tentative schedule of RCCP preparation and implementation is presented in table below.

Indicative Schedule of Update RCCP Implementation

No.	Task	Timing
	Preparation	
1	Inventory of Losses (IOL) and Socio Economic Survey (SES)	16 Nov –11 Dec 2015 continued on 12– 16 Jan 2016
2	Finalization of draft Resettlement Customary Community Plan	August 2016
3	ADB Approval and uploading to ADB website	August 2016
4	Resettlement disclosure in component area	August 2016
	RCCP Updating	
5	PLN LAC establishment*)	January 2016
6	Route and design finalization (including rerouting of tower located inside the forest)	March 2016 - September 2018
7	Inventory of Losses (IOL)	Dec 2015 – Jan 2016
8	DMS and socioeconomic survey	February – September 2018
9	Finalization of updated RCCP	October 2018
10	Submission of updated RCCP to ADB and its approval	October 2018
11	Public disclosure of updated RCCP	October 2018
	Updated RCCP Implementation	
12	Designation of Independent Appraisal a. Tower base and substation b. ROW	a. May 2016 b. March2017
13	Compensation payment for towers and substation	May 2016 – September 2018

No.	Task	Timing	
14	Compensation payment for RoW	September 2018 – March 2019	
15	Delivery of income restoration program for vulnerable & severely AHs	September 2018 and March 2019	
	Monitoring		
16	Internal and External Monitoring (Tower base and RoW)	September 2016 – resettlement completion	

Note: Latest SK on PLN LAC from GM of the PLN UIP Kalimantan Bagian Barat

1. PROJECT DESCRIPTION

1.1 Project Overview

- 1. The 150 kV Tayan-Sanggau-Sekadau Transmission Line will be built as the extension of West Kalimantan Power Grid Strengthening Project (275 kV Jagoibabang-Bengkayang Transmission Line and 150 kV Bengkayang-Ngabang-Tayan Transmission Line) where it will interconnect Sarawak/East Malaysia and West Kalimantan 150 kV grids. The proposed Project consists of two 150 kV Transmission lines from Tayan to Sanggau and Sanggau to Sekadau in West Kalimantan; additions to an existing substation at Tayan West Kalimantan, and two new 150/20 kV substations in Sanggau and Sekadau. The Project also includes a limited number of access roads to the new substations, equipment and materials storage, assembly areas and facilities for workers.
- 2. The 150 kV Transmission lines will improve electric power supply as well as reliability of the power service in Sanggau and Sekadau regencies, West Kalimantan. It is expected that these transmission lines will create multiplier effect in economic development at various scales in Sanggau and Sekadau regencies and surrounding regions in West Kalimantan.
- 3. The proposed Project is the extension of the ASEAN Power Grid (APG) Interconnection Development Project, of which the objective is to leverage the economic use of energy resources for mutual benefit, enhance power system security and widen opportunities for energy trading in the ASEAN electricity market. The Project is a key element for the West Kalimantan Power Grid Strengthening Strategy, under the PLN Electricity Supply Planning Effort (Rencana Usaha Penyediaan Tenaga Listrik RUPTL 2015-2024), see Figure 1.1. Components of the Project have also been identified in the Regional Regulation No. 5 year 2004 West Kalimantan Rencana Tata Ruang Wilayah (RTRW or Spatial Plan) refer to article 23 and in the RTRW of Sanggau and Sekadau regencies.
- 4. RCCP for West Kalimantan Power Grid Strenghtening Project (Tayan Sanggau Sekadau) has been prepared by PLN and was approved by ADB in August 2016. RCCP was prepared in line with the preliminary DED and needs to be updated in accordance with the final DED. The updated RCCP reflects the latest information on project scopes and potential impacts, identification of affected persons (APs) and their entitlements, budget and schedule of resettlement activities.

1.2 Project Location and Route

- 5. The Project is located in the mid-western part of the Kalimantan (Borneo) island of Indonesia. The route of 150 kV Transmission lines stretches along Tayan to Sanggau and Sanggau to Sekadau in West Kalimantan, as shown in Figure 1.1
- 6. The length of 150 kV Transmission line is 124,426km, from the existing Tayan substation to Sekadau, West Kalimantan. The line will pass through 6 Sub districts in Sanggau regency, namely Tayan Hilir, Balai, Tayan Hulu, Parindu, Kapuas and Mukok and 1 sub-district (Sekadau Hillir) in Sekadau regency. See Table 1.1
- 7. The route elevations range from 7.01 to 144.13 masl (meters above sea level) in Sanggau regency and 12.66 to 53.77 masl in Sekadau regency. The proposed route is mostly located in the vicinity of existing roads where it is envisaged that access to the line will

be through the existing roads and the tracks across land by foot or motor bike. The final transmission line route can be seen in Appendix 1.

Table 1.1 The Route Length, Villages and Number of Transmission Towers for 150 kV

Project Components Resulted from Land Acquisition and Involuntary Resettlement

Project component resulted from land acquisition and resettlement will be associated with procurement of land for the Sanggau and Sekadau substations and for transmission line tower sites.

Transmission Line Towers Α.

- Towers of 150 kV Tayan Sanggau Sekadau transmission line are self-9. supporting steel lattice towers separated 200 to 400 m apart from each other depending on terrain and location. The number of towers for the 150 kV Transmission line is shown in Table 1.1. The number of towers has been final.
- There are several types of towers: where the transmission lines are straight or almost straight, suspension towers will be used; angle towers will be used where the direction of the line route changes more than 5°; and dead end towers will be used at the terminus of a line. Figure 1.2 shows a side-profile of a typical transmission tower where its height is about 33.5 m. The body height of the towers is adjustable, and towers are designed to achieve the legislated minimum conductor clearances from the ground, trees and structures, as summarized in Table 1.2. The most common tower height will be about 36.5 - 39.5m.
- Most tower bases occupy an area of 225 m2 in size, with each of the four tower legs supported by foundations designed for the soil conditions at the site. The height of each tower leg will also be adjustable. This will allow each leg to conform to the slope of the tower site, and prevent excessive land cutting, erosion, and land collapse around the foundations. The footprint of the tower sites will be 15 x 15 m (225 m2) for suspension towers and 20 x 20 m (400 m2) for angle towers (Figure 1.3).

2.6	The highest point of ship mast at flood/highest water level in water traffic	4.0

Source: Indonesian National Standard (SNI) No. 04-6918-2002.

Note: a Minimum vertical free space from the ground or road/ railway

b Minimum vertical free space from the highest point of ship mast at flood/ highest water level

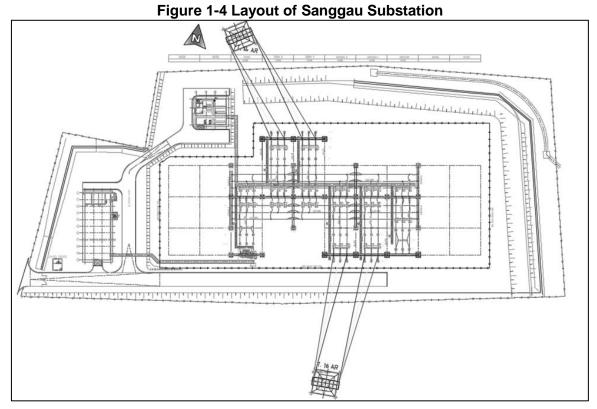

B. Right-of-Way

- 13. A Right-of-Way (RoW) corridor with a width of 20 m for the 150 kV Transmission lines will be established. Tall trees (≥5m) within the RoW will be removed as necessary in order to maintain minimum transmission line conductor clearance (see Table 1.2).
- 14. No house has been identified to be removed as required in the RoW and the transmission line will be sited to avoid houses to the maximum extent possible. The implementation is to allow houses and other structures maintaining minimum vertical clearance of 7m.

15. The transmission line will cross the Kapuas River (about 740 to 820 m width) three times. Additional height / elevated towers will be constructed to get a safe clearance for ships to pass freely in Kapuas River. These are located in Beringin village and Penyeladi village in Kapuas District, Semuntai village in Mukok District. The height of those towers will be about 100 - 120 m, the final height of each tower will be determined after the final DED is completed.

C. Substations (Layout Update)

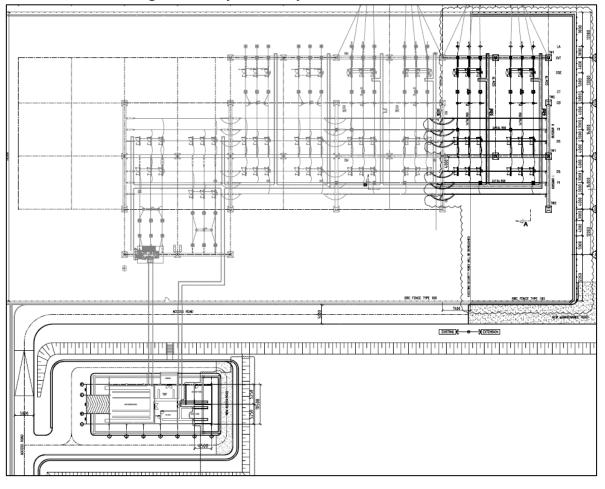

- 16. Two new substations in Sanggau and Sekadau have been established while the existing Tayan substation is expanded within the existing land. Tayan substation will consist of two line bays equipped with protection and control equipment also telecommunication facilities.
- 17. Sanggau and Sekadau substations consist of 1 bus coupler bay, 1 transformer bay with 30 MVA transformer, four 150 kV line bays for Sanggau and two 150 kV line bays for Sekadau, capacitor bank, control building with 20 kV indoor switchgear, computer-based substation control system, protection and metering equipment, telecommunication facilities, AC/DC supply and other accessories.
- 18. Sanggau substation will be connected via 150 kV transmission lines with both Tayan and Sekadau substations, while Tayan substation will be connected with Ngabang substation and substations in Siantan via 150 kV Transmission lines. The expansion of Tayan substation will utilize the available/existing land, while the area needed for Sanggau and Sekadau substation has been acquired, about 2.24 ha and 2.23 ha respectively, in 2017. (See Figure 1.4, Figure 1.5 and Figure 1.6 respectively).

6

Figure 1-5 Layout of Sekadau Substation

1.4 Measures Adopted to Minimize Resettlement Impacts

- 19. There are key principles that have been practiced by PLN to minimize negative impacts of the project. The project will avoid, wherever possible, residential areas by rerouting the line. The number of alternative alignments for transmission lines was studied by PLN to varying degrees and comparison of criteria was used to assess several alternative routes. PT PLN (Persero) undertook considerable effort to fine-tune the alignment to avoid sensitive areas to the maximum extent possible (e.g. protected areas, protected forests), production forests, settlements, physical cultural heritage sites (e.g. cemeteries), and to avoid social conflict. Furthermore, the alignment of the 150 kV Tayan-Sanggau and Sanggau-Sekadau transmission lines has been selected considering following reasons:
 - The routes mostly pass through agriculture/plantation area and will not require relocation of settlements. None of public utilities, such as school, church, mosque, health center, public garden, as well as communally owned forest (Tembawang), is allowed to be used for any physical development. The long house (Rumah betang), cemetery, and private structure/house will not be affected.
- The final route does not disturb the areas or protected forests, endanger protected flora and fauna, or disturb ecological services. Based on data and information on forest area utilization, the location requested for the construction of the transmission line does not overlap with other forest sector permits as indicated in the permit issued by Territory Hall of Forest Area (Balai Pemantapan Kawasan Hutan Wilayah III), letter No.S396/BPKH.III.2/2015 dated May 13, 2015.
- 20. Other efforts conducted by PLN to minimize resettlement are as follows:
 - The project development has been planned under National and Regional and Local Planning, that such high voltage transmission and interconnection with other areas must provide reliability for the electricity supplies for those regions.
 - The transmission lines have been sited to avoid construction in production forest land and houses to the maximum extent possible. The practice is to allow maintenance of houses and other structures in minimum vertical clearance of 7m.
 - The body length of the towers is adjustable, and towers will be designed to achieve legislated minimum conductor clearances from the ground, trees and structures.
 - The tower design using self-supporting steel lattice towers is economically viable, able to carry the necessary voltage and achieve the required heights, and can be assembled on site without using any permanent access roads or helicopters.

2. SOCIAL IMPACT ASSESSMENT AND SCOPE OF LAND ACQUISITION AND RESETTLEMENT

2.1. Potential adverse and positive impact of the project to the APs and Customary Communities and necessary measures to avoid or minimize adverse effects

Positive Impacts

- 21. The sources of electricity transmitted through 150 kV Tayan-Sanggau-Sekadau transmission lines will import electricity from Sarawak through 150 kV Bengkayang-Ngabang-Tayan Transmission lines by coal-fueled power plants and transmitted through 150 kV Siantan-Tayan Transmission lines. The 150 kV Tayan-Sanggau-Sekadau Transmission lines will also enable access to electricity for thousands of households, which also enhance livelihoods, business opportunities. These are potential permanent impacts of the project.
- 22. An example of positive impact can be found in the drug storage application. Electricity is needed to store drugs to ensure stability of temperature so that the quality of drugs/vaccines remains good. A sufficient electricity supply will also ensure medical equipments that require electricity keep functioning well (x-ray machine, USG, ECG, etc.). Therefore, increasing the capacity of electricity supply can indirectly improve health services.
- 23. Another example is that carbon emission will be decreasing because of the environmentally-friendly hydro power.

Impacts on livelihoods

- 24. During the civil works construction and transportation of materials to the sites, some labor opportunities will be available for the unskilled local workers there (as land clearing labor or bricklayer), both men and women. This will contribute to improve the livelihoods for some households. This is a temporary positive impact during the project construction time.
- 25. West Kalimantan is poor in providing energy resources. Oil, gas, and coal are imported and no significant hydro power resources have been identified. Electricity is generated by a large- and a medium-speed diesel power plant for the main grid and by a small-diesel power plant for the isolated regions. PT PLN (Persero) cannot satisfy current demand more than 30% of the population in Sanggau and Sekadau. They are on a waiting list for a connection to the PT PLN (Persero) main grid. Some industrial and commercial entities are impatient and have installed their own power generation system. In the long term, the reliable supply of electricity will trigger the establishment of many new industries that will in turn provide employment opportunities for many dwellers living nearby.

Negative Impacts

Acquisitions of Land and Vegetation

26. Construction of the Project requires the acquisition of land for substations and transmission tower sites. In addition, as noted above, tall trees has been removed as necessary within the RoW corridor. The land acquisition will affect to the economical income and livelihood of the affected persons/indigenous communities. However, the

impacts are expected to be minor as most of the affected persons/indigenous communities have large lands. There are only several persons/households identified to be severely affected.

27. There are 625 m2 of a customary land that is affected in the project, 3,386 m2 of land belonging to 8 institutions and the remaining belonging to community according to DMS, Dayak customary leaders and consulted affected people. The customary land is not considered as Tembawang (customary land is used for the protection of particular trees and seedlings), so this land can be used for the transmission line construction. PLN has rerouted the transmission line traversing the protected forest land, so that only, customary institution and private land are affected. The project does not have any impact on local people's access to natural resources.

Special concerns on the Dayak

- 28. According to Socio Economic Survey (SES) with AHs and Key Informant Interviews with several customary leaders in the project areas, the Dayak communities are supportive of the development 150 kV Tayan Sanggau Sekadau transmission line. All the Dayak stakeholders consulted in the seven sub districts responded positively to the project and wish to support. However, the concern of both the Dayak customary leaders and the Village/Sub district officers are whether the project implementing agency and the involved contractors will respect Dayak culture and customs or not. The customary leaders recommend that the construction contractor had to arrange a consultation meeting with the customary leaders and community as well before the construction is started in order to create an understanding on the Dayak culture.
- 29. The customary leaders have been regularly informed and consulted by the contractor on the ongoing construction activities, in order to discuss and solve any problems arising in construction. The consultation could be done informally or formally through community meeting. The customary leaders in their turn would keep all the local communities informed.
- 30. The Dayak customary leader also emphasizes the need for transparency in regard to land acquisition and compensation. The customary leaders fear that unclear land acquisition procedure might potentially lead to social tension and conflicts in the local communities. Therefore, negotiation over compensation need to involve village authorities, customary leaders, and other social leaders as well as big family of the claimer/land owner to avoid unexpected problems after agreement with land owner.
- 31. All the consulted Dayak people and customary leaders paid attention to the Dayak customary ceremony that has to be arranged before the construction start to honor the spirits and hinder accidents that angered spirits might cause.

Mitigation Measures

32. To minimize impacts on the private land and non-land asset (tress/crops), a number of studies have been carried out to assess several alternative routes of the transmission line. The updated RCCP has been prepared in close consultations with the affected persons/households including customary communities and customary leaders. The amount of compensation will be given based on the unit price of affected land and non-land appraised by independent appraisers and in accordance with ADB and Indonesian regulation.

33. As expected by the customary leaders, before the start of the construction, the contractor has arranged a consultation meeting with the customary leaders in order to be informed of the Dayak culture and the necessary ceremonies to be organized prior to the construction. In the same meeting the contractor has informed the customary leaders the construction schedule and activities. A schedule to timely organize the Dayak ceremonies in each sub district has been set before any construction activity would be agreed in the meeting. No construction activity must start before three days after the conducted ceremony, unless allowed by the customary leader. The project implementing agency and the contractor have been properly informed and accordingly respect this customary regulation in the planning. PLN and the contractor have organized regular (at least quarterly) information and consultation meetings with the local customary leaders in order to keep the local communities informed throughout the project time.

Special Activities

- 34. According to the Dayak culture, a customary ceremony has to be conducted once per village before the construction commencement of tower base and/or substation. The purpose of the ceremony is to appease the spirits in that place and accordingly to protect construction workers and villagers from accidents caused by angry spirits that are disturbed by the construction activities. The main event of the ceremony is to offer food (pork, chicken, rice) to the spirits and ask them to be benevolent to the coming activities. According to the customary leaders, this ceremony will also protect from demolition and relocation of houses and other structures as well as trees in the area from any misfortune caused by angered spirits. However, if any household still wished to conduct a small ceremony connected to relocation, they were allowed to organize it within their family.
- 35. Construction activity might start at least three days after the conducted ceremony. The project implementation agency and the contractor should be informed about this customary regulation and respect it accordingly.

2.2. Characteristic of Affected Persons and Customary Communities

Ethnicity in the Project Area

36. The total affected populations in seven sub districts are 297,803 people, divided into 72,846 households. It means an average household consist of 4 people living in 104 villages. The 28 villages are located along the transmission line and will be affected by the project which can be seen in Table 2.1 below.

Table 2.1 Total Populations and Number of Households in the Seven Sub districts and Affected Villages

Sub	Affected villages/total no.	Popul	ation	No. of	households		
district	of villages			Sub district	Affected villages		
Sekadau Di	Sekadau District:

37. There is no official data on ethnicity of the population in the project areas. According to the information gathered from Dayak customary leaders, around 60% to 90% of the population in the different areas of the seven Sub districts are Dayak Customary Communities. However, none of the affected villages are included in the list of villages with remote customary communities issued by World Bank. Table 2.2 below shows the 14 Dayak subgroups in the project area Sub districts based on information from the Dayak customary leaders in the seven Sub districts.

Table 2.2 Dayak Sub Groups In Project Area (7 Sub districts)

Sub district	Dayak Subgroup
Sekadau Hilir	Ketungau
	Benawas
	Mudong
Kapuas	Pandu
Tayan Hulu	Ribun (majority)
	Pandu/Kodan
	Balantian
	Banyuke
	Mali
Parindu	Mali
	Pandu
	Ribun
Balai	Mali
	Angan
Mukok	Jangkang
Tayan Hilir	Mali
-	Tobak

38. The rest of the population in the seven Sub district comprises of Malay (majority), Javanese, Batak, Chinese, and other ethnicities. Most of the Dayak and Chinese people are either a Catholic or a Protestant, while most of Malay ethnic is Moslem. Despite their differences, they live in harmony and respect each other.

Land Ownership

- 39. Consultations with customary leaders confirmed that status of the land along the project area consist of private/individuals area and customary land. Private land usually inherited from their ancestors and a household has from 2 to 6 ha in average. A customary/communal land, commonly in the form of customary forest, is jointly owned by a clan/big family, managed by customary leaders. Indigenous peoples can only utilize/take the products of the land with the consent of customary leaders. The area of the customary land is usually from 40 ha to 100 ha. The customary communal land consists of "Tembawang" which is only used for protection of particular trees/seedlings and non-Tembawang which is allowed to be used for other purposes including transmission line construction.
- 40. Most households do not have any official land ownership certificate (legal document issued by the National Land Agency, BPN), but the status of their land is declared in SKT (Surat Keterangan Tanah, which is a document signed by the Village head) and SPT (Surat Pernyataan Tanah which is a document signed by Head of Village and Sub district Head), in which the document only states location and owner of the land.
- 41. There is no custom rule mentioning that the owner of the land have to be a man, however the name of husband is mostly used for the ownership of the land instead of the wife's. The same matter applies to the most official land certificates that are routinely issued by husband's name only.

Land use and Livelihoods

- 42. Farming is the main livelihood in the seven sub districts. There are only few industrial companies and accordingly few job opportunities. In the entire Sanggau and Sekadau district, 78% of the reported economically active population (aged 15 years and above) is working in the agricultural sector, 6% in Sekadau District and 7% in Sanggau District work in the industrial sector, and 12% for Sekadau District and 6% for Sanggau District work in trade and accommodation services sector.
- 43. Traditionally the Dayak practiced swidden agriculture on customary forest areas. Dayak farmers habitually cleared (mostly by burning the vegetation) the land they have before planting rice and when the productivity of the rice field is decreased, they usually plant rubber trees on the land. Currently those Dayak farmers are replacing rubber forests with oil palms, which can be seen in many areas along the project road. The transformation of the Dayak farming has turned from traditional rice cultivation to rubber forests, and currently being transformed to oil palm plantations.
- 44. Rice is cultivated only for household consumption; they only plant rice once a year in general. Rice is planted on dry or semi-irrigated lands, which rely on the rainy season. The number of households with rice fields has been decreasing year by year when rice fields have been transformed to rubber or oil palm plantation.

Religion and Cultural Features

- 45. Most of Dayak is Catholic and the rest are either Protestants or Moslems. However, a Dayak who becomes Moslem still identify him/herself as a Dayak. Dayaks are usually converted to Islam through marrying a Moslem and their children generally follow their parents' Islamic faith.
- 46. Dayak people believe in spirits, ghosts and ancestor spirits that reside in particular places like buildings, trees, stones, bridges, sacred materials. In the Dayak cosmology, the energy of the spirits could be good or bad. They undertake rituals with offerings and prayers or spells to neutralize the negative energy or a bad spirit. After being converted to Christianity or Islam, a Dayak worships the Christian or Islamic God but their traditional beliefs live simultaneously along with their monotheistic religions. By this time, the Dayak today go to church or mosque but also conduct rituals to the spirits in special occasions.
- 47. The Dayak arrange seasonal celebrations in special occasions to the spirits of a certain place in order to soothe the potential anger of the spirits that will be disturbed by an activity (such as e.g. Land clearing for cultivation or for a project). The purpose of a ritual is to get spirits' permission for e.g. demolition of a house, cutting down a sacred tree, relocation of sacred stone, moving into a new house, and area clearing for construction. Some examples of ceremonies or rituals conducted by Dayak customary community are: (i) Gawai after the rice harvest to show gratefulness, usually held in May-June, (ii) Ngudas farm is ceremony to bless farm land, (iii) Ngudas house before moving to a newly constructed house, praying to the ancestor's spirits, to protect the people who will reside there.
- 48. Longhouse, or Rumah Betang, is traditional Dayak house that functions not only as a residential place but also as a center for social and cultural activities such as traditional court, musyawarah (meeting to make decisions), different ceremonies and rituals, and storing traditional artifacts. Even though most Dayaks nowadays live in one-household houses, Rumah Betang remains central for their cultural identity. Each of rumah betang has its own organization of members, headed by a customary leader.

Customary Institutions, Leadership and Rules

- 49. Dayak people are a patriarchal community in which kinship follows the male line. Customary leadership and customary rules are still effective in the daily life of the Dayak communities. In term of land ownership, there have been quite significant changes on customary land ownership. Many Dayaks have individual land ownership and the authority of the customary leaders is more for communal customary lands. Customary leaders have an important position and a role in maintaining the social structure through implementing Dayak customs, norms and traditions. Each Dayak subgroup has its own customary leaders exercising authority at village and subdistrict level. Depending on the number of Dayak subgroups, there may be several traditional leaders in the same Subdistrict.
- 50. The customary leaders are in charge to lead ceremonies and rituals and execute the customary rules. At village level, Tumenggung is the highest leader in the customary institution of leaders with power to interpret, to implement and to apply Dayak customary rules. This position can cover several Dayak subgroups in a village or in a group of villages. Tumenggung is elected directly by all the people in the village/villages.
- 51. Jaya is a subordinate of the leader, assisting Tumenggung in executing customary tasks in the sub Village area. In the absence of Tumenggung, Jaya can also take over his tasks to some extent. Meanwhile, Pateh is the customary leader who controls several villages (usually three villages).
- 52. Dayaks respect customary leader as well as head of village; both were elected by the people. There has been good coordination between both leaders. All problems related with customary land and other social problems will be solved by customary leader first before going to the head of village. Only criminal problems will be brought directly to the head of village or head of subdistrict or police.
- 53. Execution of the Dayak customary rules is under the authority of customary leader. Whether the national or the customary law is applied usually depends on the parties involved in the accident, conflict or other disputes. The ethnic authorities usually have the authority to apply customary rules as far as the case is not a murder or a fatal accident. In that case, Tumenggung can decide who the perpetrator is and what kind of penalty and fine shall be charged. In case of conflict between two families or persons, tumenggung will take over as the mediator.
- 54. The role of customary leader, or tumenggung, is not the same as that of a judge in a formal trial. They only function as mediators between persons involved in a conflict. For example, in traffic accident cases, it is up to the involved parties to report to the national juridical system, i.e. the police, or to tumenggung for decision. Tumenggung will facilitate negotiations between the conflicting parties and decide the punishment or compensation to be paid by the person causing death or injury. In some cases, the involved parties may not agree to the tumenggung's decision and finally report the case to the police for it to be dealt with in the national juridical system.
- 55. Another social organization referring to local wisdom or customary issues is Dewan Adat Dayak (DAD) (Dayak customary council). Even DAD is hierarchically based on the administrative territory. At village level DAD is usually managed by pengurus adat (Ethnic Authority). At subdistrict level, as well as at district and provincial level, there is a DAD committee. DAD is more likely a political institution rather than a cultural institution. There are many of Dayak political agents and government authorities within DAD, e.g. the current Head of DAD in the province is also Governor of West Kalimantan which is also

the head of National Dayak Council. DAD was established as a response to the ethnic unrest between the Dayak and the Madurese taking place in West Kalimantan in 2001. This organization aims to unite the Dayak people, not only in West Kalimantan, but also in the other provinces of Kalimantan. DAD is focused on preserving Dayak cultural values, impeding conflicts among the Dayak and between the Dayak and other ethnic groups, and empowering Dayak people through socio-economic and political development. However, DAD has no cultural or social function or authority, as these are executed by jaya, tumenggung, and pateh. Accordingly, DAD is not allowed to act as customary judge in customary court or to lead rituals or cultural ceremonies.

2.3. Inventory of Losses and Detailed Measurement Survey

- 56. An inventory of losses (IOL) and a census of all APs/AHs includes private and public organizations and institutions affected by the loss of assets were conducted on 16 November to 11 December 2015 and continued on 12– 16 January 2016 by PLN UPP 2 survey team with data collecting assistance by the consultant and government personnel participation from villages traversed by Tayan Sanggau Sekadau transmission line.
- 57. IOL is carried out for preparing Resettlement Customary Community Plan (RCCP), which plans to address social and resettlement impact and estimate budget for the action plan. The IOL is a survey to all entitled parties and data collection on:
 - i. Identification of land holdings and ownership, buildings, plants, and / or other objects related to land;
 - ii. Proof of occupancy and/or ownership of land as well as impact identification on land, buildings, plants, other assets attached to land, and all or part of other assets;
 - iii. Location of the land, land area and land identification number, status of the land and the document, type of land use and utilization;
 - iv. Identification of economic loss, such as loss of business income, employment, over the profession and cost of removal; and
 - v. Control and identification of space above and below the affected/lost land, if any.
- 58. IOL survey has been conducted with the AHs/APs in each affected village and carried out in the presence of heads/guardians or members of households. The household head/representative or members completed IOL forms. IOL survey has been carried out to all owners of the land affected by the tower and substation, whereas IOL for ROW (area under the transmission line) will be done in September 2018 March 2019.
- 59. Information to be obtained in the IOL survey is include the following for each entitled party, such as:
 - i. Identification of the affected entitled parties, number of family members, and their names:
 - ii. Location, area of all land owned and lost, tenure status, and functions;
 - iii. Number of loses / affected structures area, building function;
 - iv. Other objects associated with the affected land;
 - v. Number and category of loss of fixed assets; and
 - vi. Temporary losses of productive assets.
- 60. The data derived from the IOL survey is constituted as the basis for valuation of losses at replacement cost, calculating amounts of compensation, and determining compensation packages. Then, the data will be encoded and stored into 150 kV Tayan-

Sanggau-Sekadau transmission line database maintained by PIU and accessible for external monitoring. Appendix 2 provides a combined SES and IOL questionnaire.

- 61. Detailed Measurement Survey (DMS) is conducted using the approved detailed engineering datas; this activity involves the finalization and/or validation of the results of the IOL, severity of impacts, and list of APs done during the preparation of the resettlement customary community plan (RCCP). The updating RCCP has been carried out during land acquisition implementation phase undertaken by the PLN LAC.
- 62. The DMS for tower base has been conducted on March 2016 to September 2018 by UIP Kalbagbar and UPP KBB 2, supported by the consultant and government personnel from villages who are affected by the project.

2.4. Replacement Cost Study and Assessment

- 63. A replacement cost study (RCS) has been conducted by a licensed property appraiser accredited by the Ministry of Finance or BPN. Law No. 2/2012 stipulates that assessment of Land Acquisition compensation by appraisers has been conducted during land acquisition implementation stage.
- 64. At the implementation phase, the chairman of PLN Land Acquisition Committee in the PLN UIP Kalimantan Bagian Barat has been assigned appraisal services for tower base and substation in May 2016 and for ROW in March 2017, the implementation is in accordance with PLN procurement regulations. The Appraiser is already conducted compensation assessment for physical losses (land, spaces above or below the ground such as structure, plants, and other assets related with the land) and for non-physical losses (loss due to relinquishment of right by the land owner that will be given in cash/premium), as well as for other losses that can be calculated through transaction costs, interest, on loss of residual land, loss of business, job, profession shift, and other types of loss stated by the assignor. Assessment has been conducted per plot of land affected by the project. The assessment result would be the official basis for compensation determination that will be delivered to the entitled parties for tower bases along Tayan Sanggau Sekadau and substations in Sanggau and Sekadau.
- 65. The Land acquisition assessment adheres to the Indonesia Valuation Standards 306. The bases of assessment are: (i) Fair Replacement Value- This value can be understood as a value based on the interests of the owner (the value to the owner); (ii) Market value equivalence; (iii) non-physical losses caused by the compulsory right relinquishment of property owner; (iv) property ownership is not limited to ownership rights, but can be interpreted as control, management and use of property in accordance with applicable laws and regulations or according to the agreed scope of assignment; (v) valuation date is the announcement date, and the date of site determination for development for public interest in accordance with the applicable legislations; (vi) value adding should be calculated based on the risks incurred from owner's potential losses. The adequate replacement value must be higher than Property Market Value or at least equal to the compensation transaction value of similar property (if the comparator is similar property from a compensation transaction).
- 66. Compensation assessment in this standard not includes and not limited to: i) the construction of resettlement; ii) education and motivation programs; iii) provision of working facilities; and iv) business facilities compensation. Assessment approach is specified in the detailed SPI 306 as shown in Table 2.3 below. The TOR for Independent Appraisal can be seen in Appendix 3.

Table 2.3 Assessment Approaches According to Indonesia Valuation Standards

Table 2.3 Assessment Approaches According to Indonesia Valuation Standards			
Valuation object	Calculation basis	Approach	Remark
Physical: - Land or land and structures	Market and Non Market	Market approach Income approach	
Structure and / or Complementary Facility	New replacement cost with adjustments	Cost approach	Depreciation calculation is only used for adjustment of physical condition, but the value of depreciation will be returned to the premium asset.
Crops	Markets and reasonable cultivation calculation norms	Income approach	With the Discounted Cash Flow method for one cycle
		Market approach	For non-commercial plant, using references from relevant agencies. Immature crops
Non Physical:		Cost approach	minature crops
Adequate replacement of the loss on right	Market and non- market	Income approach	Based on applicable laws and regulations
relinquishment from landowners		Cost approach	
who will be given a premium			Losses due to termination or closure of business premises.
Loss of job or loss of business, including			e.g.: fish farmers, restaurants, and workshops.
profession shift.	Additional compensation is calculated based on		e.g.: 10% - 30% from value of physical loss compensation for
Emotional losses (solatium)	percentage value of physical losses		benefit of the owner's residence
Transaction cost	Based on socio- economic study conducted by an expert consultant / or applicable laws and regulations	Cost approach	Cost of removal The cost of clearing Tax associated Costs Cost of Certificate of Land Deed Official (PPAT)
Waiting period Compensation (interest)	Based on the risk- free rate, or the government bank deposits interest		Based on applicable laws and regulations
Loss of residual	Market	Market data	Based on applicable
Other physical	Deparation and	approach	laws and regulations
Other physical losses	Reparation cost	Cost approach	Based on applicable laws and regulations

- 67. Methods used to calculate compensation for ROW, referring to the Ministry of Energy and Mining No 38 year 2013, are set as follow:
 - Calculation for affected land is: 15% x Lt x NP (Lt = width of land under ROW, and NP is market lands value appraised by Independent Appraisal)
 - Calculation for affected building/structure is: 15% x Lb x NPb (Lb = width of building under ROW, and NPb is market lands rate for structure/building appraised by Independent Appraisal)
 - Calculation for affected trees is based on Indonesia Valuation Standards approaches

68. Assessors should consider the following:

- In conducting compensation assessment process, Assessors are required to refer to the relevant laws and regulations issued at each government levels. Compensation shall not be lower than the land market value, although there are cases where there is a decrease or increase in the land value as identified during Land acquisition location determination.
- Replacement Value should be equal or higher than the market value to provide certain benefits to landowners.
- For any compensation valuation undertakings related to land acquisition for development projects for public interest, the Appraiser shall use SPI 306. Application of the market data approach in compensation valuation should consider data that reflects the price trends in location where the land will be acquired and this will serve as "data control". Meanwhile, the application of the Cost Approach in compensation valuation should consider the following:
 - a. Economics/external slowdown due to land acquisition should not be taken into account.
 - b. Functional decline due to Harga Bangunan Umum (Price of Structure and Labor Cost) should be considered with caution, especially if the existing structure is still in function/viable.
- Application of Income Approach in compensation valuation should consider:
 - (i) Cash flow projections are made without considering any land acquisition.
 - (ii) The year projection basis should be free from the influence of land acquisition.
- Application of Land Development Method in compensation valuation should consider issues including:
 - (i) Development scenario, without considering any land acquisition.
 - (ii) Cash flow projections are made without considering any land acquisition.
 - (iii) The year projection basis should be free from the influence of land acquisition.
- Assessment of non-physical losses such as job loss or business loss including profession shift and emotional (solatium) loss should consider that the determination of the type of non-physical losses are determined through agreement with the assignor. The percentage value of solatium is determined through agreement with the assignor agency.
- 69. For the purpose of the preparation of RCCP document, unit rate for estimation of affected land already used the unit rate used during the construction of West Kalimantan

land acquisition of 150 kV Transmission Line Project Strengthening West Borneo Power Grid 2014, with the consideration of the inflation rate of 8.36% per year in 2014, 3.35% in 2015, and 4.7% in 2016; for structure used the unit rate appraised by Independent Appraisal for affected structure in the Sp. Tanjung - Entikong under TA Second Regional Road Development Project 2013 with consideration of inflation rate; and for affected trees/crops used the agreed unit rate that was used to compensate assets in the development of 150 kV Transmission Line Siantan -Tayan (January 2015).

70. For updated RCCP document, to determine the unit rate of affected land, PLN has been assigned appraisal services for tower base and substation of Tayan – Sanggau - Sekadau in May 2016 and for ROW in March 2017.

2.5. Affected Fixed Assets

Impact by Substation

Affected Land

- 71. As reported in RCCP 2016, for the construction of a new substation in Sanggau and Sekadau, PLN will acquire 2.905 ha of land which belongs to 2 AHs. Both AHs are male headed households, one AH owner of land in Sungai Mawang is Dayak, another AH owner of land in Sungai Ringin is Malay. The 1.535 ha of land located in Sungai Mawang Village, Kapuas Subdistrict will be acquired for Sanggau substation and the 1.37 ha of land located in Sungai Ringin Village, Sekadau Hilir Subdistrict will be acquired for Sekadau substation.
- 72. There is a change of the location of the Sanggau substation from its original location approaching towards the Sekadau substation. The change was caused by three landholders who did not approve the value of land payments. Therefore, in January 2017 it was decided to move the location of the substation. As the result a number of 2.23 ha of land located in Bunut Village, Kapuas Sub district, has been acquired for Sanggau substation in May 2017. As for the Sekadau substation there is no location change, a number of 2.24 ha of land located in Mungguk Village, Sekadau Hilir sub district has been acquired by PLN for Sekadau substation in December 2016.
- 73. The total 4.4778 ha of land belongs to 5 AHs. The 2 of them are female-headed households, and the rest are male headed households. The 2 of the land owner is in Mungguk Village and the 3 of the land owner is in Bunut Village.

Perennial and Timber Trees

74. Land in both location are agriculture land, one was planted with rubber trees, while another parcel of land is in the fallow period (usually planted with cassava and rice). Following are the detailed information regarding affected assets due to substation development.

Table 2.4 Affected Assets Acquired for Substation

Permanent Land Acquisition of Tower Base

Affected Land

75. Land area needed for tower bases of the 150 kV Transmission Line is 225 m2 (15 m \times 15 m) for suspension tower and 400 m2 (20 m \times 20 m) for tension tower. From the inventory of affected assets result, PLN will construct 262 normal towers and 98 angle towers.

- 76. A total of 360 tower bases will be constructed by PLN. 235 tower bases will be constructed along Tayan Sanggau transmission line and 125 tower bases will be constructed along Sanggau Sekadau transmission line. Up to September 2018, PLN has identified 360 tower bases. There are several obstacles in the land acquisition process, as seen in Table 2.5.
- 77. A number of 356 of 360 tower bases have been acquired and the owner has been compensated. The remaining 2 tower which is the owner can't be found (1 tower is located in Sei Mawang Village Package 6, the other is in Penyeladi Village Package 7), PLN will proposed letter of agreement to get the construction work permission and also the PLN's steps to re-announce the land ownership. The agreement will be implemented with the Muspika, Muspida and TP4D since the consigned money that sent in the local court has been rejected. The other 2 tower bases (T.136R and T.137R located in Sei Ringin Village) will be shifted due to the land is owned by Pemda Sekadau and it will be used as the sport facility.

Table 2.5 Current Status of Update RCCP Data Survey

		Status of RCCP 2016	Status of Updated RCCP 2018
Village	Tower Number	IOL Timeframe: Nov – Dec 2015 and continued during 2 nd week of January 2016	DMS Timeframe: March 2016 - September 2018
Tayan - Sangg	jau		
Tebang Benua	T.23 to T.29 (7 Tower)	Located inside the Forestry	The location of tower has been rerouted outside the forestry area,
Temiang Mali	T.30 to T.36 (7 Tower)	Area, PLN will reroute all 14 towers	the new line traversed through farmland (rubber, palm oil). They all already compensated in Sep – Nov 2018
Temiang Taba	T.80 & T.81 (2 Tower)	A. Land owner could not be foundB. The compensation will be deposited in the District	For T.80, T.81, T.168 the owners have been found for and already compensated in Sep – Oct 2016. For T.121 the owner is Pemda,
Palem Jaya	T .168 (1 Tower)	Courts. Later if the owners come/found, he/she can take the compensation in the	hence, 'lend-use' system is implemented between government agencies.
Sosok	T.121 (1 Tower)	court. This procedure is accepted according to the land acquisition law	
Suka Gerundi	T.141 & T.142 (2 Tower)	Tower Location could not be found, PLN need to conduct	Tower location has been found and compensated during Sep 2016
Palem Jaya	T.164, T.170, T.171 & T.172 (4 Tower)	IOL survey before payment of compensation	to Jul 2017. The location traverses along farmland (palm oil)
Sosok	T.108 to T.118 (2 Tower)		
Pusat Damai	T.174 to T.184 (11 Tower)	Location currently is flooded, PLN needs to conduct IOL later	DMS has been conducted in Sep 2016 to Aug 2017, the location of tower bases is mostly farmland

		Status of RCCP 2016	Status of Updated RCCP 2018
Village	Tower Number	IOL Timeframe: Nov – Dec 2015 and continued during 2 nd week of January 2016	DMS Timeframe: March 2016 - September 2018
Sei Mawang	Т.9		Land owner could not be found. Initially the compensation money will be deposited in court, but rejected; there of letter of agreement will be made between PLN, Muspika, Muspida and TP4D for the construction permission, scheduled in Nov 2018.
Sanggau - Se	kadau		
Bunut	T.14 & T.23		The land owners have been found
	(2 Tower)	A. Land owner could not be	and compensated for: T.14: in Sep 2017
Tanjung Kapuas	T.38 (1 Tower)	found B. The compensation will be	T.23 & T.38: in Nov 2016 T.86: in Oct 2017
Penyeladi	T.62 (1 Tower)	deposited in the District Courts. Later if the	T.112: in Aug 2017
Sungai Kunyit	T.86 (1 Tower)	owners come/found, he/she can take the compensation in the court. This procedure is accepted according to the land acquisition law	T.62: Land owner could not be found. Initially the compensation money will be deposited in court, but rejected; there of letter of agreement will be made between PLN, Muspika, Muspida and TP4D for the construction permission, scheduled in Nov 2018.
Ensalang	T.112 (1 Tower)	Dispute of ownership, the compensation will be deposited in District Court	Dispute is solved, already compensated in Aug 2017.
Sungai Ringin	T.130R (1 Tower)		Revision of inventory and appraisal values and already compensated in Sep 2018
Sei Ringin	T.136R T.137R (2 Tower)		Land owned by the Regional Government and will be used as a sports facility, tower bases will be shifted

78. A total of 89,925 m2 of farmland belonging to private households, customary land and institutions, have been acquired by PLN for tower base construction. However, for two locations, the owners are unable to be found. Thereof letter of agreement will be made between PLN, Muspika, Muspida and TP4D for the construction permission. There is no tower traversing the forestry area in Tayan - Sanggau - Sekadau, in accordance with the license issued by Territory Hall of Forest Area (Balai Pemantapan Kawasan Hutan Wilayah III), letter No.S396/BPKH.III.2/2015 dated May 13, 2015.

Table 2.6 Summary of Affected Land

Section	Number of Tower	Actual Land (tower)	Owner	Occupation of Land	Width (m2)
Tayan		225	Private	Farmland	56,464
Tayan – Sanggau	235	8	Institution	Farmland	2,086
Sanggau		2	Customary land	Farmland	625
Sanggau -	405	121	Private	Farmland	29,450
Sekadau	125	4	Institution	Farmland	1300
Total	Total 360 360				89,925

79. Tenure status of the land owned by institution in total of 3,386 m2 is the forest concession rights (HPH) as mention in the following table. A customary land affected by 2 plots of tower base in total of 625 m2. Customary land is in the form of customary forest, is jointly owned by a clan, and managed by customary leaders. Customary peoples can only utilize/take the products of the land with the consent of customary leaders.

Table 2.7 Name of Affected Institution

Affected Structure

81. PLN has conducted a reroute to avoid buildings and other structures, so in the latest tower schedule there is no building or structure traversed by transmission line.

Affected Perennial and Timber Trees

- 82. The 6,349 various species and commercial value that were counted during DMS, whose owners had been identified and have been acquired by PLN. Of this number, 2,349 trees are small, 1,466 trees are huge, while 2,534 are fruit-bearing or productive tree. There are 4,054 m2 of perennial crops, mostly are rice, which were also counted during DMS. Detailed numbers of affected trees per section in the transmission line are mentioned below and please see Appendix 5 for details on the quantity of affected perennials and timber trees.
- 83. The calculation of affected perennial and timber trees for RoW is currently underway. Inventory of RoW has been conducted by PLN UPP KBB 2 with third party, starting in April 2018. Socialization to local government (village) has been done. An appraiser has been hired and RoW appraisal will be started in October 2018. RoW payment will be conducted from October 2018 February 2019. The result will be submitted to the RCCP implementation monitoring report.

Table 2.9 Affected Trees and Crops

Section		Trees		
Section	Small	Huge	Productive	Perennial Crops (m2)
Tayan - Sanggau	1533	957	1654	4.054
Sanggau- Sekadau	816	509	880	-
Total	2349	1466	2534	4.054

Restrictions Transmission Line Right of Way

84. 150 kV transmission line RoW requires 20 m width (10 m + 10 m) along 77,688 km of the transmission line route from Tayan-Sanggau and along 46,703 km route from Sanggau to Sekadau. The total area of 2,488,525,160 m2 of the land under the RoW along 124,391 km from Tayan-Sanggau-Sekadau will be affected by the project. Some restrictions on the use of the land and building, for instance to grow high standing trees and building, will be applied. Compensation will be provided due to the use and access restrictions of the land under the RoW.

85. The route of transmission line has been finalized; the RoW inventory is currently done by PLN UIP KBB 2 also the independent appraiser of RoW is already mobilized. For this updated RCCP, survey to households affected by the transmission lines ROW were conducted by sampling on 330 AHs who are also affected due to tower base construction as seen in Table 2.8. Further information detail about this impact including AHs/ APs in ROW corridor will be reported in internal monitoring report.

Vulnerable and Severely Affected Households

86. In general, potential impacts to be experienced by AHs due to the permanent land acquisition for the tower bases are minor. Almost all AHs lost about 1% of their total land. However, 2 AHs lost more than 10% of their productive land as demonstrated in the table below. Two AHs whose their land have been acquired for substation and one AH whose house is partly affected will be considered as severely affected AH.

Table 2.10 Number of Severely AHs by 150 kV Transmission Line and Substation

No.	Tower	Ethnicity	Gender	Total Land/House Holding (m²)	Total Affected Land / House (m ²)	Remaining Land/House (m²)	Percentage Affected / House (%)

11	T.57	Melayu	М	225	225	0	100					

- 87. Based on the DMS for tower base, there are 133 AHs classified as vulnerable and severely affected group, in which 7 of them are poor women-headed AHs, 23 of them are poor elderly-headed AHs, 8 of them are women-headed AHs, 1 of them is woman elderly headed AH, 1 of them is poor woman elderly headed AHs, 26 of them are elderly-headed AHs and 56 AHs reported their income was below the provincial poverty level.
- 88. The vulnerability for the RoW corridor is being assessed simultaneously with the DMS of RoW. The identified APs/AHs in vulnerable and severely condition will be provided with IRP by PLN, including vulnerable APs/AHs in ROW corridor. Detailed name and vulnerability of AHs in tower base alignment are shown in Appendix 6.

Table 2.11 Number of Vulnerable AHs by 150 kV Transmission Line and Substation

Section		Vulnerability						Severely	Total

3. SOCIO ECONOMIC PROFILE OF AFFECTED HOUSEHOLD

- 90. The socioeconomic survey (SES) was conducted in parallel with the IOL survey from 11 November-11 December 2015, and from 12-16 January 2016 as reported in RCCP 2016. SES covered 270 of 299 AHs affected by substation (2 AHs) and tower base (268 AHs). The 29 AHs could not be interviewed because the owner of the land was not found or locations of the tower have not been defined yet.
- 91. The socioeconomic survey (SES) has been conducted to establish a baseline of demographic, socioeconomic conditions and socio-cultural dynamics of people affected by the project. The Social Economic Survey (SES) data includes information on demographic characteristics of the entitled party's household members, ownership of land and other assets, households living sources and conditions, and levels of household income.
- 92. In the other hand to update RCCP, a detailed measurement survey (DMS) has been carried out by the PLN LAC. The procedures of the DMS are similar to those of the IOL, i.e., detailed recording of all users of land and owners of other assets.
- 93. Additional survey had been conducted by PIC from February to June 2018 in coordination with PIU due to re-route of several plots during DMS, and also to take additional data associated with severely AHs/APs. The methodology for obtaining the data by interviewed 282 from 337 AHs of private land. It was found that there were no significant changes to social life in APs/AHs.

3.1. Basic Socioeconomic Information from Census of APs Male AH Head

- 94. As reported in RCCP 2016, out of the 270 AH heads surveyed, 239 (88.5%) are men and 31 (11.5%) are women. Among the 239 male AH heads, 26 (10.9%) are 65 years old and above; none of them have disabilities; 213 (89.1%) are married; 8 (3.3%) are single; and 18 (7.5%) are divorced (Please see Figure 3.1 below). Some of the male AH heads (155 men or 64.9%) identified their ethnic affiliation as Dayak, while 50 of them (or 20.9%) are reported to be Melayu, 17 of them (7.1%) are reported to be Chinese, 11 of them (4.6%) are reported to belong to the Javanese ethnic group, and 6 of them (2.5%) are from Batak ethnic (Please see Figure 3.3 below)
- 95. One hundred fifteen (48.1%) of the male AH heads are reported to be Catholic, 55 men (23.0%) as Protestant, while 64 (26.8%) men are identified as Moslem for their religion. Details of the basic socioeconomic information gathered for the 239 men-headed AHs are shown in Appendix 7.

Female AH Head

96. Among the 31 female AH heads, 4 (16.1%) of them are 65 years old and above; one has disabilities; 18 (58.1%) women are widows and 13 (41.9%) are divorced (Please see Figure 3.1 below). Twenty four (77.4%) of the female AH heads identified their ethnic affiliation as Dayak, while 7 (22.6%) are Melayu ethnicity. Twenty one (67.7%) of the female AH heads are reported to be Catholics, 2 (6.4%) are Christian, while 8 (25.8%) are reported to be Moslem for their religion (one of the Dayak ethnic are Islam) (Please see Figure 3.3 below). (Please see Appendix 7 for details of the basic socioeconomic information gathered for the 31 female-headed AHs).

Additional Survey

97. As the result from additional survey for update RCCP, out of 282 AH heads surveyed, 265 (93.97%) are men and 17(6.03%) are women. Out 45 (17.0%) of 265 male AH heads, and 6 (35.3%) of 17 female AH heads are 60 years old and above, categorized as the elderly as stated in Law No.13 Year 1998. None of them have disabilities (Please see Figure 3.2 below).

98. Among the 282 AH heads, 206 (73.0%) AH head identified their ethnic affiliation as Dayak, while 54 AH heads (19.1%) are Melayu ethnicity, 11 AH heads (3.9%) are Chinese, 8 AH heads (2.8%) are Javanese, 2 AH heads (0.7%) are Batak and 1 AH head (0.4%) is Bugis (Please see Figure 3.4 below). Details of additional survey information can be seen in Appendix 8.

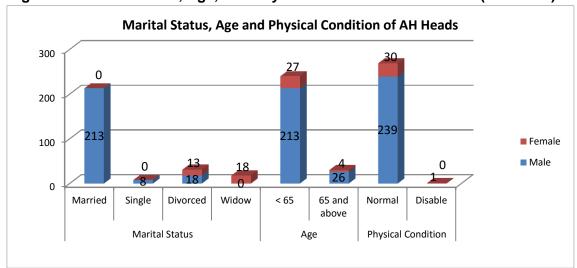

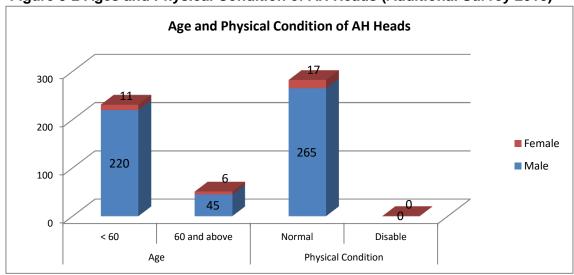

Figure 3-1 Marital Status, Age, and Physical Condition of AH Heads (SES 2016)

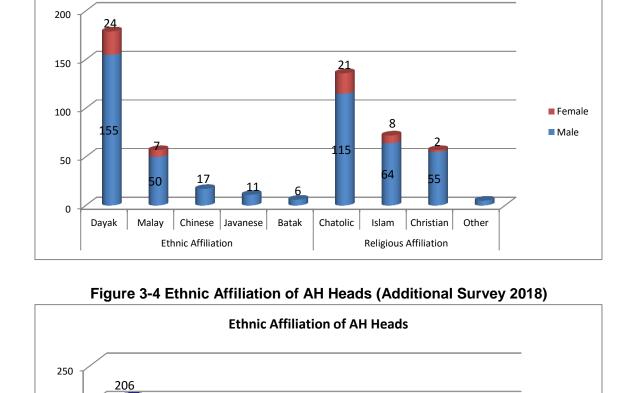

Figure 3-3 Ethnic and Religious Affiliation of AH Heads (SES 2016)

Ethnic and Religious Affiliation of AH Heads

200 150 150 54 50 Dayak Malay Chinese Javanese Batak Bugis

3.2. Educational Attainment

99. As reported in RCCP 2016, with regard to educational attainment of the affected persons, 93 men (7.9%) and 122 women (10.4%) of the affected people (APs) reportedly attended no school, 251 men (21.4%) and 169 women (14.4%) of APs attended elementary school; 108 man (9.2%) and 91 women (7.8%) of APs reportedly attended junior high school; 153 man (13%) and 105 women (8.9%) of APs attended senior high school, and 46 man (3.9%) and 36 women (3.1%) of the total APs went to the college and university (Please see Figure 3.5 below).

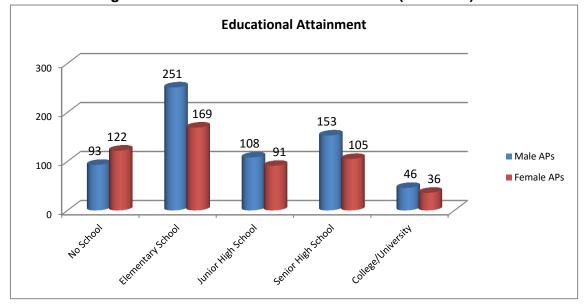

Figure 3-5 Educational Attainments of APs (SES 2016)

3.3. Livelihood and Household Income

100. Out of 176 (55.2%) male AH heads reported farming as their main livelihood, 19 (6.6%) reported operating shops (food and non-food businesses) and working as a labor in the plantation or factory as their primary livelihood, 13 (4.1%) working as civil servant for their main occupation, 7 (3%) are retired, 2 (1%) work as Village Official, while 3 other male AH heads (1%) are reported to be working in the army, a fisherman, and unemployed.

101. 14 (5.6%) of the male AH heads reported have households' monthly income below the estimated provincial poverty threshold of Rp 298,212 per person/month (as of September 2014) or Rp 1,282,312 based on an average household size of 4.3 persons.

102. 25 (75.8%) female AH heads reported farming as their main livelihood, 2 (6.1)% are operating shops (food and nonfood business), 2 (6.15) are working with government and 3 (9.1%) as a plantation labor as their main occupation, while one (3%) woman AH head is a household wife.

103. One female AH head (3.2%) reported to have households' monthly income below the estimated provincial poverty threshold in September 2014 (Please see Figure 3.6 below and Appendix 7 for details of livelihood and household income).

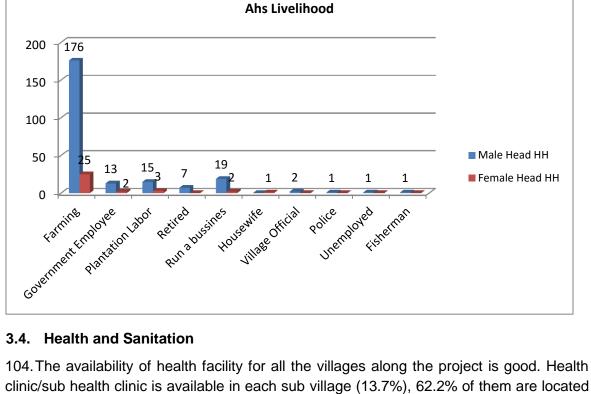

Figure 3-6 Livelihoods and Household Income (SES 2016)

104. The availability of health facility for all the villages along the project is good. Health clinic/sub health clinic is available in each sub village (13.7%), 62.2% of them are located in the same village, 11.9% of them are located in the neighboring village within the same sub district, 10.4% are located in the different sub district within the same District and 1.9% of health facilities are only available in the Province, as mentioned in the Figure 3.7 below. Details on the health facilities location are shown in Appendix 7.

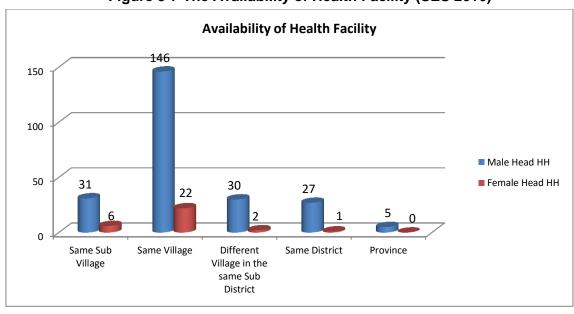

Figure 3-7 The Availability of Health Facility (SES 2016)

105. As many as 54 (20.0%) of the 270 AHs surveyed in the SES use household ground well for drinking, 45 AHs (16.7%) use household pump well, 32 AHs (11.9%) get potable water from PDAM, 9 AHs (3.3%) use public ground well, 10 AHs (3.7%) use public pump well, 12 AHs (4.4%) purchase purified water from retailers, 37 AHs (13.7%) get from the river, 27 AHs purchase water gallon, 27 AHs (10%) get from the rain water and 17 other AHs (6.3%) use springs for drinking as shown in figure 3.8 below. Ninety four (34.5%) of the 270 AHs surveyed in the SES withdraw water from the river for washing, 65 AHs (24.1%) use household ground well, 50 other AHs (18.5%) use household pump well, 28 AHs (10.4%) from PDAM, while 15 AHs (5.5%) from spring, 9 AHs (3.3%) from public ground well, 6 Ahs (2.2%) from public pump well and 3 other AHs (1.1%) buy from reseller as shown in Figure 3.9. Details on main sources of water for drinking and washing of the AHs are mentioned in Appendix 7.

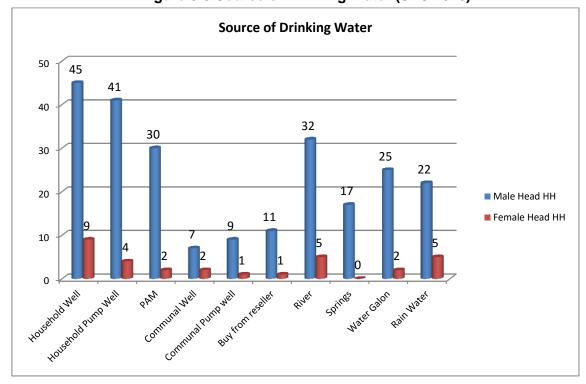

Figure 3-8 Source of Drinking Water (SES 2016)

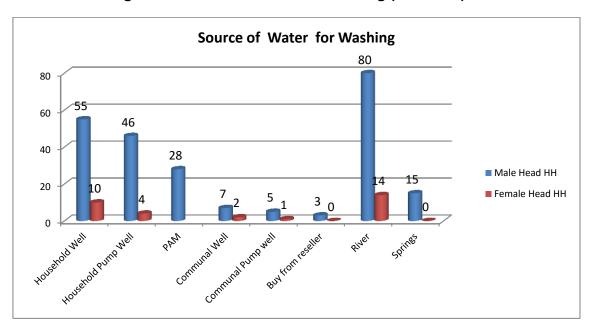

Figure 3-9 Source of Water for Washing (SES 2016)

106. Out of 192 AHs (71.1%) of the 270 AHs surveyed in the SES reportedly have household toilets, while 78 AHs (28.9%) do not have any toilet in their homes. One hundred forty eight AHs (54.8%) of the 270 AHs surveyed in the SES are reported to have a bathroom inside their homes, while 50 AHs (18.5%) claimed to have an open place for bathing beside their homes, while 72 other AHs (26.7%) reported do not to have any place for bathing in their residences and use public bathroom as shown in Figure 3.10. Details on the toilet and bathing facilities of the AHs are mentioned in Appendix 7.

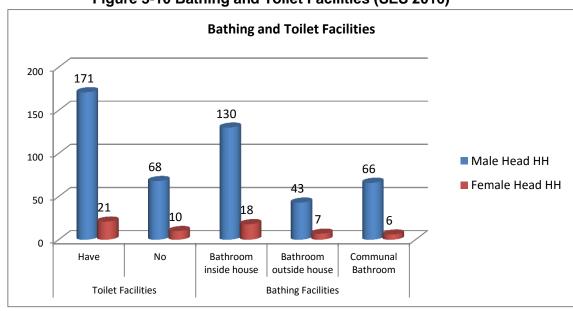

Figure 3-10 Bathing and Toilet Facilities (SES 2016)

3.5. Amenities in AHs Surveyed

107. As reported in RCCP 2016, 234 AHs (86.7%) surveyed in the SES use electricity from household PLN for lighting, while 22 AHs (8.1%) get electricity from their neighbor. 7 AHs (2.6%) get electricity supply from their own generator and also 7 AHs(2.6%) use kerosene lamp for source of energy (please see figure 3.11 below). For electricity supply, 180 AHs (66.7%) spent less than Rp 100,000.00 per month, 66 AHs (24.4%) spent. Rp100,000 to 300,000 per month, 8 other AHs (3%) spent Rp. 300,000.00 to 500,000.00 per month, while 16 AHs (5.9%) who runs business as their livelihood spent more than Rp. 500,000.00 per month. According to the SES surveyed, one household uses more than one source of energy. Most of them use liquefied petroleum gas (239 AHs or 88,5%), electric stove (159 or 58.9%) and wood (163 AHs or 60.3%). Only one AHs uses kerosene for cooking (please see figure 3-12 below).

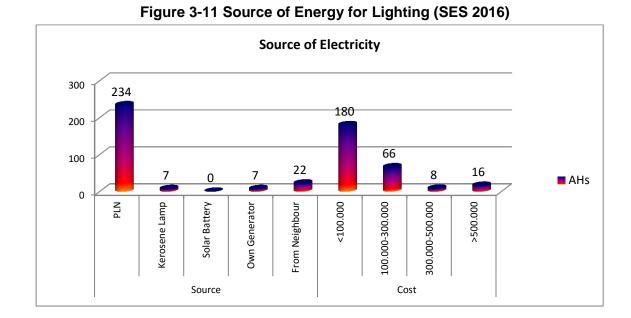

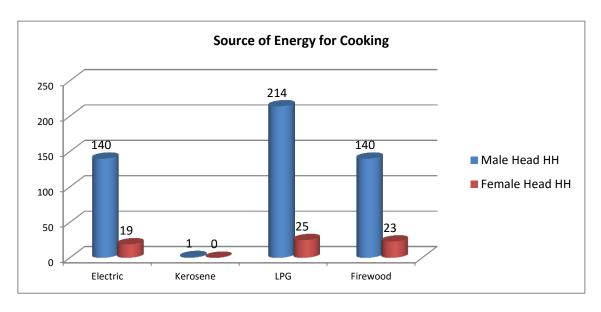

Figure 3-12 Source of Energy for Cooking (SES 2016)

108. From 270 AHs surveyed in the SES, 424 motorcycles were reported, which means many of the AHs have more than one motorcycle. 63 AHs (23.3%) are reported to own a car, 10 AHs (3.7%) own a truck, 21 AHs (7.8%) own a bicycle, while 22 AHs (8.1%) who is fisherman is reported to own a boat (please see figure 3-13. below).

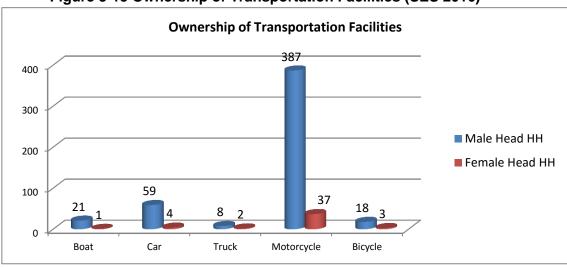

Figure 3-13 Ownership of Transportation Facilities (SES 2016)

109. As many as 238 AHs (88.1%) own a television set, 167 AHs (61.9%) own a refrigerator, while 191 AHs (70.7%) own a (hand) telephone. 109 AHs (40.4%) own a DVD/CD player, 170 AHs (63.0%) own electricity fan, 42 other AHs (15.6%) own oven stove, while 8 other AHs (3%) own AC. (please see Figure 3-14 below).

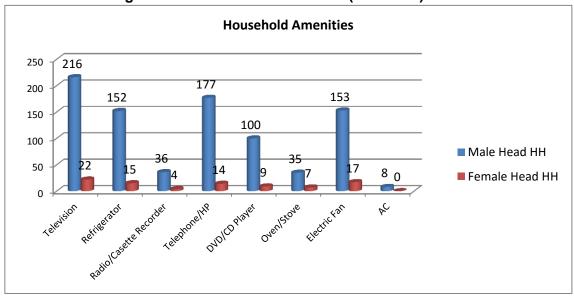

Figure 3-14 Household Amenities (SES 2016)

110. Details on the sources of fuel or power used for cooking and lighting and on the appliances of the AHs are shown in Appendix 7.

3.6. Perception about the Project and Suggestion

111. Out of 222 (86%) AHs claimed that they had been informed about the project, while 38 (14%) of AHs never got any information regarding the project. There are 125 (53.9%) of 232 AHs that got information regarding the project from the meeting in the village, which was held regularly by Village, 58 AHs (25%) from PLN survey team, 35 AHs (15.1%) from the Head of Village and/or Head of Sub district, while 14 other AHs from rumors among their neighborhood.

112. On the positive side of the proposed 150 kV Tayan-Sanggau-Sekadau Transmission Line, 123 AHs (45.6%) said that they did not know what the benefit of the project to them was, 117 of AHs (43.3%) said that the project would give better electricity services, such as more people would get electricity service, improve the voltage etc. Moreover, 29 other AHs (10.7%) said that the project would give better chance for economic and livelihood, while 1 AH said that getting compensation was the positive impact of the project. On the negative side of the proposed 150 kV Tayan-Sanggau-Sekadau Transmission Line, 101 of the AHs (37.4%) said that their land width would reduce, 130 AHs (48.1%) said that they did not know what the negative impact of the project was, while 28 AHs (10.4%) said that there was no negative impact at all. There are 7 AHs (2.6%) that said they were worried about high voltage of transmission line as a negative impact. But in general almost AHs (269 AHs) expressed their support on the project plan, and only one AH does not answer this question.

113. On procedures for addressing complaints, 204 of the AH heads (75.6%) suggested that at the first instance, grievances should be filed with the office of the Head of Village, while 47 (17.4%) of the AH heads suggested that at the first instance, grievance should be filed to PLN office. All of AHs thinks that complaints can be filed verbally. If they are unsatisfied with the action taken, of which the first time complaint is filed, almost all AH heads still said that it should be filed with the Head of Village and PLN office.

3.7. Perception about the Satisfaction and Compensation Used

114. PIC and PIU conducted an additional survey in February to June 2018 to find out the affected household's satisfaction level for the amount of compensation regarding the land acquisition and determine the update of vulnerable list in the transmission line. Sample of additional survey questionnaire can be seen in Appendix 8.

115. Out of 282 from 337 AHs (83.68%) have been conducted of interview regarding the compensation of affected asset, it was found that more than half of affected people, i.e. 56.03% APs are satisfied with the compensation amount, 37.59% are quite satisfied and the rest are not satisfied in the amount of 6.38% (Please see figure 3-15).

116. The APs that are not satisfied with the compensation because they feel their income has been decreased as they lose their land. In addition, due to the loss of plants they have entered the productive stage.

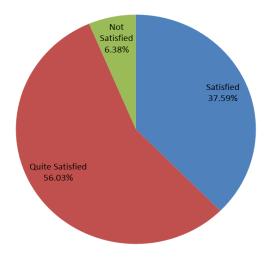

Figure 3-15 Tayan - Sanggau - Sekadau APs Compensation Satisfaction Chart

117. The level of respondent's satisfaction to the value of compensation is influenced by several factors, such as the number of family members, the income standard, the type of work, although most of them make a living as farmers, and other factor.

118. Affected people use the land compensation in various forms. As seen in Figure 3-16, most (29.08%) use the compensation for daily needs, followed by home renovation in total of 23.94%. As much as 20.57% APs use it in capital venture to expand their business. Then, 16.31% APs use the compensation they get as bank saving. The remaining 10.11% APs use their compensation in other way such as medical treatment, purchasing of goods, education, and to share within their family.

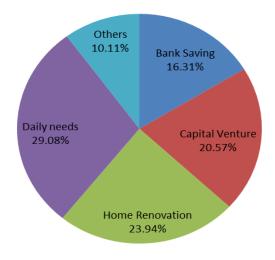

Figure 3-16 Tayan - Sanggau - Sekadau APs Compensation Use

4. CONSULTATION, PARTICIPATION AND INFORMATION DISCLOSURE

4.1. Consultation and Participation

119. Prior to the inventory of losses (IOL) and socio economic survey (SES), PLN have carried out a series of public consultations in seven affected sub districts (see Table 4.1 below). Subdistrict and Villlage officials, including local residents, were briefed about the proposed 150 kV Tayan-Sanggau – Sekadau Transmission Line project, and their opinions and concerns were also solicited.

Table 4.1 Summary of Public Consultation

Partie 1 Number of Number of			
Date	Venue	Participants	Participants
12 October 2015	Tayan Hilir sub district Office	Head of sub district, Secretary of Head of sub district, Secretary of Customary Council, Head of Cempedak Village, Secretary of Tebang Benua Village, Local Community from Cempedak and Tebang Benuah Village, sub district Police, PLN LAC	Men: 23 Women: 4
13 October 2015	Balai sub district Office	Head of sub district, Secretary of Head of sub district, Secretary of Customary Council, Head of six affected villages in the sub district, Local community form six affected villages, sub district Police, PLN LAC	Men: 56 Women: 7
15 October 2015	Tayan Hulu sub district Office	Head of sub district, Secretary of Head of sub district, Head of three affected villages in the sub district (Menyabo, Sosok,Binjai), Local community form three affected villages, sub district Police, PLN LAC	Men: 76 Women: 4
16 October 2015	Parindu Hulu sub district Office	Head of sub district, Secretary of Head of sub district, Head of four affected villages in the sub district (Pusat Damai,Palemjaya,Suka Gerundi, Sebarra), Local community form four affected villages, sub district Police, PLN LAC	Men:36 Women: 5
20 October 2015	Kapuas sub district	Head of Subdistrict, Secretary of Head of Subdistrict, Head of Village of Sungai Mawang and Lape, Secretary of Bunut Village, Local community form those three affected villages, sub district Police, PLN LAC	Men: 29 Women: 4
21 October 2015	Office	Head of sub district, Secretary of Head of sub district, Head of three villages within the sub district (Beringin,Kapuas,Penyeladi), Local community form those three affected villages, sub district Police, PLN LAC	Men: 28 Women: 5
22 October 2015	Mukok Subdistrict Office	Head of Sub district, Member of District Customary Council, Head of Semuntai Village, Local Community from Cempedak and Tebang Benuah Semuntai Village, Head of sub district Police, PLN LAC	Men: 32 Women: 6

Date	Venue	Participants	Number of Participants
23 October 2015	Sekadau Subdistrict Office	Head of sub district, Head of four affected villages within the sub district (Peniti, Sungai Kunyit, Ensalang and Sungai Ringin), Local Community from those four affected villages, Head of sub district Police, PLN LAC	Men: 28 Women: 3
11 April 2017	Sekadau Hilir	Head of Sub district, Secretary of Head of Sub district, Military Headquarters, state intelligence agency, sub district police, Village Head of Bokak Sebumbun, PLN LAC	Men: 15 Women: 2

120. There were 346 people that attended the public consultation; in which 308 of them are men and 38 (11%) are women. PLN invited the representation of women to attend the public consultation, but only few of them attended, which might be caused by the prevailing practice that man is the one who usually attend any consultation or information meeting related with the development plan. Details of the consultation are shown in Appendix 9. Efforts to invite women will be continued for consultations during RCCP implementation. Key points of the series of consultation are as follow:

Table 4.2 Key Points of Public Consultations in Seven Subdistrict

Table 4.2 Key Points of Public Consultations in Seven Subdistrict		
Issues	Key points	
Implementation of the project	 The construction of substation and transmission line is expected to start in 2016. Prior to the construction commencement, compensation of land and non-land asset should be paid completely. Development of transmission networks in this project will be under the supervision of PLN UPK 5, located in Pontianak. Once constructed, management of transmission networks will be handed over to a Transmission Management Unit under PLN Regional office West Kalimantan which will be responsible for all aspects of the operation and maintenance of transmission networks 	
Impact of the project	 People should not worry about the electric radiation generated by 150 kV Transmission Line for life and public health, because the installation of transmission line will be done ,considering a minimum free space based on SNI PLN and the selected contractor will be responsible to handle any negative impacts during construction of substation and transmission line Customary leader who attended the public consultation requested that PLN and selected contractors must pay attention to the culture and customs prevailing in Dayak communities during construction to avoid negative impact The lifetime of the tower is designed for 20-25 years and PLN will be responsible if there is a fallen tower. There will be a line foreman who will monitor tower network conditions periodically. People along the transmission line asked for the possibility to get the electricity in order to be used by residents. The electrical voltage must be lowered to 20 kV and 220 V beforehand 	
Land acquisition procedure	 PLN will carry out IOL and SES to identify land and non-land asset that will be affected by the project, so they will know the detailed information and status of land owners. PLN will verify land ownership and its supporting documents to make sure/ensure people who receive the compensation is the person who has the right to the land 	

Issues	Key points
	 Replacement of unit price will be determined by an independent appraiser that is licensed from Ministry of Finance and BPN. Land, building, trees (≥ 4 m tall) and other objects under the transmission line of above 35 kV will be compensated, referring to the Ministry of Energy and Mineral Resources Decree No. 38/2013 regarding Compensation of Assets in the ROW of Transmission Line, regarding procedures, mechanisms, and formulas for compensation Budget for certification of remaining land shall be borne by PLN
Object of land acquisition	 Land or other assets that existed on the land used for substation or tower will be acquired permanently. Area to be acquired for tower is 15 x 15 m = 225 m² for straight tower or 20 x 20 m = 400 m² for angle tower. PLN will shift/reroute the tower to avoid installation of towers on customary land Trees and other assets that will be compensated are the assets recorded during IOL carried out by PLN.
Consultation and Socialization	 Consultation and negotiation to determine the amount of compensation will be conducted transparently. PLN is expected to coordinate with customary leaders and village/sub district leaders during construction

121. Consultation was also conducted in each village prior to IOL and SES survey from November 16 to December 11, 2015 and January 12-16, 2016. Summary of the consultation are mentioned in the following table.

Table 4.3 Summary of Consultation Prior To IOL and SES Survey

No	Date	District	Subdistrict	Village

122. All those consultations above were carried out in the Village office. Concern and question raised by AHs are almost the same with what were raised in the public consultation. Following are the key points of the consultations.

Table 4.4 Key Points of The Consultation in Each Village Prior to Conduct IOL and SES survey

Issues	Key points
Project implementation	The construction of substation and transmission line is expected to start in 2016. Prior to the construction commencement, compensation of land and non-land asset should be paid completely.
Compensation of the affected asset	 Replacement of unit price will be determined by independent appraisal that is licensed from Ministry of Finance and BPN All assets belonging to private, customary community or government identified during Inventory of Losses Survey will be compensated by PLN referring to the prevailing regulation Land, building, trees (≥ 4 m tall) and other objects under transmission line of above 35 kV will be compensated, referring to the Ministry of Energy and Mineral Resources Decree No. 38/2013 regarding Compensation of Assets in the ROW of Transmission Line, regarding procedures, mechanisms, and formulas for compensation If the tower is located in rice field, the construction of tower will wait until the rice harvested.
Expectation from the customary and local community	 Customary and village leaders are expected to be involved in the consultation process for the replacement of assets and during the construction period Local communities are expected to work in the project. PLN will ask the contractor to provide opportunity for the local community to work as unskilled workers PLN was asked to pay all the cost borne due to customary ceremony prior and during the construction process. PLN will coordinate with the customary leader regarding the kind of the ceremony needed to be conducted in each stage of construction

- 123. In addition to the consultation mentioned above, consultations have been conducted with the land owners for the substation and the relevant local governments for project location determinations. Project consultations and information disclosure have also been conducted with a range of organizations and surrounding community, particularly through environmental and social assessment processes. Environment-related consultations were undertaken in April 2012 during initial preparation of the UKL-UPL Sanggau Sekadau Sintang Transmission Line. Additional consultations were conducted in April 2015 in relation with the UKL-UPL Tayan Sanggau and the IEE composing process of the 150 kV Tayan Sanggau Sekadau Transmission line.
- 124. Key Informant Interviews (KII) was carried out with five customary leaders in five different villages and subdistrict in parallel with the IOL and SES survey, as seen in Table 4.5 and key points of the KIIs are mentioned in the Table 4.6.

Table 4.5 Summary of KII's with Customary Leaders

Date	Venue	Customary Community	
27 November 2015	Ensalang Village, Sekadau Hilir Subdistrict	Customary community of Dayak Benawas (Bp Yosep)	
29 November 2015	Sungai Kunyit Village, Customary community of Dayak Ketung (Bp. Amung Merson)		
8 December 2015	Sebbara Village, Parindu Subdistrict	Customary community of Dayak Pandu (Bp. Herkulanus Baco)	
10 December 2015	Tebang Benua Village, Tayan Hilir Subdistrict	Customary community of Dayak Tobak (Bp. Tihon)	
11 December 2015	Sei Mawang Viilage, KapuasSub Distric	Customary community of Dayak Pangkodan (Bp. Neman)	

	ints of the Key Informant Interviews with Customary Leaders
Ethnicity	 Most communities in all villages are Dayak and Malay Ensalang Village: Dayak Benawas (40%), Dayak Mudong (10%) and Malay (40%) Sungai Kunyit: Dayak Ketungau (±70%), Malay (30%) Sebarra Village: Dayak Pandu (60%), Malay (40%) Tebang Benua Village Dayak Tobak (80%), Malay (20%) Sei Mawang Village Dayak Pangkodan (75%), Malay (25%)
Land ownership	 Private land usually inherited from their ancestors, a household has 2-5 ha in average Customary land, usually in the form of customary forest, is jointly owned by a clan and managed by customary leaders. Indigenous people can only utilize/take the products of the land with the consent of customary leaders. Customary land is usually about 40 ha to 100 ha. Man or woman could own private land
Costumary ceremony before tower or substation construction start	 According to Dayak culture, a customary ceremony has to be conducted before the start of tower or substation construction. The ceremony need to be done in each village. The purpose of the ceremony is to appease the spirits in that place and accordingly to protect construction workers and villagers against accidents caused by angry spirits that disturb construction activities The content of the ceremony is to offer food (pork, chicken, rice) to the spirits and pray them to be benevolent to the upcoming activities. According to the customary leaders, this ceremony will also protect demolition and relocation of houses and other structures as well as trees in the area from any misfortune caused by angered spirits. No construction activity shall start before at least three days after the conducted ceremony
Customary Leader vs Village Leader	 Both customary leader and village leader were elected by the community, and there have been good coordination between them. All problems related with customary land and others social problems will be solved by customary leader first before being brought to the head of village. Only problems that cannot be solved by customary leader will be brought to head of village or head of sub district. Criminal problems will be directly brought to the head of village for resolution
Livelihood	 Almost all local communities obtain income from farming or labor plantation. No restrictions exist for women to work as farmers or plantation labor or other work
Expectation to the project	 Local community is expected to get work in the project as an unskilled labor, like they did in other telecommunication tower project and road project

 The customary leaders recommend that PLN and construction contractor should arrange a consultation meeting with the customary leaders before the construction commencement in order to understand Dayak culture, what is appropriate and not appropriate, and the do's and
don'ts according to the local customary culture.
- The customary leaders also expect to be regularly informed by the
contractor on the ongoing construction activities throughout the project
time to help the project during construction period

125. During the land acquisition implementation several consultations were conducted to the APs/AHs by PLN to give understanding and detail info about the project. Negotiation with APs/AHs on compensation for affected assets, income losses (invitation should address to husband and wife) have been done by PLN. The recent consultation was supported by UIP Kalbagbar, UPP KBB2 and PIC shown as below:

Table 4.7 Summary of Consultation during Land Acquisition Implementation

No	Date	District	Sub district	Village
1	12-02-18	Sanggau	Parindu	Suka Gerundi

Table 4.8 Key Points of The Consultation in Each Village During Land Acquisition Implementation

Issues	Key points
Project implementation	The construction of substation and transmission line was started in the end of 2017 after the completion of compensation of land and non-land asset payment The people fully support about the project
Compensation of the affected asset	 Replacement of unit price was determined by independent appraisal that is licensed from Ministry of Finance and BPN. The compensation has been delivered to the all entitlement parties Most of the society say that they are satisfied with the compensation money and have their income increased For the people that are not satisfied (with the compensation money), including vulnerable and severely APs/AHs, PLN has prepared IRP to them An aggrieved AP/AH may bring the grievance/complaint in regards to compensation rates directly to PLN LAC or through the Customary or Village leader who will submit it to the PLN LAC either in writing or verbally. PLN LAC, together with the Customary or Village leader, will attempt to seek consensus to achieve an acceptable settlement with the aggrieved AP/AH specifically.
customary and local community	 Customary and village leaders already involved in the consultation process for the replacement of assets and during the construction period PLN has implemented the customary ceremony prior and during the project
Project benefit to the surrounded community	 The people actually get some benefits of the project, i.e. electricity help them in daily activities The people around the project area could get job opportunities to join the project

4.2. Institutional Roles in the Conduct of Consultations

126. Table 4.9 below summarizes the roles and responsibilities of the Executing Agency, the local governments, and the AHs in the preparation, and implementation of the RCCP.

Table 4.9 Roles and Responsibilites of Institution in Conduct Consultation

Project Process Stage	Activities	Responsible Institution	Remarks
During Land Acquisition Planning Phase	Conducting initial survey in order to prepare Land Acquisition planning document in accordance with the laws and regulations and inform related local government	PLN UIP Kalimantan Bagian Barat	Completed
Pre-IOL consultation in each sub district to inform local residents and officials about the proposed development of 150 kV Tayan-Sanggau-Sekadau Transmission Line, and the principle of compensation		PLN UPP KITRING KBB 2, sub district and Village Government	Completed

Project Process Stage	Activities	Responsible Institution	Remarks
	Conduct of IOL, census of APs, socioeconomic survey (SES) of AHs,	LAC Team, PLN UPP KITRING KBB 2	Completed
	Drafting of the resettlement customary community plan (RCCP) and project information leaflet for submission to PLN and ADB for review and approval.	(Consultant) Social Resettlement Specialist	Completed
	Submitting RCCP documents to ADB for review and approval	PLN Head quarter, PLN UIP Kalimantan Bagian Barat	Completed
	Distribution of the Project Information Leaflet to the APs/AHs and posting of summary RCCP at District, sub district and village government offices	PLN UPP KITRING KBB 2	Completed
	RCCP disclosure on ADB website	ADB	Completed
	RCCP disclosure on PLN website	PLN	Completed
Preparatory Stage	Setting up Land Acquisition Committee	PLN UIP Kalimantan Bagian Barat and PLN UPP KITRING KBB 2	Jan-16
Public Announcement of the Project and confirmation of Project location	Preliminary information gathering on Project impacts which involves, among others, holding consultation-meetings, including broadcasting in mass media (radio or newspaper), to inform the public about the Project (i.e., Public Announcement of the Project) and to solicit opinions and suggestions from the public, and confirm the location of the project and areas that will be affected adversely Confirmation of Project location	PLN UIP Kalimantan Bagian Barat and PLN UPP KITRING KBB 2 District Local Government	Completed For Sanggau District issued in April 2014. Decree Letter No 19/2015 dated 16 January 2015 For Sekadau District issued in March 2016 Decree letter No.671.32/133/UMU M/2016 dated 1

Project Process Stage	Activities	Responsible Institution	Remarks	
Implementation Stage	Conduct of detailed measurement survey (DMS) for reroute tower base and land use restriction and other affected asset under ROW. The SES method should be consider gender balance	PLN LAC	Completed	
Updating RCCP	Updating of the RCCP and submission to ADB for review and approval	Consultant PLN UIP Kalimantan Bagian Barat	In progress	
	Distribution of the updated project information leaflet to the APs/AHs and posting of summary updated RP at District, Sub-district and village government offices. Distribution will pay attention to women.	PLN UPP KITRING KBB 2	In progress, scheduled on February 2019	
	Posting updated RCCP on ADB website	ADB	Not yet	
	Appraisal of affected asset to determine the replacement unit rate	PLN UIP Kalimantan Bagian Barat, Selected Independent Appraisal	Completed for tower base, for ROW in progress	
Implementation of <u>RCCP</u>	Negotiation with APs/AHs on compensation for affected assets, income losses (invitation should addressed to husband and wife)	PLN LAC	Completed	
	Payment of compensation and entitlements,	PLN LAC	Completed	
	Implementation of income restoration program. Women will be prioritized in capacity building for farming or other program which is appropriate with their need.	PLN LAC, PLN UIP Kalimantan Bagian Barat or PLN Regional Office of West Kalimantan	In Progress, for 1 st batch has been implemented in the form distribution and training of chicken husbandary (Sept 2018)	
	Receipt and resolution of grievances of APs/AHs	PLN LAC PLN UIP Kalimantan Bagian Barat Local Government, Selected Contractor	Completed	
	Internal Monitoring RCCP implementation	PLN UIP, PIC	In Progress	
Monitoring of RP implementation (internal and external) Monitoring and evaluation		PLN UIP Kalimantan Bagian Barat and Independent Monitoring Agency	EMA for 1 st phase is already completed, and the contract of external consultant is already finished. External consultant's contract for EMA 2 nd phase still in process, scheduled to be implemented in March	

Project Process Stage	Activities	Responsible Institution	Remarks
			- July 2019.
			Final external
			monitoring report
			need to be submitted
			in August 2019.

4.3. Disclosure

- 127. Copies of project information booklet (PIB) in the form of leaflet, in Bahasa, has been given to the APs/AHs and relevant stakeholders in December 2017 following the submission of RCCP by PLN to ADB. This project leaflet contains information related to scope of the Tayan - Sanggau - Sekadau project, project proponents, entitlements for affected people, grievance and redress mechanism, contract person and other information as stated in Appendix 10. This copy of project information leaflet also can be found in Appendix 10. PLN UPP KITRING KBB 2 and sub district Officials ensure that the leaflets are distributed to the APs/AHs and can be accessed in public locations, such as the village or sub district office. The documentation can be seen in Appendix 10. The project information leaflet include the following information: (i) description of the 150 kV Tayan-Sanggau-Sekadau Transmission Line Project and its adverse social impacts, (ii) measures to avoid impacts, including entitlements of APs/AHs, measures to minimize, and mechanism to compensate (iii) consultation and grievance procedures, (iv) schedule of safeguard activities (consultations for compensation, delivery of compensation, and assistance), (v) schedule of assets clearing and civil works (vi) officials name to contact for any queries or raise complaint on the project and social safeguards; (vi) monitoring.
- 128. The disclosure of updated RCCP also will be given in the form of leaflet and distributed to the APs/AHs. It's also translated in Bahasa and will be available in the relevant local government. The copies of project information leaflet will include the information of the previous one including RoW.
- 129. At the site level, disclosure is done through the district together with PLN UIP Kalimantan Bagian Barat. They have announced the location confirmed for development in the Public Interest. The announcement is intended to notify the community that the relevant location is affected by development in the public interest. Location assignment permissions for 150 kV Sekadau substations and the tower bases located in Sekadau Regency are based on Regent of Sekadau Decree No.671.32/133/UMUM/2016 dated March 1, 2016. The location assignment for 150 kV Sanggau substation is based on Regent of Sanggau Decree No.19 Year 2015 dated January 16, 2015 and tower bases located in Sanggau Regency is based on Regent of Sanggau decree No.250 Year 2014, please see Appendix 11 for detail information.
- 130. Consultation with AHs has been done during RCCP implementation or resettlement. Particular attention has been given to poor and other vulnerable AHs. All consultation and disclosure activities have been properly documented: minutes of meetings, photos, and attendance sheets have been prepared and recorded.
- 131. The RCCP has been posted in ADB Website in August 2016 and PLN Website in May 2018. The updated RCCP also will be posted in the ADB and PLN website.

5. GRIEVANCE REDRESS MECHANISM

132. Grievances related to any aspects of the Project will be handled through negotiation with aim to achieve consensus. The procedures to be followed in resolving complaints on the affected assets, the level of compensation offered by the government, and other aspects of the projects are outlined below. All administrative channels, such as the Office of the Camat and the Office of the Regent, will be utilized to resolve any complaints before elevated to the court of law for adjudication. It will be free of charge for the APs in relation with the grievance redress mechanism.

5.1. Related to Location of Project Component

- a. An AP/AH may raise any complaint to the District Head or Head of PLN UIP Kalimantan Bagian Barat
- b. The District Head establishes a team to assess the complaint. If the complaint is meritorious, the District Head will ask PLN General Manager/Head of Unit to find another location for that component of the project. However, if the complaint is not acceptable, the team will recommend the District to reaffirm the project location determination/permit.
- c. If the aggrieved party is not satisfied with the decision of the District Head, she/he may go to the court for adjudication.

5.2. Related to Inventory of Affected Assets

- a. An aggrieved AP/AH may appeal the result of the DMS on affected land and other assets found on the affected land (buildings, plants, other objects) to PLN Land Acquisition Committee (PLN LAC)
- b. PLN LAC within 14 days will verify the results of the DMS on affected assets of the AH and will make necessary revisions/corrections as needed.
- c. If the grievance/complaint concerns ownership/control of land and/or other assets found on the affected land, PLN LAC will seek a settlement with the contending parties through consultation.
- d. If the consultation does not reach any consent/agreement, PLN LAC will advise the APs to resolve the case through court.
- e. PLN LAC keeps the record of complaints and disputes handled.

5.3. Related to Compensation

- a. An aggrieved AP/AH may bring the grievance/complaint in regards to compensation rates directly to PLN LAC or through the Customary or Village leader who will submit it to the PLN LAC either in writing or verbally. PLN LAC, together with the Customary or Village leader, will attempt to seek consensus to achieve an acceptable settlement with the aggrieved AP/AH specifically
- b. An AP/AH who is not satisfied with the amount of compensation initially offered by PLN LAC has a chance within 90 days to come into agreement with PLN LAC on the level of compensation for affected assets, including income loss for adversely affected business or employment.
- c. If negotiation on compensation with PLN LAC fails, the PLN LAC shall suggest the Board of Director or any official one level below the Board of Directors or the General Manager / Head of Unit to relocate the development plan to another location or the PLN LAC shall request the Board of Directors or any official one

level below the Board of Directors or the General Manager / Head of Unit to agree with the amount of compensation demanded by the APs/AHs.

5.4. Related to Other Aspects of the Project

- a. An aggrieved AP/AH may bring any complaint directly to PLN project office or contractor or to the "Jaya" customary leader in the sub village level, "Temenggung" customary leader in the village level who will bring the grievance to the Contractor or PLN Office in the first instance to reach resolution. The PLN/contractor/customary leaders have 14 days to settle the complaints.
- b. If the grievance cannot be resolved, the AP/AHs may convey the grievance to "Pati" customary community in the sub district level or bring to head of sub district to get resolution. The "Pati" or sub district has 14 days to settle the complaint.
- c. If the grievance cannot be resolved, the AP/AH may convey the grievance to the district office for resolution. The district office has 14 days to settle the complaint.
- d. If the aggrieved AP/AH is not satisfied with the action taken on the complaint, she/he may file the complaint to the court for final adjudication.

133. A neighborhood raised an issue that affected trees/crops owned by AHs (T10, T11, and T13) in Tayan – Sanggau section. They have been identified and compensated by PLN due to the shifting of tower location. The land owners of T.10, T.11 and T.13 have signed the land-rights conveyance letter of tower plots in Tayan-Sanggau transmission line. The handover process of each land is known by corroborating witness, namely the village head and the village secretary of Cempedak Village, and also known by the subdistrict head of Tayan Hilir. Other obstacles occur during land acquisition process, specifically when a land owner asks for higher price than the value set by appraiser and wants all his surrounded land to be bought. LAC and District conduct several consultations and reaffirm the price should be based on valuation. The owner of several land for tower bases couldn't be found, therefore PLN will propose letter of agreement to get the construction work permission and also the PLN's steps to re-announce the land ownership. The agreement will be implemented with the Muspika, Muspida and TP4D. For the land owner who doesn't want to release his land, although several consultations have been conducted by LAC and local government, the compensation has been deposited to the local court. The list of several grievances and redress actions taken is summarized below.

Table 5.1 Grievance and Redress Action

No.	Tower	Name	Width (m ²)	Grievance	Handling	Remark
1.	T.10 (P6)	Alimin	225	Shifting of tower location	Compensated by PLN	Closed on March 11, 2016
2.	T.11 (P6)	Awi	225	Shifting of tower location	Compensated by PLN	Closed March 10, 2016
3.	T.13 (P6)	Herman E.	400	Shifting of tower location	Compensated by PLN	Closed October 20, 2016

No.	Tower	Name	Width (m ²)	Grievance	Handling	Remark
4.	T.9 (P6)	Unknown	225	Local court refused the compensat ion money consigned	PLN will propose letter of agreement to get the construction work permission and also the PLN's steps	Open
5.	T.62 (P7)	owner	225	there, because the land owner is unknown	to re-announce the land ownership. The agreement will be implemented with the Muspika, Muspida and TP4D	Open
6.	T.24 (P7)	Sosimus	225	Rejecting of tower location	 Compensation money was consigned to the court by PLN AP request for appeal Process in provincial court, PLN withdraws the compensation money from the court 	Open
7.	T.130R (P7)	Sanusi M.Tarmo	225	Inappropria te value of the appraisal with actual condition	Revision of inventory and appraisal values	Closed on Sep 2018
8.	T.136R (P7)	Pemda	225	The land will be	The tower location	Open
9.	T.137R (P7)	Pemda	225	used as the sport facility.	will be shifted	Open
10.	T.149 R (P7)	Parman	225	Asked for higher price and wanted all surrounded land bought	PLN & District reaffirm the price should be based on valuation	Closed

6. LEGAL AND POLICY FRAMEWORK

6.1 Relevant Laws and Regulations in Indonesia

134. Key national laws, regulations, and guidelines that apply to land acquisition are Law of the Republic of Indonesia Number 2 of 2012 concerning Land Acquisition for the Development in the Public Interest and its implementing regulations that include Indonesian Presidential Decree No. 71/2012 and its amendments. For the implementation stage, Chairman of National Land Agency Guidelines No. 5/2012 concerning Land Acquisition for Development in Public Interest and Ministry of Agrarian and Spatial Planning No. 6/2015 concerning amendment of the Chairman of National Land Agency Guidelines No. 5/2012 will apply.

135. Law No.2/2012 provides a clear procedure and time frame for land acquisition involving all stakeholders. The implementation of land acquisition considers balance between development interest and the interests of the community and by way of giving appropriate and equitable compensation. The objective of land acquisition is to make land available to improve the welfare and the prosperity of the people, state, and society by ensuring the legal interest of the entitled parties. Emphasis is put on principles of humanity, democratic process and equitability.

136. Based on Law No.2/2012, the government should undertake land acquisition by involving all entitled holders and concerned parties. The entitled parties shall be those who control or own the object of the land acquisition, inter alia: a. the holders of land rights; b. the holders of land rights to manage; c. *nadzir* for the *wakaf* land; d. the owners of former customary rights secured land; e. indigenous people/customary communities; f. the parties occupying state land in good faith; g. land tenure holders; and/or h. the owners of buildings, plants or other objects related to the land. The object of land acquisition includes; (i) land; (ii) above ground and underground space; (iii) plants; (iii) buildings; (iv) objects related to land; and (v) other appraisable loss that include non-physical loss such as loss of business, loss of job, cost of change of location, cost of change of profession, and loss of the remaining property (residual property that is no longer viable).

137. Land acquisition for the transmission line will be conducted through negotiated land acquisition (land acquisition beyond the assignment from the government) as land plots to be acquired for towers are less than 5 ha. Similarly, land for Sanggau and Sekadau substation is not more than 5 ha. As stated in President of the Republic of Indonesia Regulation No. 40/2014 on amendment of Presidential Regulation No 71/212 and Presidential Regulation No. 4/2016 on the Acceleration of Electricity Infrastructure Development article 34 (1), land acquisition for public interest with size less than 5 hectares can be implemented directly by the agency requiring land with the land rights holders, by the sale or exchange or other means agreed upon by both parties. As mentioned in PLN Decree No 0344.P/DIR/2016, the land acquisition implementation will be handled by the PLN Land Acquisition Committee appointed by General Manager or Director and location permit (Penetapan Lokasi) will be required prior to land acquisition. 138. Presidential Regulation No. 4/2016 and PLN Decree 2016 said that determination of amount of compensation for these land acquisition process will be assessed by Independent Appraisal. The Presidential Regulation No. 4/2016 further state that if the

further state that in the event the required land acquisition cannot be obtained, PLN can make lease, use a loan, or cooperate with owners of land based on the agreement of both parties. Deposit of compensation to local courts will be done when consultation on compensation did not reach consensus, referring to Supreme Court Regulation No. 3 /2016. The Presidential Regulation No. 4, in line with Presidential Decree No. 148 of 2015 on the fourth amendment of Presidential Decree 71 of 2012, basically states for changing the allocation of time at each stage of land acquisition to be faster, including time of handling objections of local community surrounding the project by the governor and time for location determination by Governor/Regent.

139. Other relevant laws, regulations and provisions are:

- i. Related to Indigenous People (IP) / Customary / Adat land:
 - a) Law No. 5/1960 concerning Basic Agrarian Affairs acknowledges customary rights of Indigenous Peoples.
 - b) Law No. 23/2014 concerning Local Government establishes state respect of customary and traditional rights and laws, devolves authority to village or customary governance systems and empowers them to promulgate customary village rules that may affect projects e.g. levying land transaction tax.
 - c) Presidential Decree No. 111/1999. The Presidential Decree No. 111/1999 sets the criteria of identifying indigenous persons (IPs) as follows: (i) in form of small, closed and homogenous community; (ii) social infrastructure supported by familial relationship; (iii) in general geographically remote and relatively difficult to reach; (iv) in general live with subsistence economy; (v) its equipment and technology are simple; (vi) relatively high dependency to local environment and natural resources; and (viii) limited access of social, economic, and political service
 - d) Law No. 39 of 1999 on Human Rights. Article 6 Para. 1: "In the framework of maintenance of human rights, the differences in and the needs of adat law communities are observed and protected by the law of society and Government." Article 6 Para. 2: "Cultural identity of Costumary law communities, including rights to ulayat land, is protected in line with the evolvement of time."
 - e) Regulation No. 5 of 1999 by the State Minister of Agrarian Affairs/Chairman of National Land Agency provides guidance for resolution of problems within ulayat lands of adat law communities.
 - f) Constitutional Court Decision (MK) canceled the provisions of the Forestry Law No. 41/1999 on indigenous forests, which establishes that indigenous forest is the state's forest in the area of indigenous people. This Decision excluded indigenous forest within the state forest.
 - g) Ministry Agraria and Spatial/Head of BPN No. 9/2015 on the Procedures for Establishing Communal Rights Over Land of Customary Communities and the Communities within a Particular Area.
- ii. Related to compensation and Improvement of living standards:
 - a) Law No.11 /2005 on the Ratification of the International Covenant on Economic, Social and Cultural Rights. This Act protects people rights of economy, social, and culture including right to live descent and protection of culture. As stated in Article 11 of the Convention, the state recognizes the right of everyone to an adequate standard of living for themselves and their family, which includes adequate food, clothing and housing, and to the continuous improvement of living conditions. The State will take appropriate steps to ensure the realization of this right, recognizing

- the importance of international cooperation based on free consent as proclaimed previously.
- b) Head of BPN Regulation No. 1/2010 on Standard of Land Service and Regulation regulate the time frame for certification of the remaining land after compensation payment.
- c) Presidential Decree No. 34/2003 on National Policy on Land- regulates authorities of national and local governments on land. It stipulates that the authorities of local government on land include; i) undertake land acquisition for development; ii) provide compensation and allowance (santunan) for land acquisition.
- d) Law No. 23/2014 about Local Government which set state activities that must be conducted by the provincial government and district / municipality government that are related to non-basic services. including land issues.
- e) Indonesia Valuation Standards 306 (SPI 306) on the Assessment of Land Acquisition for Development for the Public Interest. The Indonesia Professional Appraisers Society (MAPPI) formulated the standards by adopting the development of international standards (IVS 2011). Standards 306 provide guidelines for assessment of land acquisition object for compensation in land acquisition for development in the public interest. Assessment includes adequate replacement value of property and land. Assessment standards are also associated with other standards, such as scope of assignment, land property and structures valuation, farmland property valuation, valuation of property with particular business, business valuation, and inspection of cases under consideration.

iii. Related to Energy and Electricity

- a) Law No. 30/2009 on Electricity. The law states that the use of land by the electric power supply concession holder shall be conducted by providing compensation for affected land, buildings, and plants in accordance with the provisions of the prevailing law. Compensation is also provided to state land users.
- b) Presidential Regulation No. 4 of 2016 on Acceleration of Infrastructure Development for Electricity. The regulation sets the government's efforts in supporting the accelerated development of electricity power infrastructure, including implementation support, ease of financing and the ease of obtaining permits. This regulation also regulate that for negotiated land acquisition (land acquisition less than 5 Ha), if the AHs doesn't agree with the amount of compensation which was appraised by the appraiser, PLN may set the value of the sale and purchase agreed by both parties based on the cost and benefit analysis with regard to good governance
- c) The Ministry of Energy and Mineral Resources Decree No. 38/2013 Regarding Compensation of Assets in the ROW of Transmission Line establishes procedures, mechanisms, and formulas for compensation. Compensation is provided for restrictions on the use of land and other assets as it is used indirectly for electricity development. Compensation for restriction of land and building will be provided in the form of easement fee in the amount of 15% of the value appraised by independent appraisal. Compensation for trees is based on valuation approaches according to Indonesia Valuation Standards. Only tall trees

- that have potentially more than 5 m height under the ROW of transmission line will be compensated
- d) Director of PLN Decree No. 0344.P/DIR/2016 Concerning Land Acquisition in PLN. Land acquisition for development in the public interest consists of land acquisition of no more than 5 hectares and more than 5 hectares. Acquisition of land no more than 5 ha can be done directly by the PLN by means of i) the release of land use ii "buying and selling iii) exchange, or iv) other ways agreed by the parties. This land acquisition does not require location determination and is reported to the local land agency. Land acquisition which is not for development in the public interest, including procurement of land for construction of offices, warehouses, housing, etc.

iv. Related to Vulnerability and Severity Assistance:

- a) The Law No. 11/2009 on Social Welfare and its implementing regulation Ministry of Social Welfare Decree No. 39 / 2012 on Delivery of Welfare.
- b) Law No. 39/1999 On Human Rights (Article 5, elucidation), describes vulnerable groups which includes the elderly, children, the poor, pregnant women and people with disabilities. They have the right to receive more treatment and protection with regard to their specificity.
- c) Vulnerable / severely affected people are identified as early as possible through the Social Impact Assessment of AMDAL as referred to in the Environmental Law No. 32/2009 on Environmental Protection and Management.

v. Related to Tax Incentive:

- a) Income Tax Rate of Land and / or Building ownership transfer.
- b) Basic Law: Government regulation (PP) No. 48 / 1994 jo; PP. 27 / 1996 jo; PP. 79/ 1999 jo; PP. 71 / 2008. On the Third Amendment to Government Regulation No. 48/ 1994.

6.2 ADB Safeguards Policy Statement of 2009

- 140. ADB is committed to ensure the social and environmental sustainability of projects it supports. The goal of ADB Safeguards Policy Statement (2009) is accordingly to promote sustainability of project outcomes through protecting the environment and people from potential adverse impacts of projects.
- 141. The objectives of the ADB social safeguards policy are to (i) avoid involuntary resettlement whenever possible; (ii) minimize involuntary resettlement by exploring project and design alternatives; (iii) enhance, or at least restore, the livelihoods of all displaced and vulnerable persons in real terms relative to pre-project levels; and (iv) improve the standards of living of the displaced poor and other vulnerable groups. The policy indicates four important elements in involuntary resettlement:
 - i. Avoid the need for involuntary resettlement by exploring project and design alternatives;
 - ii. If avoidance is not possible, compensate for lost assets and loss of livelihood and income of displaced / affected population so that their livelihood will be enhanced or at least equal or restored to the pre-project level;
- iii. Assist in relocation, including provision of relocation sites, with appropriate facilities and services; and,
- iv. Enhance the living standards of the poor and other vulnerable affected / displaced groups.

142. The absence of legal title to land cannot be considered as an obstacle to compensation for non-land assets and rehabilitation privileges per ADB Policy. All persons affected by the Project, especially the poor, landless, and semi-landless persons shall be included in the compensation, resettlement, and rehabilitation package. APs and/or AHs, whichever is deemed applicable, who are unable to demonstrate a legal or recognizable claim to the land being acquired will be eligible for compensation with respect to non-land assets only, and not the land itself. They will however be provided with other benefits and allowances as provided to other APs. The principles on involuntary resettlement are stated in the ADB SPS 2009 Appendix 2.

6.3 ADB Safeguards Policy on Indigenous People

- 143. Indigenous people's safeguards are one of the ADB's three key safeguards areas, the other two being the environmental safeguards and the involuntary resettlement safeguards.
- 144. For operational purposes, the term Indigenous Peoples is used in a generic sense to refer to a distinct, vulnerable, social and cultural group possessing the following characteristics in varying degrees: (i) self-identification as members of a distinct indigenous cultural group and recognition of this identity by others; (ii) collective attachment to geographically distinct habitats or ancestral territories in the project area and to the natural resources in these habitats and territories; (iii) customary cultural, economic, social, or political institutions that are separated from those of the dominant society and culture; and (iv) a distinct language, often different from the official language of the country or region. In considering these characteristics, national legislation, customary law, and any international conventions to which the country is a party of will be taken into account.
- 145. The objective of the Indigenous Peoples Safeguards is to design and implement projects in a way that fosters full respect for indigenous people's identity, dignity, human rights, livelihood systems, and cultural uniqueness as defined by the indigenous peoples themselves so that they (i) receive culturally appropriate social and economic benefits, (ii) do not suffer adverse impacts as a result of the projects, and (iii) can participate actively in the projects that affect them.
- 146. The Indigenous Peoples safeguards are triggered if a project directly or indirectly affects the dignity, human rights, livelihood systems, or culture of Indigenous Peoples or affects the territories or natural or cultural resources that Indigenous Peoples own, use, occupy, or claim as an ancestral domain or asset.
- 147. The ADB Policy on Gender and Development (2006) adopts gender mainstreaming as a key strategy for promoting gender equity, and for ensuring participation of women and that their needs are explicitly addressed in the decision-making process for development activities. The new safeguard policy also reiterates the importance of including gender issues in the preparation of safeguards documents at all stages to ensure that gender concerns are incorporated, including gender-specific consultation and information disclosure. This includes special attention to guarantee women's assets, property, and land-use rights and restoration/improvement of their living standards; and to ensure that women will receive project benefits.
- 148. Another policy that has bearing on resettlement planning and implementation is the Public Communications Policy (2011) that seeks to encourage the participation and understanding of people and other stakeholders affected by ADB-assisted activities.

Information on ADB-funded projects should start early in the resettlement preparation phase and continue throughout all stages in order to facilitate dialogue with affected people and other stakeholders. ADB's Public Communications Policy (2011) also requires timely disclosure of key project information to the general public and project stakeholders, including women, the poor and other vulnerable groups in a manner, form and language(s) accessible to them and in an accessible place. Information to be disclosed includes the scope of land acquisition, compensation and rehabilitation policy and measures that will be taken to restore the living standards of APs to at least pre-project level.

6.4 Gaps Analysis and Project Principles

149. The Land Acquisition Law No. 2/2012 and its implementing rules and regulations approximately (in accordance) harmonize with the ADB SPS of 2009. The new law grants persons with no legal title over the land they occupy or utilize entitlement to compensation for improvements found thereon, including compensation for job and business losses, moving cost, etc. A land acquisition plan also needs to be prepared by the agency requiring land. People affected by land acquisition are consulted and their complaints are heard and resolved in the most expeditious way during the planning and implementation of land acquisition.

150. The PLN Decree 2016 is prepared in line with the land acquisition law. There are still some gaps between the new Land Acquisition Law of Indonesia/PLN Decree 2016 and ADB's SPS, but the gap has been bridged by the provisions of other relevant laws. The main gap is the provision of livelihood recovery programs for severely affected people and vulnerable groups to ensure that their lives will not be worse off due to the project, and relocation assistance for physically displaced residents as well as transition allowance.

151. Comparison of ADB SPS 2009 and the legislation of Indonesian government and PLN Decree 2016 are presented in Table 6.1 below

Table 6.1 Comparison ADB SPS and Gol Regulation

³ Compensation will be based on i) the market value; ii) transaction costs; iii) accrued interest; iv) transition costs and repairs; v) other applicable payments.

PRINCIPLES	INDONESIAN REGULATIONS: Law No 2/2012 and Implementing Regulations and other relevant law and regulations. PLN Decree 2016	ADB POLICY	PROJECT POLICY
	Environmental Permits		implemented by PLN UIP Kalimantan Bagian Barat or PLN Regional Office of West Kalimantan
Public disclosure	Preparation by the acquiring institution of the land acquisition plan, the planning of land acquisition by the Office of the Governor, and the implementation of land acquisition by BPN will be carried out with the holding of public meetings and consultations, and the results of surveys and appraisal of affected assets will be disclosed to the public.	The draft and agreed RCCP during the PPTA, and the draft and agreed updated RCCP during project implementation will be disclosed to the APs/AHs and other stakeholders in accessible forms, languages and places. The same will be posted on the ADB website.	Pre-IOL and post-IOL consultations will be held with stakeholders and the entitled parties. The approved RCCP will be disclosed to the entitled parties and other stakeholders in accessible forms, languages and places. The same will be posted on the ADB website. Monitoring reports during Project implementation will likewise be posted on the ADB website.
Monitoring of Project Implementation	Government business procedures do require monitoring of the progress of land acquisition, and its impact to entitled parties	ADB requires monitoring of RCCP implementation by the executing agency for resettlement Category B projects, and by an independent external organization for resettlement Category A projects	Due to development of 150 kV Tayan-Sanggau-Sekadau Transmission Line is part of 150 kV Transmission Line Project Strengthening West Borneo Power Grid project, it was Category A for resettlement. External monitoring of resettlement implementation is required. English versions of RCCP implementation monitoring and evaluation reports will be submitted to the ADB.

6.5 Principles of Land Acquisition and Resettlement Policy for the Project

- 152. The Policy on land acquisition and resettlement harmonizes with relevant Indonesian laws and procedures with those of the ADB-Safeguards Policy Statement (SPS) 2009. The selected sub projects will avoid or minimize involuntary resettlement wherever possible by exploring project and design alternatives. If unavoidable, efforts to enhance or at least restore the livelihoods of all entitled parties to pre-project levels and to improve the standards of living of the displaced poor and other vulnerable groups will be made.
- 153. Based on the above legal framework and equivalence gap analysis, the involuntary resettlement objective and policy principles are set as follow; involuntary resettlement and impacts on land, structures and other fixed assets will be minimized wherever possible by exploring all alternative options.
- a) Screen subproject components during early stages to identify involuntary resettlement impacts and risks. These impacts and risks will be identified through

- IOL/DMS and Socio Economic Surveys and the results of the surveys will be utilized in resettlement planning and gender analysis.
- b) Improve, if not, restore the livelihoods of affected people through various income restoration strategies and prompt replacement of assets. Compensation will be provided at replacement cost based on the valuation by Independent Appraisal at the time of payment of compensation. PLN may set the value of the sale and purchase agreed by both parties based on the cost and benefit analysis with regard to good governance if the AHs doesn't agree with the amount of compensation which was appraised by the appraiser.
- c) AHs who have legal rights to land or recognized as legal right owners are entitled for land and non-land assets and assistances (such as relocation assistances and transitional supports if there is any physical displacement), while AHs who lost the land that they occupy and have neither legal rights nor recognizable claims to such land are entitled for lost assets and income restoration program. Meaningful consultation will be carried out with APs/AHs and concerned groups to ensure their participation during Project planning and implementation. The comments and suggestions of the APs/AHs and communities will be taken into account.
- d) Establish a grievance redress mechanism to receive and facilitate resolution of the APs/AHs' concerns. Improve, if not restore, the standards of living of APs/AHs through an appropriate income restoration program and the prompt replacement of acquired assets.
- e) Provide special assistance to the poor and vulnerable APs/AHs, such as legal and affordable access to land and resources, appropriate income sources and affordable access to decent housing.
- f) A set of procedures on transparency and consistency will be adopted for land acquisition through negotiated settlement to ensure that APs/AHs will be able to maintain the same or better socioeconomic status.
- g) The draft and final Resettlement Customary Community Plan (RCCP), and any subsequent updated version, will be disclosed to the APs/AHs and indigenous households in a form and language understandable to them prior to submission to ADB.
- h) Resettlement identification, planning and monitoring will ensure that gender concerns are incorporated.
- i) Special measures will be incorporated in the RCCP to protect socially and economically vulnerable APs/AHs, such as those considered as masyarakat adat (indigenous people); households headed by women, children, the disabled, and the elderly; landless and those living below the poverty line.
- j) Existing cultural and religious practices will be respected and, to the maximum practical extent, preserved. This includes the host population.
- k) Culturally appropriate and gender sensitive monitoring and evaluation will be carried out in various stages of the project and set in place as part of the resettlement management system. Monitoring and evaluation of land acquisition and resettlement including income rehabilitation program and impact of the project to the APs social and economic life will be conducted.
- I) Voluntary donation will not be applied for any land and non-land assets.
- m) EA (PLN Headquarter) will not issue notice to proceed for any civil works contract (or will not allow any construction activities) until there is confirmation that (i) payment of

- compensation has been fully disbursed to Affected Persons (APs) and rehabilitation measures are in place as per project entitlements in the agreed RCCP; and (ii) Income restoration measures must also be in place but necessarily completed, as these may be ongoing activities.
- n) For any unanticipated involuntary resettlement impact identified during project implementation or with other subprojects that may be identified later, compensation and other entitlements shall follow the policies set-forth in this RCCP.

6.6 Land Acquisition Process

154. Land acquisition for the transmission line and substations will be conducted through the negotiated land acquisition or land acquisition mechanism beyond the assignment from the government. As per PLN Decree on Compensation for Land Acquisition 2016, land acquisition beyond the assignment from the government shall be undertaken to the following steps;

- i. Planning of land acquisition. PLN Unit prepares a Land Acquisition Plan (LAP) Document based on initial survey of project planning. The LAP should be endorsed by General Manager/PLN Unit Head.
- ii. Preparation of land acquisition include forming a land acquisition and compensation Team (LAC) consisting 7 members (general, legal, financial, technical, and other representatives), initial data collection and consultations for project location determination, and appointing appraisers.
- iii. Implementation of land acquisition includes ADB inventory identification of land acquisition objects, valuation of compensation, consultations on compensation, payment of compensation, and handover of acquired land. The detailed procedure of land acquisition implementation will include;
 - a) All negotiations with the landowners and users will be carried out in an accessible location, in an open and consultative manner without any coercion and with sufficient time for consideration of offers.
 - b) Adequate and fair price for land and/or other assets will be offered. Owners are free to refuse to sell their land or to refuse the offers of PLN LAC or implementing agency. If negotiations fail, PLN LAC will try to renegotiate over a period of 90 days. After second consultation the AHs still rejected amount of compensation the PLN LAC will proposes to move the location or propose for determination of compensation as requested by AHs to the Board Director. Calculation of the propose compensation is based on the cost and benefit analysis
 - c) In case there was an agreement between the owners of the assets and the PLN LAC, then the PLN LAC will submit a determination of the amount of compensation based on the estimated price of independent appraisal or based on cost analysis in the form of nominative list. The nominative list will be submitted to General Manager for approval.
 - d) The negotiated amount will be paid immediately to landowners after all necessary documents required for the land acquisition processes have been completed by land owners.
 - e) At the time of compensation payment, AHs are required to conduct relinquishment of rights and submit evidence of ownership of land acquisition object to PLN LAC

- f) An independent monitoring agency who is not involved in the project will record and validate negotiation process and ensure that the process is transparent and the bargaining position of the parties involved in the negotiations is equal.
- g) Negotiation and payment of compensation will be paid as soon as the independent appraisal is completed assessing the tower or substation unit price, without having to wait for assessment of all affected asset is completed. This is done by PLN to ensure that the land is acquired swiftly and timely.
- iv. Handover of acquired land acquisition. The LAC shall request the owner to sign a Statement Letter regarding the relinquishment of the right of land and/or building and/or plants and/or other things related to the land. The land owners then give the original documents regarding the ownership of the land, a statement acknowledged by local Head of Village/Lurah which states that such land is truly owned by the owner and as well as the Deeds related to the relinquishment or handover of the land.
- 155. **PLN Land Acquisition Committee** established by decision of the General Manager of by PLN UIP Kalimantan Bagian Barat. The LAC team must be an odd number, consist of representation of the several division / unit in the PLN e.g. general unit, law unit, financial unit, technical unit and other elements. If necessary the LAC Team could involve agencies outside of PLN. The LAC Team 150 kV Tayan-Sanggau-Sekadau Transmission Line for transmission line purposes entirely come from PLN in coordination with BPN in the related District. Head of LAC Team and the secretary are from by PLN UIP Kalimantan Bagian Barat, while the team members are from PLN UPP KITRING KBB 2.
- 156. **Compensation for customary land**, negotiation/consultation to get agreement on the replacement for affected customary land should be conducted with Customary Leaders facilitated by Village Leader. Customary Leader will represent the customary community to received cash compensation, and then he will consult with all members of the clan on how the money will be used.

6.7 Measures to Address Gender Issues

- 157. The ADB Policy on Gender and Development (2006) adopts gender mainstreaming as a key strategy for promoting gender equity, and for ensuring participation of women and that their needs are explicitly addressed in the decision-making process for development activities. The new safeguard policy also reiterates the importance of including gender issues in the preparation of safeguards documents at all stages to ensure that gender concerns are incorporated, including gender-specific consultation and information disclosure. This includes special attention to guarantee women's assets, property, and land-use rights and restoration/improvement of their living standards; and to ensure that women will receive project benefits.
- 158. The measures to address gender issues are the following:
 - a. In conducting the Inventory of Losses and Detailed Measurement Survey, consultations on resettlement activities, both women and men have been participated in the discussions
 - b. Both husband and wife were invited to be present to receive the compensation and other allowances due to the household for affected assets
 - c. Women were invited to consultations during assessment to determine income restoration program and implementation of RCCP

- d. Women were given equal chance in getting hired for unskilled labor (such as land clearing labor or a cook for construction worker) and to receive equal remuneration for the same work as the men.
- e. Disaggregated monitoring indicators by gender will be developed for monitoring social benefits, economic opportunities, livelihood, and resettlement activities.
- f. Women have been prioritized in Income Restoration Program to be provided during RCCP implementation to vulnerable/severely AHs

7. PROJECT ENTITLEMENTS, ASSISTANCE and BENEFICIAL MEASURES

7.1. Eligibility and Compensation

159. **Eligibility.** The cut-off-date of eligibility refers to date when the Inventory of Losses census of AHs was carried out by PLN. The cut-off-date will be varied for each affected villages in November 2015 to January 2016. The date has to be disclosed to each affected village by PLN in close coordination with village local government and sub districts. The cut-off date sets the time limits to determine eligibility of persons living and/or assets or interests inside the project areas. If they are adversely affected, they will be entitled to compensation for their affected assets, including rehabilitation measures, as needed, sufficient to assist them to improve, or at least maintain, their pre-project living standards, income-earning capacity and production levels. Those who encroach into the project area, or any of its subprojects, after the cut-off date will not be entitled to compensation or any other assistance.

160. **Compensation.** Entitlement matrix outlined in Table 7.1 shows type of losses, eligible persons, entitlements, and implementation issues. The resettlement entitlements are based on the resettlement impacts identified during the IOL conducted in November – December 2015 as well as consultations with APs and other concerned stakeholders to ensure that losses are compensated and restored, if not improved. No construction is to be commenced prior to implementation of the compensation payment to the lost assets as per the updated RCCP agreed by ADB.

1	Temporary or permanent impacts due to construction activities	For those who have formal legal rights (certificate) or those whose claim on land is recognized as a full right	For lease payments of the affected land by the contractor based on the applicable rental fees and agreements with landowners. For temporary impact on productive land, the AH may choose: (1) cost of the rental valued to be not less than the net income that will be generated from productive affected land; Compensation for non-land assets acquired (trees / plants, structure) permanently affected will be compensated at replacement cost Land will be restored to pre-project conditions or even better after the construction is completed	The contractors.	30-60 days prior notice given to the owner of the land before it is used temporarily by contractors. This provision should be stipulated in the contract / agreement with civil works contractors	
		Those who do not have legal rights and entitlements that can be recognized as full ownership	There is no land rental costs during the period of impact Land will be restored as it was before the project, or even better.	The Contractor		
	F. Other Loss		[A L P. J			
1	Loss of emotional attachment to assets (solatium)	Entitled party who loses emotional bond with the affected assets (land, structures, and plants)	Additional compensation of 10% - 30% of total compensation for physical assets affected.	PLN UIP Kalimantan Bagian Barat allocated funds for solatium fee PLN LAC delivers compensation Independent Appraisal: conducts valuation of the assets.	Percentage of emotional loss compensation will be based on the independent appraisal assessment	

No	Impact/Loss Category	Entitled Person	Project entitlement	Executing Agency/ Fund Resources	Remark⁴
2	Transaction Cost	The entitled party who lost land and non-land assets	Allowance to cover administration cost, renewal of land ownership (ownership name transfer) for residual land, land clearing ¹⁴	PLN UIP Kalimantan Bagian Barat has allocated funds for compensation of affected crops PLN Land Acquisition Implementing Team Independent Appraisal: conducts appraisal on the appropriate transaction costs	Calculations are based on DMS and SES
3	Loss of the resource base (high risk of impoverish ment)	Entitled Party who lost of 10% or more of total assets or earning revenue sources; Entitled Party, poor and vulnerable 15, regardless of the severity of the impact	Participate in Income restoration program (IRP) Priority for opportunities of project related employment, where qualified.	PLN corporate social responsibility (CSR) program PLN UIP Kalimantan Bagian Barat or PLN Regional Office of West Kalimantan integrated in nonstructural components of the program. The Contractor: work related project	IRP already given for 1st batch in Sept 2018 in the form of chicken husbandry and training of it. The 2nd and 3rd batch will be given after the monitoring of the 1st batch implementation,

7.2. Relocation/Replacement Land

161. The routes mostly cross agriculture/plantation area and do not require relocation of settlements. The land acquired for substation is also plantation/agriculture land and no structure will be affected.

7.3. Income Restoration Program and Special Attention to the Vulnerable Groups

162. Income of severely affected entitled parties and vulnerable groups will be enhanced, so that they would thoroughly benefit from the project. The income restoration and rehabilitation has been delivered by PLN UIP Kalimantan Bagian Barat through Corporate Social Responsibility (CSR) for first batch.

163. According to IOL and SES there are 11 severely AHs and 122 vulnerable AHs, and most of them (82.7%) are plantation farmer, which rely on oil palm and rubber as their primary trees, and they still have lot of remaining land to be cultivated

_

See Standard Penilaian MAPPI, SPI 306, 2013.

These are distinct groups of people who might suffer moreor face the risk of being further marginalized due to the project and specifically include: i) households that are headed by women, ii) household heads with disabilities, (iii). Indegenous peoples and iv) elderly household heads.

- 164. Based on a survey conducted by PLN UPP 2 to vulnerable people, most of them refused to be given IRP programs in the form of training and pepper seedlings. The majority of vulnerable people want an income increase by being provided chicken husbandry and training of it. Sample of the survey can be seen in Appendix 12.
- 165. A proposal of IRP for Tayan Sanggau Sekadau was submitted by UIP Kalbagbar in September 2017 and has been approved by SKOM by Letter No. 1210/STH.02.02/SKOM/2018 on March 26, 2018. IRP in the form of chicken husbandry and training will be delivered to the vulnerable groups and severely affected people, has been delivered in September 2018 for first batch and will be implemented in April 2019 and August 2019 for second and third batch respectively.
- 166. A number of 23 vulnerable affected persons have been participated in first batch, which is held in September 18, 2018 in local government office of Sekadau. PLN UIP Kalbagbar added 4 poor households surrounded the project location suggested by the local government. So a total number of 27 participants join this training of chicken husbandry program. PLN also distribute the equipment of chicken husbandry collaborate with Local Husbandry Department. Please see Appendix 12 to get more information about the implementation of 1st batch IRP.
- 167. The income restoration program has been delivered in parallel with payment of compensation, using CSR program/budget under PLN UIP Kalimantan Bagian Barat. Women will be prioritized to participate in the capacity building activities.
- 168. PLN conducted survey to get the participant perception about the program (sample of the questionnaire also can be seen in Appendix 12), all of them (100%) are satisfied with the restoration program. In the impact on income survey, 83% participants felt that their income increases, 17% participants have constant income and no one feels that their income is decreasing. Further monitoring of IRP batch 1 implementation is needed to be done to ensure the sustainability and success of the program, the monitoring scheduled on December 2018.
- 169. Transmission line project will provide job opportunities for the local communities and affected vulnerable groups. The construction of substations will absorb unskilled (no special skills) workers and the contractor can provide employment opportunities to local communities and vulnerable groups. The contractor, with the support of resettlement specialist consultant, will collaborate with the village office/village leaders to identify the type of project related jobs with no special skills and potential applicants, including affected vulnerable groups.

7.4. Unanticipated Impacts

170. If unanticipated involuntary resettlement impacts are determined during project implementation, the affected persons and households are entitled to receive project entitlements as the others, provided that they satisfy the rule on cut-off date for eligibility to project entitlements. New AHs that emerge due to changes in project design or alignment prior to or even during construction works are likewise entitled to the same entitlements as those of the other AHs. PLN shall submit these documents (updated RCCP) to ADB for disclosure on ADB's website and convey relevant information in them to the affected persons/community.

8. BUDGET AND FINANCING PLAN

171. Funds for the implementation of the RCCP are part of the Project budget. Costs have been estimated based on: (i) Appraisal for Tayan – Sanggau – Sekadau Substation (ii) Appraisal for Tayan – Sanggau – Sekadau Transmission Line (iii) Appraisal for ROW. 172. Estimation cost is intended to principally provide PLN a basis for calculating the cost of resettlement, particularly compensation for affected assets. Therefore, during the Implementation Stage of the land acquisition process, as mandated by the new Land Acquisition Law of 2012 and PLN Decree No 0344.P/DIR/2016, the PLN UIP Kalbagbar in Pontianak has been appoint a licensed property appraiser to do a detailed property appraisal of all affected assets. The results of the work of the property appraiser will be used by the PLN LAC in negotiating with AHs for the levels of compensation for their affected assets.

8.1 Procedures for flow of funds

173. The cost of resettlement (i.e., compensation and allowances) is borne solely by the PLN UIP Kalimantan Bagian Barat. The PLN LAC is tasked to deliver the compensation and allowances of the AHs.

8.2 Cost estimates and inflation adjustment

174. The PLN LAC will ensure that adjustments are made to compensation rates and to other cash entitlements to reflect current market rates. When payment of compensation is not done within six months, appraisal of unit rate should be renewed by Independent Appraisal. In case, the amount of compensation value added the prevailing interest multiplied by the difference between the current market value of the payment and market value when the assessment of unit rate was done.

8.3 Implementation, administration and contingency costs

175. The implementation costs cover the payment of allowances and per diem of concerned parties other than PLN staff who are involved in the land acquisition process. Operational cost consists of administrative costs (the costs for procuring of materials, stationery, photocopy and hearings related to land acquisition, task forces, security costs and taxes) and costs for operational services for other parties outside the PLN, which helps the process of land acquisition. Operational cost for compensation more than 10 billion is maximum 3% of the total compensation. Contingencies amounting to 15% each have been added on top of the cost of resettlement allocated for cost of socialization, consultation, licensing, measurement and others. PLN UIP Kalimantan Bagian Barat will ensure that adequate funds are made available as and when necessary for the efficient and timely implementation of resettlement.

8.4 Estimated Costs of Resettlement

176. The estimated cost of resettlement for the 150 kV Tayan-Sanggau Sekadau transmission line is estimated at Rp 153.639.684.798 and the current budget utilization is Rp 29,998,282,666 Table below provides a breakdown of the resettlement cost.

Table 8.1 Summary of Resettlement Costs

Particulars/Items	Estimated Budget (Rp)	Actual Budget (Rp)
Cash compensation for total land acquired and affected trees for 2 new substation (44,778 m²)	12,643,087,410	12,643,087,410
Cash compensation for total land area acquired for tower base (89,925 m²) Cash compensation for trees: - Small (2349 trees) - Huge (1466 trees) - Productive (2534 trees)	8,358,035,300	8,358,035,300
Cash compensation for total land area will be restricted by the transmission line ROW (2,488,525,160 m ²)		N/A
Cash compensation for structures: - House (permanent) - Farm shed (temporary)	109.002.000.000*	N/A
Compensation for tall trees restricted by transmission line ROW Compensation for crops		N/A N/A
Cost for IRP (Chicken Husbandry) and training on farming.	200,000,000	200.000.000
Sub-total (direct costs)	130,203,122,710	21.201.122.710
Cost contingencies (15% of direct costs) which includes Appraisal Team and IMA - Appraisal for substations - Appraisal for Tayan – Sanggau T/L - Appraisal for Sanggau – Sekadau T/L - Appraisal for Tayan – Sanggau T/L (ROW) - Appraisal for Sanggau – Sekadau TL (ROW) - ROW Inventory - IMA	19.530.468.407	87.208.000 402.787.000 254.386.000 1.404.000.000 756.000.000 4.802.270.000

Grand Total	153.639.684.798	29,988,282,666

^{*}SKAI (Surat Keputusan Anggaran Investasi)UIP Kalbagbar

9. INSTITUTIONAL ARRANGEMENTS AND IMPLEMENTATION

9.1 Institutional arrangement responsibilities

177. **PT PLN (Persero) Head Quarter (PLN Pusat)**, as a state-owned electric utility company, responsible for generation, transmission and distribution of electricity in Indonesia under the Ministry of Energy and Mineral Resources, will be the EA of the project and is responsible for overall coordination and administration of the project, including those related to resettlement.

178. The project implementation has been conducted by PT PLN (Persero) Unit Induk Pembangunan (UIP) Kalimantan Bagian Barat or Principal Development Project located in Pontianak, West Kalimantan. The working area of PLN UIP Kalimantan Bagian Barat covers the whole project (generation and transmission) in West Kalimantan. It has 4 units of PLN Unit Pelaksana Proyek (UPP) or the implementation project unit. Development of transmission networks in this project will be under the supervision of PLN UPP KITRING KBB 2, located in Sintang. Once constructed, management of transmission networks is handed over to Transmission Management Unit under PLN Regional office of West Kalimantan which will be responsible for all aspects of the operation and maintenance of transmission networks. Detailed tasks and responsibilities of the PIU are as follow:

- Support the LAC to conduct the DMS following final detailed design.
- Obtain authorization for land use and house/structure demolition (if any)
- Responsible for implementation of all RCCP activities
- Closely coordinate with PLN Regional Office, responsible for designing and implementing income rehabilitation assistances to APs.
- Support LAC to conduct public consultations and public disclosure.
- Support LAC in conducting negotiation for compensation with APs
- Disburse compensation payments to the APs in acknowledgment of the LAC
- Conduct internal monitoring and integrate the report to quarterly project report to be submitted to ADB for review
- Mobilize Independent Appraisal for determination of compensation

179. Land Acquisition Committee. Land acquisition for the transmission line will be conducted separately for each tower and thus the amount of land acquired in any case would be less than 5 ha. Therefore, Land acquisition for the transmission line will be carried out by PLN Land Acquisition Committee, in coordination with the BPN in the related District. Head of LAC Team and the secretary are from PLN UIP Kalimantan Bagian Barat, while the members are from UPP KITRING KBB 2. Following are tasks and responsibility of PLN LAC:

- Organize permits related to the location of the land in accordance to the regulation
- Conduct socialization on the project and its potential impact as well as conduct consultation meetings for compensation and income rehabilitation assistances.
- Conduct Detailed Measurement Survey (DMS) following the final design
- Review legal status of land or buildings that will be compensated and supporting documents, and prepare minutes of releasing of land right.
- Request and receive unit price of affected land and non-land from Independent Appraisal
- Disclose list of affected asset to the AHs
- Assist the expeditor's resolution of complaints of APs.

- Determine compensation rate and payment based on close consultations to APs
- Manage and disburse the funds with regard to compensation, assistance, and administrative cost
- Properly receive and document concerns or complaints, verbal or written, from the APs and ensure that these are brought to the attention of the General Manager, Head of Unit or Bupati/Regent or Walikota for appropriate action;
- Maintain record of all process of land acquisition, including public meetings, complaints and actions taken to address concerns and grievances
- 180. **District Government**. PLN UIP Kalimantan Bagian Barat as the project implementing agency and agency requiring land, in cooperation with the District government, referring to the land acquisition planning documents, conducts preparation of land acquisition which include: i) notification on the development plan; ii) initial location identification on the development plan; and iii) public consultation on development plan; iv) the District issued the location determination for project development. If there are objections, the regent will establish a special team to assess.
- 181. A Project Implementation Consultant (PIC) has been recruited to assist the IAs in overall Project management and to ensure construction quality. Social resettlement consultant has been recruited as part of the PIC, and responsible for assisting PLN in implementing the land acquisition in accordance with the RCCP, assisting for vulnerable APs data, conducting survey related to the APs satisfaction of compensation amount, preparing monitoring report periodically and give suggestion due to social matter in the field.

9.2 Capacity building program

182. To streamline the implementation of resettlement customary community plan, PLN Headquarter Jakarta has hired a Social Resettlement Specialist (part of Project Implementation Consultant) to assist PLN for the RCCP update, implement the RCCP, and provide a capacity building training on RCCP update and implementation to all concerned stakeholders handling resettlement implementation, including PLN UIP Kalimantan Bagian Barat and PLN UPP KITRING KBB 2 staff handling resettlement, supervision consultant and selected contractor. The training on RCCP implementation was conducted in November 2017 prior to implementation of first compensation payment to AHs, while training on RCCP Update will be conducted in early of 2019 prior to the detailed measurement survey for ROW, with Specific contents of the training would include the following:

- a. Strengthening knowledge and awareness of stakeholders on provisions in the RCCP including ADB policy on involuntary resettlement, project resettlement policy and principles, resettlement entitlements, consultations, grievance redress mechanism, institutional arrangement, and monitoring.
- b. Requirements and procedure for RCCP Update and detailed measurement survey instruments.
- c. Finalized detailed plan and process of resettlement activities and roles and responsibilities of the parties in charge of RCCP implementation,
- d. Finalized detailed plan for Income Restoration Program implementation, detailed plan for compensation disbursement and its required document, and required document for grievance handling.

183. PLN UIP Kalimantan Bagian Barat (Construction Operational division, Planning division and Law & Land division) and PLN UPP KITRING KBB 2, as primary implementing agencies, are to retain adequate staff for handling social safeguards and a Project Resettlement/Social Safeguards Consultant with relevant qualifications and experience, to be able to adequately design and deliver the RCCP. They remain responsible for RCCP Update and implementation, reviewing at the time of each scheduled bi-annual report, particularly with regards to potential changes in project scope, location, timing, entitlements or valuations that might require additional resources.

10. IMPLEMENTATION SCHEDULE

10.1. RCCP Updating and Implementation

184. RCCP has been updated following the completion of final design and identification of final routes of transmission line /defined route for Right of Way of transmission line, reroute of 14 tower base located in the forest area and two tower base affected to the structure. The final route of transmission line doesn't affect to the structure and based on permit issued by Territory Hall of Forest Area (Balai Pemantapan Kawasan Hutan Wilayah III), letter No.S396/BPKH.III.2/2015 dated May 13, 2015, there is no tower of transmission line traversing forestry area.

185. The construction of tower base and substation can only commence once ADB has reviewed and given its concurrence to the updated RCCP. Consultations with the AHs will be carried out on a continuing basis, paying particular attention to the vulnerable and severely affected households.

10.2. Detailed measurement survey and updated census of AHs

186. A new socio-economic survey will be carried out if RCCP updating does not commence within two years as demographic and socio-economic factors may change significantly within that period. It will cover at least 20% of affected AHs with statistically acceptable margin of error.

187. In the purpose for updating RCCP, an additional survey related to socio economic has been carried out by PIC in coordination with UIP Kalbagbar and UPP KBB 2 Sintang in Feb – May 2018.

188. Table 10.1 below provides a schedule of various inter-related activities in RP updating and implementation.

Table 10.1 Schedule of RCCP Implementation

	Table 10.1 Ochedule of Noor Implementation					
No	Subject	Person in-charge	Timeline			
1	Complete compensation payment/land acquisition for tower footprints: 2 of 125 tower plots (P7: Sanggau – Sekadau)	UIP, UPP	30 Sept 2018

8	 Disclosure of internal monitoring report on PLN's website External monitoring report of 2nd Monitoring Official submission of External monitoring report Disclosure of the report Internal monitoring report (semi-annual report) 	UIP	 Until the project completion (scheduled in Jul 2019) March – July 2019 August 2019 August 2019 A month after monitoring period

11. MONITORING AND REPORTING

11.1. Internal Monitoring

- 189. The EA (PLN Headquarter) has been responsible for semi-annual internal monitoring reports for submission to ADB that include the progress in land acquisition activities. Monitoring reports shall include the following topics:
- i) The number of entitled parties by category of impact per component, progress of land acquisition implementation including the status of compensation payment, income restoration program and status of provision of other entitlements. The amount of funds allocated for operations, time frame, compensation and other entitlements.
- ii) Consultations through various meetings and special meetings with vulnerable groups and women, level of participation. Complaints/grievances that may include consultations organized for RCCP activities, knowledge of RCCP and entitlements by the APs/AHs, information and use of grievance redress mechanism, and any outstanding issues requiring action from the management.
- iii) Livelihood/income restoration program progress including number of APs/AHs participating in the programs disaggregated by gender, program activities,
- iv) Implementation problems encountered and solutions.
- 190. Semi-annual monitoring reports have been submitted by PLN and reviewed by ADB also posted on the ADB and PLN web-sites. The EA (PLN Headquarter) through its implementing units (PLN UIP Kalimantan Bagian Barat and PLN UPP KITRING KBB 2) has been disclosed results of monitoring to the affected communities/persons specifically the status of the RCCP, information on benefits sharing, and corrective action plans. The preparation and submission of the monitoring report will continue until the project completion. Template of internal monitoring can be seen in Appendix 13.

11.2. External Monitoring

- 191. An external monitoring and evaluation group has been formed and mobilized three months after compensation payment of 50% for towers during project implementation. The group can be from a good reputable research or consulting agency, university, or development NGO. The main objective of external monitoring is to provide an independent periodic review and assessment of (i) achievement of resettlement objectives; (ii) changes in income, living standards and livelihoods; (iii) restoration and/or improvement of the economic and social base of the affected people; (iv) effectiveness and sustainability of entitlements; and (v) the need for further mitigation measures.
- 192. The main activities of the external monitoring revolve around the following: (i) review existing baseline data and gather additional socio-economic information, as necessary, on sample AHs; (ii) monitor implementation of the RCCP; (iii) identify any discrepancy between policy requirements and actual implementation of resettlement; (iv) monitor the resolution of complaints and grievances of AHs; (v) provide recommendations for improving resettlement preparation and implementation; and (vi) review compliance with regard to use funds for land acquisition and resettlement. The TOR for external monitoring can be seen in Appendix 14.
- 193. The external monitoring activities will be conducted twice. First monitoring has been carried out three months after compensation payment of the land for substation and/or 50% of towers. Second monitoring will be conducted once 30% of RoW compensation has been provided.

194. Report of first external monitoring report has submitted to the EA, and EA has submitted the monitoring report to ADB in English version in November 2017. ADB has been reviewed the monitoring report and give feedback. As for the contract of external consultant for first phase is already finished and for EMA 2nd phase still in process, therefore the presentation of EMA 1st phase scheduled to be implemented simultaneously with EMA 2nd phase. External monitoring report will be conducted in March –July 2019, afterward the report will be submitted in August 2019.

FORMULIR INVENTARISASI PEMILIK ASET

PETUNJUK: Dipenuhi untuk

- i) orang/rumah-tangga/adat/lembaga yang terpengaruh oleh <u>hilangnya</u> seluruh atau sebagian dari <u>lahan/kebun-pertanian/perumahan</u> mereka yang terletak di dalam batas konstruksi yang ditentukan oleh PLN untuk pembangunan jaringan transmisi dan gardu induk;
- ii) orang/rumah-tangga/adat/lembaga yang <u>kehilangan struktur/bangunan</u> mereka (yaitu, rumah, toko, pondok, struktur/bangunan sekunder) dan <u>pohon/tanaman/kayu;</u>
- iii) orang/rumah-tangga/adat/lembaga yang kehilangan sebagian atau seluruh hal yang melekat pada tanah dan fasilitas umum (jalan, saluran irigasi, tiang listrik, pipa air dan instalasi, sekolah, gereja, masjid, kawasan suci, dll);
- iv) orang/rumah-tangga/adat/lembaga yang kehilangan kerugian lainnya:
 - a. kehilangan akses atau mempunyai <u>akses terbatas ke daerah hutan</u> untuk berburu, memancing, dan mata pencaharian lainnya
 - b. hilangnya pendapatan usaha, pekerjaan, dan perubahan profesi

I. Identifikasi Orang (OTD) / Rumah Tangga (RTD) / Adat / Lembaga yang Terdampak

		•
Nama Responden (terkena dampak)*:		
No Telepon/HP (optional):		
Jenis Kehilangan:		
[] Lahan [] Bangunan [] Pohon/Tanaman [] Hal yang melekat pada	a tanah dan fasilitas umum [] L	ainnya: akses terbatas, pendapatan, pekerjaan, dll
Lokasi Aset:		
Dusun: Desa/Kelurahan:	RT/ RW: Keca	matan:
Yang akan digunakan untuk pekerjaan proyek:		
[] Gardu Induk [] Tapak Tower [] Jaringan Transmisi [] Lainnya: _		
Kategori OTD/RTD		
[] Pemegang hak atas tanah	[] Masyarakat hukum adat	[] Pemegang hak pengelolaan
[] Pihak yang menguasai tanah negara dengan itikat baik	[] Nadzir, untuk tanah wakaf	[] Pemegang dasar penguasaan atas tanah
[] Pemilik tanah bekas milik adat	[] Pemilik bangunan, tanamar	n atau benda lain yang berkaitan dengan tanah
[] Penyewa (Jika ya, langsung ke A.2; formulir untuk pemilik ditanyakan	,	

*Catatan: Jika dalam keluarga hanya satu orang, cukup tulis nama OTD; jika keluarga utuh, tulis nama kepala keluarga; jika suatu lembaga atau organisasi, tulis nama lembaga atau organisasi.

II. Informasi Dasar Sosial-Ekonomi pada OTD/RTD*

Umur:	Kondisi Fisik: [] No	ormal []Cacat	Gender: [] Laki-laki	[]Perempuan					
Suku: [] Dayak () [] Melayu [] Ja	Suku: []Dayak () []Melayu []Jawa []Sunda []Bugis []Melayu []Lainnya:								
Status Perkawinan: [] Menikah [] Single [] Dud	a []Janda	Agama kepala keluarga :							
Pekerjaan:	Pendidikan terakhir kepala keluarga:								

[] Petani/Kebun	Jumlah orang yang hidup dalam keluarga:					
[] Nelayan	Jumlah orang yang bekerja dalam keluarga:					
[] Lainnya:	Sumber utama mata pencaharian:					
[] Tidak bekerja/sedang mencari pekerjaan	oumber dama mata pencananan.					
[] Tidak bekerja/ tidak mencari pekerjaan	Rata-rata pendapatan: Rp per bulan					
[] Pensiun/ tidak mencari pekerjaan	Menerima program Bantuan Tunai Langsung (atau sejenis) : [] Ya [] Tdk					
Alamat:						
Dusun/Desa/Kelurahan: RT/ RW:	Kecamatan: Kabupaten:					
No KTP:						
Lokasi: [] dalam kawasan proyek : [] di luar kawasan proyek						
Lama menetap di desa dan kawasan proyek: tahun						

III. Aset Terkena Dampak untuk Gardu Induk (substation) dan Tapak Tower

(diisi untuk RTD/adat/lembaga yang asetnya terdampak)

A.1-1 Tanah/Lahan: jumlah yang dimiliki (Ditanyakan pada pemegang hak atas tanah, hak pengelolaan, nadzir untuk tanah wakaf, pemilik tanah bekas milik adat, masyarakat hukum adat, pihak yang menguasai tanah negara dengan itikat baik, dan pemegang dasar penguasaan atas tanah)

	Luas dan Status Kepemilikan semua lahan yang dimiliki								
Klasifikasi penggunaan tanah*	Sertifikat Hak Milik/Letter C/Girik/SKT	Hak Guna Usaha	Hak Guna Bangunan	Hak Pakai	Hak Pengelolaa n	Tanah adat, ulayat, atau yasan	Penempatan/pen ggunaan tanah negara dengan itikat baik	Total area lahan yang dimiliki	
1.	m ²	m²	m ²	m ²	m ²	m²	m²	m²	
2.	m ²	m ²	m ²	m ²	m ²	m²	m ²	m ²	
3.	m ²	m ²	m ²	m ²	m ²	m²	m ²	m ²	
4.	m ²	m²	m ²	m²	m ²	m ²	m ²	m²	

^{*}Contoh: pemukiman, komersial, adat, tempat suci, pertanian, hutan, institusi (kantor, sekolah, agama), sungai, kolam, pantai.

A.1-2 Tanah/Lahan: Jumlah tanah dimiliki/ ditempati atau digunakan yang terkena dampak (*Ditanyakan pada OTD dengan kategori A-1-1*)

Klasifikasi nanggunaan	Luas	dan Status	Total area lahan yang	Kelayakan ekonomis lahan					
Klasifikasi penggunaan tanah*	Sertifikat Hak Milik/Letter C/Girik/SKT	Hak Guna Usaha	Hak Guna Bangunan	Hak Pakai	Hak Pengelolaa n	Tanah adat, ulayat, atau yasan	Penempatan/pen ggunaan tanah negara dengan	terkena dampak/dibeb askan	yang tersisa

^{*}Catatan: Jika yang terkena hilangnya aset adalah RTD, informasi sosial ekonomi dalam bagian ini adalah tentang kepala rumah tangga. Bagian ini tidak perlu diisi untuk organisasi/lembaga terkena dampak

							itikat baik		
1.	m ²	Layak/tidak layak							
2.	m ²	m²	m ²	Layak/tidak layak					
3.	m ²	m ²	m ²	m²	m ²	m ²	m ²	m ²	Layak/tidak layak
4.	m ²	m ²	m ²	m ²	m²	m ²	m ²	m ²	Layak/tidak layak
٠.		111-	111-	III-	111-	111-	111-	111-	Layan lidan layan

A.2 Jika menyewa atau menempati lahan terkena dampak (terpengaruh) (Ditanyakan pada penyewa atau pengguna):

Dengar	Perjanjian Sewa	Periode sewa	Harga Sewa	Membayar	
Nama Pemilik Lahan	Alamat Pemilik Lahan	(Tahunan/Bulanan)		Sewa	
1.			Rp. per tahun	[Yes/No]	
2.			Rp. per tahun	[Yes/No]	

B.1 Struktur/bangunan yang ditemukan dalam lahan dan terkena dampak (<u>Ditanyakan pada pemilik</u> <u>struktur/bangunan; terlepas kepemilikan atas hak tanahnya</u>):

Jenis penggunaan bangunan utama*	Klasifikasi bangunan (permanen/non- permanen)	total area bangunan	area yang terkena dampak	Mempertimbangkan stabilitas bangunan, apakah bangunan akan terkena sebagian atau semuanya
1.		m ²	m ²	[sebagian/ semua]
2.		m²	m²	[sebagian/ semua]
3.		m²	m²	[sebagian/ semua]

Catatan: Foto semua bangunan yang berada dalam lahan terkena dampak.

B.2 Jika rumah/toko/bangunan yang terkena dampak bukan milik OTD/RTD (Ditanyakan pada penyewa):

	Nama Pemilik Asli	Alamat dan No KTP Pemilik Asli	Pekerjaan Pemilik Asli	Periode Sewa (Tahunan/Bulanan)	Bayar Sewa per bulan	Membayar Sewa?
1.					Rp	[Yes/No]
2.					Rp	[Yes/No]
3.					Rp	[Yes/No]
4.					Rp.	[Yes/No]

^{*}Bangunan utama: bangunan yang tetap di tanah dengan atap, dan digunakan sebagai domisili, kantor, sekolah, klinik, toko atau tempat perdagangan, ruko, tempat ibadah, dll.

B.3 Struktur/bangunan sekunder yang ditemukan dalam lahan dan terkena dampak (Ditanyakan pada pemilik struktur/bangunan sekunder, terlepas dari status tanah yang dimiliki):

Jenis bangunan sekunder terkena dampak*	Klasifikasi bangunan	. , ,		Luas bangunan y terkena dampa	•	Mempertimbangkan stabilitas bangunan, apakah bangunan akan terkena sebagian atau semuanya
1.		m² /	lm	m² /	lm	[sebagian/ semua]
2.		m² /	lm	m² /	lm	[sebagian/ semua]
3.		m² /	lm	m² /	lm	[sebagian/ semua]

^{*} Bangunan sekunder: Bangunan yang tidak bergerak dan bukan bagian dari struktur utama, seperti pagar, pintu gerbang, jalan, akses goronggorong dari jalan ke jalan atau gerbang, sumur, toilet dan dapur yang terpisah dari bangunan utama atau rumah, menunggu gudang, gudang pertanian, saluran irigasi, dll suci..

C. 1 Tanaman tahunan yang ditemukan dalam lahan dan terkena dampak (Ditanyakan pada pemilik tanaman, terlepas dari status kepemilikan tanah):

Nama/jenis tanaman*	Area tanaman yang terkena dampak	Pendapatan/Nilai panen tanaman per tahun
1.	m²	Rp
2.	m ²	Rρ
3.	m ²	Rp
4.	m ²	Rp
5.	m ²	Rp

^{*}contoh tanaman tahunan: padi, jagung, tebu, singkong, dll.

C.2 Jenis dan jumlah tanaman keras yang ditemukan dalam lahan terkena dampak(Ditanyakan pada pemilik tanaman, terlepas dari status kepemilikan tanah):

Nama tanaman keras	Muda	Produktif	Akhir Berbuah (tua)	Jumlah
1.				
2.				
3.				
4.				
5.				
6.				
7.				
Total				

Jenis asset yang terkena dampak	Pemilik aset	Alamat Pemilik aset	Luas/panjang aset	Jumlah aset	Keterangan
1.					
2.					

^{*} Hal-hal lain yang melekat pada lahan dan fasilitas masyarakat termasuk jalan, saluran irigasi, tiang listrik, pipa air dan instalasi, sekolah, gereja, masjid, dll

D.2. Kehilangan area tempat suci (sacred area) yang terkena dampak (tembawang, makam, pohon, dll)

Jenis tempat suci	Luasan Area	Penggunaan	Pemilik tempat suci	Alamat pemilik	Jumlah
1.					
2					
Z.					

E. Kehilangan lainnya (jenis usaha yang hilang permanen)

E. 1. Kehilangan pekerjaan dan pendapatan usaha:

Jenis Usaha*	Menggaji	Gaji Bersih pekerja perbulan (Rp)	Pendapa	dapatan bersih perbulan		n saat operasional ekerjaan
	Pekerja?		(Rp)		Permanen	Sesaat (berapa lama)
1.	[Yes/No]		Rp.	per month		
2.	[Yes/No]		Rp.	per month		

^{*}Jenis Usaha: Bengkel, restoran, toko

IV. Aset Terkena Dampak untuk ROW

(diisi untuk RTD/adat/lembaga yang asetnya terdampak)

A.1-1 Tanah/Lahan: jumlah yang dimiliki, ditempati atau digunakan (Ditanyakan pada pemegang hak atas tanah, hak pengelolaan, nadzir untuk tanah wakaf, pemilik tanah bekas milik adat, masyarakat hukum adat, pihak yang menguasai tanah negara dengan itikat baik, dan pemegang dasar penguasaan atas tanah)

	Luas dan Status Kepemilikan semua lahan yang dimiliki, ditempati atau digunakan							
Klasifikasi penggunaan tanah*	(Sertifikat Hak Milik/Letter C/Girik/SKT)	Hak Guna Usaha	Hak Guna Bangunan	Hak Pakai	Hak Pengelolaa n	Tanah adat, ulayat, atau yasan	Penempatan/pen ggunaan tanah negara dengan itikat baik	Total area lahan yang dimiliki
1.	m²	m ²	m ²	m ²	m ²	m ²	m²	m ²
2.	m²	m ²	m ²	m²	m ²	m ²	m²	m²
3.	m ²	m²	m ²	m ²	m ²	m ²	m²	m²

KUISIONER SOSIAL EKONOMI UNTUK ORANG/RUMAH TANGGA TERDAMPAK

PETUNJUK: Dipenuhi hanya untuk orang / rumah tangga terdampak:

- a) yang hilang seluruh atau sebagian dari rumah, toko, dan bangunan yang terletak di dalam area proyek transmisi dan gardu induk;
 b) kehilangan sebagian atau seluruhnya, perumahan, komersial, lahan pertanian, dan wilayah suci/kramat mereka;
 c) kehilangan akses atau dibatasi akses ke daerah hutan untuk berburu, memancing, dan tujuan penghidupan lainnya;
 d) dianggap parah dan rentan.

Formulir ini juga tidak akan diisi untuk organisasi dan lembaga yang dipengaruhi oleh hilangnya asset.

Appendix 3 Term of Reference Independent Appraisal

<u>BAB IV</u> SYARAT TEKNIS/KERANGKA ACUAN KERJA (KAK)

1. LATAR BELAKANG

Pemerintah melalui PT PLN (Persero) selaku Badan Usaha Milik Negara berupaya melakukan usaha penyediaan tenaga listrik kepada masyarakat dengan meningkatkan pembangunan di sektor ketenagalistrikan. Pembangunan di sektor ketenagalistrikan antara lain adalah Pembangkit Listrik, Gardu Induk dan Jaringan Transimi berupa Saluran Udara Tegangan Tinggi (SUTT) dan Saluran Udara Tegangan Ekstra Tinggi (SUTET).

Salah satu jenis jaringan transmisi yang akan dibangun PT PLN (Persero) adalah Jaringan Saluran Udara Tegangan Tinggi (SUTT) 150 KV yang dalam pembangunannya membutuhkan ruang bebas bawah SUTT. Ofeh karena itu, untuk memudahkan pembangunan dan akses penarikan jaringan kabel saluran SUTT, maka PLN sesuai dengan Peraturan Menteri Energi dan Sumber Daya Mineral Nomor 38 Tahun 2013 akan memberi Kompensasi kepada pemegang hak atas tanah berikut bangunan, tanaman dan/atau benda iain yang terdapat di atas tanah tersebut karena tanah tersebut digunakan secara tidak langsung untuk pembangunan ketenagalistrikan tanpa dilakukan pelepasan atau penyerahan hak atas tanah.

Terkait dengan pemberian kompensasi tersebut, PT PLN (Persero) memerlukan penilaian atas tanah berikut bangunan, tanaman dan/ atau benda lain yang terdapat di atas tanah yang berada di ruang bebas bawah SUTT sebagai dasar menentukan besar kompensasi yang harus diberikan. Dalam menentukan nilai pasar tanah, bangunan dan tanaman, PT PLN (Persero) membutuhkan jasa penilaian dari lembaga penilai yaitu Kantor Jasa Penilai Publik yang professional dan independen sebagai lembaga penilai sesuai dengan Peraturan Menteri Energi dan Sumber Daya Mineral Nomor 38 Tahun 2013.

2. MAKSUD DAN TUJUAN

Maksud dan Tujuan penilaian atas tanah, bangunan dan tanaman adalah agar diketahui opini nilai pasar atas tanah, bangunan dan tanaman sebagai dasar menentukan besar kompensasi yang harus diberikan.

Kompensasi adalah pemberian sejumlah uang kepada pemegang hak atas tanah berikut bangunan, tanaman, dan/ atau benda lain yang terdapat di atas tanah tersebut karena tanah tersebut digunakan secara tidak langsung untuk pembangunan ketenagalistrikan tanpa dilakukan pelepasan atau penyerahan hak atas tanah.

Nilai Pasar didefinisikan sebagai estimasi sejumlah uang yang dapat diperoleh dari hasil penukaran suatu aset atau kewajiban pada tanggal penilajan, antara pembeli yang berminat membeli dengan penjual yang berminat menjual, dalam suatu transaksi bebas ikatan, yang pemasarannya dilakukan secara layak, dimana kedua belah pihak masing masing bertindak atas dasar pemahaman yang dimilikinya, kehati hatian dan tanpa paksaan. (SPI 101-3.1)

Nilai pasar yang dihasilkan selanjutnya akan menjadi dasar penetapan besaran kompensasi oleh lembaga penilai sesuai dengan Formula Perhitungan Kompensasi berdasarkan Peraturan Menteri Energi dan Sumber Daya Mineral Nomor 38 Tahun 2013.

3. LINGKUP PEKERJAAN

- 3.1 Pengertian penilaian sesuai dengan Peraturan Menteri Keuangan No. 125/PMK.01/2008 dan terakhir direvisi dengan Peraturan Menteri Keuangan No. 101/PMK.01/2014 tentang Penilai Publik adalah suatu proses pekerjaan untuk memberikan opini tertulis atas nilai ekonomis suatu objek penilaian sesuai dengan Standar Penilaian Indonesia.
- 3.2 Lembaga Penilai sebagaimana dimaksud adalah Kantor Jasa Penilai Publik (KJPP) yang mempunyai klasifikasi bidang jasa penilaian yang terkait dengan bidang jasa penilaian tanah, bangunan dan tanaman yang mendapat izin usaha dari Menteri Keuangan dan mendapat lisensi dari lembaga pertanahan.
- 3.3 Pengertian Kantor Jasa Penilai Publik (KJPP) adalah badan usaha yang telah mendapat ijin usaha dari menteri sebagai wadah bagi penilai publik dalam memberikan jasanya.
- 3.4 Pengertian Penilai Publik adalah Penilai yang telah memperoleh ijin dari menteri untuk memberikan jasa sebagaimana diatur dalam peraturan menteri.
- 3.5 Saluran Udara Tegangan Tinggi yang selanjutnya disingkat SUTT adalah saluran tenaga listrik yang menggunakan kawat telanjang (penghantar) di udara bertegangan di atas 35 kV sampai dengan 245 kV sesuai dengan standar di bidang ketenagalistrikan (SPLN 1:1995).
- 3.6 Saluran Udara Tegangan Ekstra Tinggi yang selanjutnya disingkat SUTET adalah saluran tenaga listrik yang menggunakan kawat telanjang (penghantar) di udara bertegangan di atas 245 kV sesuai dengan standar di bidang ketenagalistrikan (SPLN 1:1995).
- 3.7 Tanaman adalah tanaman keras dengan tinggi tanaman yang berpotensi masuk ke-dalam ruang bebas.
- 3.8 Kontrak Harga Satuan (KHS) adalah Perjanjian Kontrak yang ditandatangani oleh Pengguna Barang / Jasa dan memuat kesepakatan harga satuan barang/jasa tertentu dalam kurun waktu dan spesifikasi tertentu, yang ditindaklanjuti dengan penerbitan Surat Pesanan Barang/Jasa (SPBJ) sesuai waktu kebutuhan, dengan mengacu pada syarat -- syarat dan ketentuan dalam Perjanjian Kontrak/KHS, yang diterbitkan dan ditandatangani oleh Pengguna Barang/Jasa.

4. PENGGUNA JASA / PEMBERI TUGAS

Pengguna Jasa adalah :

General Manager

PT PLN (Persero) Unit Induk Pembangunan Kalimantan Bagian Barat

Jl. Letjen Soeprapto No.50 G.

Pontianak - Kalimantan Barat

Telp. (0561) 762580, Fax. (0561) 762579

5. DIREKSI PEKERJAAN

Direksi Pekeriaan adalah :

Manajer Hukum, Komunikasi dan Pertanahan

PT PLN (Perseco) Unit Induk Pembangunan Kalimantan Bagian Barat

Jl. Letjen Soeprapto No.50 G,

Pontianak - Kalimantan Barat

Telp. (0561) 762580, Fax. (0561) 762579

6. LOKASI PEKERJAAN

Lokasi Pekerjaan adalah Lokasi Pembangunan SUTT 150 KV Tayan — Sanggau — Sekadau (± 345 Span) yang berada di:

- Kabupaten Sanggau
- Kabupaten Sekadau

7. DATA TEKNIS

Daftar Inventaris

Daftar inventaris yang dimaksud dalam Permen ESDM Nomor 38 tahun 2013 adalah daftar nominatif calon penerima kompensasi yang telah diumumkan dan di identifikasi di kantor kelurahan/desa dan kecamatan setempat yang isinya terdiri dari :

- Pemegang Hak atas tanah, Bangunan dan atau Tanaman
- Penggunaan dan Pemanfaatan Tanah
- Jenis Tanah
- Luas Tanah dan Bangunan
- Jenis, Klasifikasi dan Jumlah Tanaman
- Letak Tanah, Bangunan dan Tanaman
- Peta Obyek tanah, Bangunan dan Tanaman

8. DASAR HUKUM/PERATURAN PERUNDANGAN

- Undang-undang No. 30 Tahun 2009 tentang Ketenagalistrikan.
- 8.2 Peraturan Pemerintah No. 14 Tahun 2012 tentang Kegiatan Usaha Penyediaan Tenaga Listrik.

- 8.3 Peraturan Menteri Keuangan No. 101/PMK.01/2014 tentang Penilai Publik.
- 8.4 Peraturan Menteri Energi dan Sumber Daya Mineral RI Nomor 38 tahun 2013 tahun 2013 tentang Kompensasi Atas Tanah, Bangunan dan Tanaman yang Berada dibawah Ruang Bebas Saluran Udara Tegangan Tinggi dan Saluran Udara Tegangan Ekstra Tinggi.
- 8.5 Surat Keputusan Direksi No. 289.K/DIR/2013 tentang Pengadaan Tanah untuk Kepentingan Penyediaan Tenaga Listrik, Biaya Operasional Pengadaan Tanah dan Biaya Operasional Kompensasi di Lingkungan PT PLN (Persero);
- 8.6 Kode Etik Penilai Indonesia 2013.
- 8.7 Standard Penilaian Indonesia 2013.

9. LINGKUP PEKERJAAN

- 9.1. Mengemukakan pendapat mengenai nilai pasar atas tanah, bangunan dan Tanaman.
- Melakukan klarifikasi dan diskusi dengan PT PLN (Persero) UIP KALBAGBAR dalam pelaksanaan pekerjaan penilaian.
- 9.3. Menjelaskan hasil pekerjaan kepada PT PLN (Persero) UIP KALBAGBAR.
- 9.4. Menerbitkan laporan pekerjaan hasil penilaian yang dilaksanakan.

10. DASAR PENILAIAN

Nitai Pasar (NP) adalah estimasi sejumlah uang yang dapat diperoleh dari hasil penukaran suatu asset atau liabilitas pada tanggal penilaian, antara pembeli yang berminat membelidengan penjual yang berniat menjual, dalam suatu transaksi bebas ikatan, yang pemasarannya dilakukan secara layak, dimana kedua pihak masing-masing bertindak atas daasar pemahaman yang dimilikinya, kehati-hatian dan tanpa paksaan (SPI 101 tahun 2013).

11. PROSES PELAKSANAAN

Proses pelaksanaan penilaian sesuai dengan lingkup pekerjaan diatas mengacu pada hasil inventarisasi yang telah disampaikan oleh PLN.

Jika didapati data inventarisasi berbeda pada saat penilaian, penilai wajib menginformasikan perbedaan data inventarisasi tersebut kepada direksi pekerjaan untuk diputuskan kemudian.

Selama proses pelaksanaan pekerjaan di lapangan akan ditugaskan personil pengawas dari PLN sebagai penanggung jawab di lapangan. Mekanisme pengawasan akan diatur lebih lanjut oleh direksi pekerjaan.

12. METODOLOGI PENILAIAN

Pendekatan penilaian yang digunakan adalah :

Pendekatan Pasar; pendekatan ini mempertimbangkan penjualan dari properti sejenis atau pengganti dan data pasar yang terkait, serta menghasilkan estimasi nilai melalui proses perbandingan. Pada umumnya, properti yang dinilai (objek penilaian) dibandingkan dengan transaksi properti yang sebanding, baik yang telah terjadi manpun properti yang masih dalam tahan penawaran penjualan dari suatu proses jual beli.

Pendekatan Pendapatan; pendekatan ini mempertimbangkan pendapatan dan biaya yang berhubungan dengan properti yang dinilai dan mengestimasikan nilai melalui proses kapitalisasi. Kapitalisasi menghubungkan pendapatan (umumnya pendapatan bersih) dengan suatu definisi jenis nilai melalui konversi pendapatan menjadi estimasi nilai. Proses ini dapat menggunakan metode kapitalisasi langsung atau metode Arus Kas Terdiskonto (Discounted Cash Flow/DCF), atau keduanya.

Pendekatan Biaya; menetapkan nilai properti dengan mengestimasi biaya perolehan tanah dan biaya pengganti pengembangan baru (sesuatu yang dibangun) di atasnya dengan utilitas yang sebanding atau mengadaptasi properti lama dengan penggunaan yang sama, tanpa mempertimbangkan antara lain biaya akihat penundaan waktu pengembangan dan biaya lembur. Untuk properti yang lebih tua, pendekatan biaya memperhitungkan estimasi depresiasi termasuk penyusutan fisik dan keusangan lainnya (fungsional dan eksternal). Biaya konstruksi dan depresiasi seharusnya ditentukan oleh hasil analisis perkiraan biaya konstruksi dan depresiasi sesuai dengan kelaziman yang ada di pasar atau dalam praktek penilaian.

Peneranan pendekatan yang digunakan adalah sebagai berikut:

Obyek Penilaian	Pasar	Pendapatan	Biaya	HBU
Tanah	Tanah Kosong	Tanah yang memiliki potensi komersial		HBU
Tanah dan Bangunan	Dihitung sebagai satu kesatuan dengan menggunakan data yang sejenis dan sebanding	Properti komersial seperti perkantoran, hotel dan sebagainya	Indikasi nilai pasar tanah dalam keadaan kosong ditambang biaya pengganti baru bangunan yang disesuaikan dengan penyusutan	нвџ
Bangunan dan Sarana Pelengkap	-	- "	Biaya pengganti Baru dikurang penyusutan	HBU
Tanah dan Tanaman	Dihitung sebagai satu kesatuan dengan menggunakan data yang sejenis dan sebanding seperti	Digunakan pada tanaman yang menghasilkan secara komersial seperti kelapa	Indikasi nilai pasar tanah dalam keadaan kosong ditambang biaya pengganti baru	HBU

	kelapa sawit, karet dan sebagainya	sawit, karet dan sebagainya	yang disesuaikan dengan penyusutan	
Tanaman (tanaman yang dimaksud adalah tanaman keras dengan tinggi tanaman yang berpotensi masuk ke dalam ruang bebas (Pasal 1 butir 5, Permen ESDM No.38/2013).	Dihitung sebagai tegakan tanaman menggunakan data yang sejenis dan sebanding seperti pohon mangga,	Digunakan pada tanaman (tanpa tanah) yang menghasilkan secara komersial.	biaya pengganti baru yang disesuaikan dengan penyusutan	

Formula Perhitungan Kompensasi mengacu pada Permen ESDM Nomor 38 Tahun 2013:

a. Formula Perhitungan Kompensasi untuk tanah :

Kompensasi = 15% x Lt x NP

Keterangan :

: Luas tanah di bawah ruang bebas NP : Nilai Pasar tanah dari Lem baga Penilai

Formula Perhitungan Kompensasi untuk bangunan :

Kompensasi = $15\% \times Lb \times NPb$

Keterangan:

Lb : Luas bangunan di bawah ruang bebas NPb : Nilai Pasar bangunan dari Lembaga Penilai

Formula Perhitungan Kompensasi untuk tanaman ;

Kompensasi = NPt

Keterangan:

NPt: Nilai Pasar tanaman dari Lembaga Penilai

13. BATASAN DAN ASUMSI KHUSUS

- 13.1 Persetujuan penilai harus didapatkan atas setiap publikasi terhadap keseluruhan atau sebagian dari laporan atau referensi yang di publikasikan.
- 13.2 Penilai tidak memiliki tanggung jawab kepada pihak ketiga, selama tidak menyimpang dari peraturan dan hukum yang berlaku.
- 13.3 Penilai mensyaratkan adanya pernyataan tertulis berupa surat representasi dari. pemberi tugas mengenai kebenaran dan sifat informasi yang diberikan oleh pemberi tugas.
- 13.4 Proses pengumpulan data yang cukup dapat dilakukan dengan cara inspeksi, penelaahan, penghitungan dan analisis yang dilakukan dengan cara yang benar. Penilai dapat menentukan batasan, sejauh mana data yang dibutuhkan adalah cukup untuk tujuan penilaian, dan apabila dianggap dapat dipertanggung jawabkan, maka

- inspeksi dapat dilakukan dengan cara sampling/random dengan kriteria atas obyek yang sejenis dan memiliki karakteristik yang sama.
- 13.5 Apabila setelah dilakukan Investigasi ternyata dijumpai hal-hal yang tidak sesuai dengan apa yang diatur dalam Lingkup Penugasan yang telah disepakati; seperti data dari pemberi tugas maupun pihak lain tidak sesuai atau tidak memadai yang akan mengakibatkan hasil penilaian tidak dapat diyakini dan dipercaya (kredible), maka Lingkup Penugasan harus disesuaikan dan didiskusikan kepada pemberi tugas. Perubahan atau penyesuaian terhadap adanya perbedaan data dan informasi, harus dinyatakan dalam berita acara yang disetujui oleh pemberi tugas.
- 13.6 Dalam pelaksanaan survey, dapat dilakukan secara sampling sesuai kondisi dan kebutuhannya, yang secara jelas di uraikan di Laporan dan disetujui oleh pihak pemberi tugas.

14, TENAGA PENILAI

Tenaga Penilai yang diperlukan dalam pekerjaan ini adalah

- Penilai Berijin (S)
- 2. Penilai Madya (T)
- Penilai Pratama (P)
- Surveyor

15. JANGKA WAKTU PEKERJAAN

- 15.1 Jangka Waktu pelaksanaan Kesepakatan Harga Satuan yang ditandatangani Pengguna Barang/Jasa dan Kantor Jasa Penilai Publik adalah sampai dengan 31 Desember 2017.
- 15.2 Jangka waktu pelaksanaan setiap kegiatan Jasa Penilai Publik yang akan diatur lebih lanjut dalam Perjanjian dengan tetap mengacu pada ketentuan yang tercantum dalam Kesaepakatan Harga Satuan.

16. SYARAT – SYARAT & KETENTUAN PEMBAYARAN

Pembayaran akan dilakukan oleh Pemberi Tugas apabila seluruh persyaratan dalam tata cara pembayaran yang dipersyaratkan dalam Bab II Syarat Administrasi kontrak dan Bab IV – Syarat Teknik telah lengkap dan terbukti kebenarannya, serta dilengkapi oleh berita acara pembayaran yang dikeluarkan oleh Penyedia Jasa/ Pemberi Tugas.

Jenis Perjanjian/Kontrak untuk Paket Pekerjaan ini adalah Kesepakatan Harga Satuan (KHS).

Harga yang tercantum dalam Surat Pesananan Barang/Jasa sudah termasuk PPN sebesar 10% dan pembayaran-pembayaran wajib lainnya menurut peraturan yang sah.

Tata cara pembayaran kemajuan pekerjaan dilakukan sebagai berikut :

- Pembayaran uang muka
 Pembayaran uang muka tidak diberikan
- b. Pembayaran progress

Pembayaran progress dapat diberikan atas tagihan Penyedia Jasa dilengkapi dengan:

- Tagihan yang lengkap dan benar disertai kwitansi, faktur pajak, SSP, rekaman PKP, dll.
- Laporan Penilaian yang sudah disetujui oleh Pengguna Jasa/ Pemberi Tugas

17. KEWAJIBAN PEMBERI TUGAS DAN PENYEDIA JASA.

17.1 Kewajiban Pemberi Tugas

Dalam pekerjaan ini pengguna jasa berkewajiban untuk

- a. Memberikan data teknis dan data lain yang diperlukan.
- Menyediakan pendamping pada saat survey lapangan.
- c. Menunjuk Person in Contact (PIC) untuk melakukan diskusi.
- 17.2 Kewajiban Penyedia Jasa

Dalam pekerjaan ini penyedia jasa berkewajiban untuk

- a. Memberikan jasa konsultansi sesuai dengan lingkup pekerjaan dalam kontrak.
- b. Melakukan kompilasi data dalam rangka penilaian.
- Melakukan klarifikasi dan diskusi kepada pengguna jasa untuk menghasilkan laporan sesuai dengan lingkup pekerjaan dalam kontrak.

18. LAPORAN PENILAIAN

Laporan penilaian dibuat sesuai dengan ketentuan sebagai berikut:

- 18.1 Laporan penilaian dibuat dalam Bahasa Indonesia dan mata uang yang digunakan dalam rupiah.
- 18.2 Laporan penilaian dibuat 2 (dua) rangkap terdiri 1 rangkap asli dan 1 rangkap salinan/kopi.

Appendix 8 Additional Survey 2018 Regarding to Update RCCP

Appendix 8.1 Sample of RCCP Monitoring Questionnaire

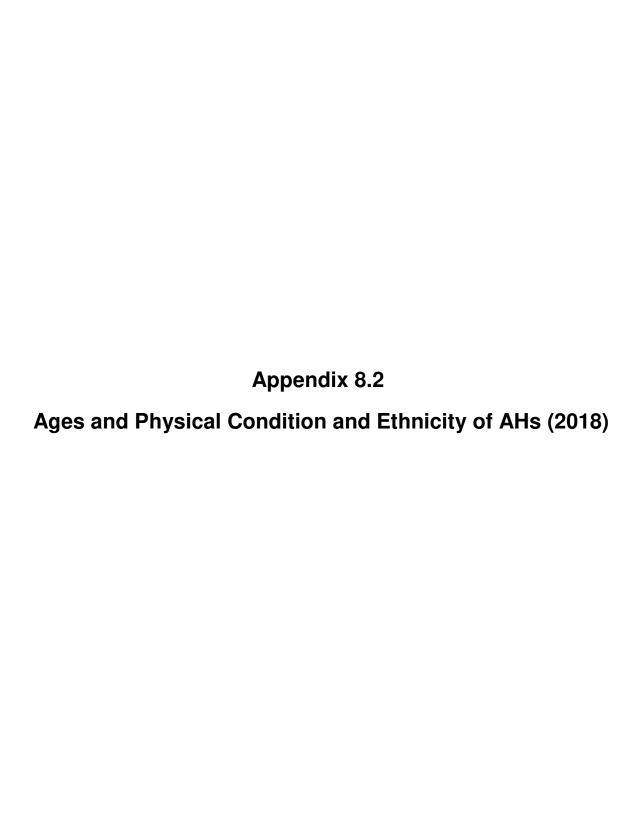

KUESIONER PELAKSANAAN MONITORING RCCP T/L 150 KV TAYAN – SANGGAU - SEKADAU

	Hari/tanggal wawancara :2018
A. LOKASI	
Jalur SUTT	
Tower 02 A.	s/d tower
B. KRITERIA RESPONDI	EN
(beri tanda/lingkari sala	ah satu)
	sekitar tower SUTT (radius ± 10 m dari garis luar tower).
	bawah rentangan SUTT (hingga jarak ± 20 m dari poros).
Nama Responden	· Samsul Kamar · L/P
Alamat	. Desa Kawat
Umur	. 48
Jml Anggota Keluarga	. 3 ·
Anakah Banak/ihu me	erupakan seorang kepala keluarga?
a. Ya	
(3)14	b. Tidak
Pekerjaan	BUMY PT. PU.
Penghasilan/Bulan	P-400 t 4 h
rengnasiian/Bulan	: a. Rp 100rb – 1 jt b. Rp 1jt – 2 jt
	c. Rp 2jt - 3 jt d. Rp 3jt - 10jt
	e. > Rp 10 jt
Suku/Etnis	: Melayu.
Status	:(a. Asli
	b. Pendatang , sejak tahundari
	or creating, sejan tananimudal Imminimum
Luas Tanah Kepemilika	an : 4, m2
Luas Tanah/Bangunan	yang dikompensasi : 400 . m2 (% kepemilikan)
Fungsi Lahan : Sau	11k
- 014	

I.	Persepsi Terhadap Jaringan Transmisi
1.	Sejak kapan bapak/ibu menghuni rumah yang saat ini ditempati, tahun
2.	Apakah Bapak/Ibu pernah mendengar tentang rencana pembangunan jaringan SUTT 150 kV
	Tayan – Sanggau - Sekadau? Belum .
3.	Apakah tempat tinggal bapak/ibu termasuk wilayah yang akan dilewati pembangunan jaringan
	SUTT 150 kV Tayan – Sanggau - Sekadau? てるね.
4.	Apakah ada sosialisasi dari pihak PT PLN (Persero) kepada masyarakat dalam rangka pelaksanaan
	pembangunan jaringan SUTT 150 kV Tayan — Sanggau - Sekadau?
5.	
	pembangunan jaringan SUTT 150 kV Tayan – Sanggau – Sekadau ini? Tî dak.
6.	Bagaimana pandangan bapak/ibu apabila Proyek SUTT 150 kV ini jadi dilaksanakan. Manfaat apa
	yang bisa didapatkan baik untuk penduduk sekitar atau secara umum? Kepentingan barsana talam pemakaian Listrik
7.	Harapan bapak/ibu selanjutnya berkaitan dengan kegiatan pembangunan jaringan SUTT 150 kV
	Tayan-Sanggau-Sekadau ini? Listrik lebih Stabil, jadi ekonomi lancar-
	rilah Tanda (X)/ Lingkarilah Salah Satu (O) Ganti Rugi/Kompensasi
1.	Apakah ada lahan / tanah saudara yang terkena sebagai lokasi tapak tower atau dilewati oleh
	bentangan tower SUTT 150 kV?
	(a.)Ya b. Tidak
2.	Apakah bapak/ibu bersedia untuk menjual tanahnya (untuk tapak tower) atau untuk diberikan
	kompensasi terhadap tanam tumbuh dan bangunan jika termasuk kedalam ruang bebas?
	a. Ya b. Tidak
3.	Dalam masalah ganti rugi, bagaimana cara penentuan harga ganti rugi yang terbaik untuk semua pihak?
	a. Lewat musyawarah yang melibatkan semua pihak terkait.
	b. Masyarakat menentukan harga, PLN mengikuti.
	c. Harga ditentukan oleh PLN
4.	
	tower?
	a. Puas b. Cukup puas c. Tidak puas

5.	Menurut anda, bagaimanakah nilai kompen a. Meningkat b. ètap	sasi/ganti rugi berdampak untuk pendapatan anda? c. Menurun
6.		ensasi/ ganti rugi?
	a. Disimpan di Bank/Edukasi	
	(b.) Modal Usaha	
	c. Renovasi rumah	
	d. Pembelian barang	
	e. Kebutuhan sehari-hari

: Anggota P2T PT PLN (Persero) UPK RING KAL 1

Bersama – sama telah melakukan Konsultasi Publik atau Sosialisasi pembangunan tapak tower SUTT 150 kV Tayan – Sanggau di Kantor Kecamatan Tayan Hilir.

- Sosialisasi dilakukan dengan berpedoman kepada :
 - UU No.2 tahun 2012 tentang Pengadaan Tanah bagi Pelaksanaan Pembangunan untuk Kepentingan Umum.
 - Perpres No. 40 tahun 2014 tentang Perubahan atas Peraturan Presiden No. 71 tahun 2012 tentang Penyelenggaraan Pengadaan Tanah Bagi Pembangunan untuk Kepentingan Umum.
 - Peraturan Kepala Badan Pertanahan Nasional Republik Indonesia No. 05 tahun 2012 tentang Pengadaan Tanah bagi Pelaksanaan Pembangunan untuk Kepentingan Umum.
 - Keputusan Direksi PT PLN (Persero) No. 0289.K/DIR/2013 tentang Pengadaan Tanah untuk Kepentingan Penyediaan Tenaga Listrik, Biaya Oprasional Pengadaan Tanah dan Biaya Oprasional Kompensasi di Lingkup PT PLN (Persero).
 - Rekomendasi Gubernur Kepala Daerah Tingkat I Kalimantan Barat No. 671.1 / 1167 / DPE-C3 tanggal 29 April 2009 tentang Pembangunan Sarana Ketenagalistrikan di kalimantan Barat.
 - Keputusan Bupati Sanggau No. 250 Tahun 2014 tanggal 28 April 2014 Tentang Penetapan Lokasi Tower Saluran Udara Tegangan Tinggi 150 kV di Wilayah Tayan Hilir, Tayan Hulu, Parindu, Kapuas dan Mukok.

- Di capai kesepakatan lokasi Pembangunan tanah taopaka tower sesuai hasil pendataan Inventarisasi di lapangan.
- Sosialisasi dihadiri oleh Camat Tayan Hilir, Muspika Tayan Hilir, Kades Cempedak, Kades Tebang Benuah, Tokoh Masyarakat, Panitia Pengadaan Tanah dan ROW PT PLN (Persero) UPK Jaringan Kalimantan 1 dan Pemilik Tanah. (daftar hadir terlampir).
- 3. Pembangunan SUTT 150 kV Tayan Sanggau mencakup:
 - Panjang jalur ± 87 km
 - Jumlah titik tower ± 250 tower
- 4. Daerah yang dilalui jalur SUTT 150 kV Tayan Sanggau di Kecamatan Tayan Hilir adalah :
 - Desa Cempedak
 - Desa Tebang Benuah
- 5. Ruang Bebas:

adalah ruang yang dibatasi oleh bidang vertikal dan horizontal di sekeliling dan di sepanjang saluran udara dimana tidak boleh ada benda didalamnya demi keselamatan manusia, mahluk hidup dan benda lainnya serta keamanan operasi.

- 6. Pengadaan lahan:
 - a. Tanah tapak tower, dibebaskan dengan ganti rugi
 - b. Luas tanah untuk tapak tower:
 - 15 x 15 m² untuk tower lurus
 - 20 x 20 m² untuk tower sudut
 - c. Penetapan nilai ganti rugi berdasarkan musyawarah antara PLN dengan pemilik
- 7. Pembebasan tanam tumbuh:
 - a. Tanam tumbuh yang dibebaskan adalah tanaman/tumbuhan keras dan dibudidayakan yang tingginya mencapai 4 meter, misalnya durian, karet, kelapa, sawit, cempedak, jati, dll.
 - b. Nilai ganti rugi berdasarkan ketentuan tarif yang berlaku di daerah setempat.
- Induksi Medan Magnet & Medan Listrik berdasarkan Standar WHO, SNI dan Depkes untuk SUTET adalah:
 - a. Medan magnet

 $= 0.1 \, \text{mT}$

b. Medan listrik

= 5 kV/m

- 9. Hasil pengukuran medan magnet & medan listrik pada SUTT dan SUTET:
 - a. Medan magnet

= 0,001 - 0,0032 mT

b. Medan listrik

= 1,32 - 2,4 kV/m

Sedangkan hasil pengukuran medan magnet pada handphone adalah 0,6-1,3 mT, Lebih besar bila dibandingkan dengan medan magnet pada SUTT dan SUTET.

10. Sesi Tanya Jawab:

No.	Nama	Saran/Pertanyaan	Tanggapan
1	Barnabas Bujang (Kades Cempedak)	Waktu / Umur dari Konstruksi Tower dan Kabel. Agar Kepala Dusun Selalu di	Umur bangunan di design 20 – 25 thn. Akan ada Mandor Line dari PLN yang akan memantau

		libatkan dalam Proses Pembangunan tapak tower hingga selesai.	3
2	Epianus (Sekdes Tebang Benuah)	Pihak yang menjadi penanggungjawab setelah tower beroprasi.	PLN Wilayah setempat yang mengoprasikan.
3	Julian (Sekertaris DAD Tayan Hilir)	 Status lahan – lahan yang telah di bebaskan pihak PLN setelah tidak terpakai lagi. Ganti Rugi agar bisa di sepakati dengan bijak dsn arif bijaksana. Agar selalu berkoordinasi dengan tokoh adat setempat agar pembangunan tapak tower berjalan dengan baik. Agar Warga dilibatkan dalam proses pembangunan tapak tower. 	Statusnya akan menjadi tanah milik negara sesuai dengan peruntukannya. Bahwa lokasi titik tapak tower dapat bergeser sesuai dengan ketentuan teknik dan peruntukannya. Masyarakat akan dilibatkan dalam pembangunan sesuai dengan ketentuan dalam dokumen UKL / UPL dan ketentuan lainnya.
4	Darem	 Kenapa hanya saya saja yang di undang. 	Yang bersangkutan yang terkena titik tapak tower sesuai dengan data Inventarisasi lapangan.
5	Simensius	 Agar tenaga masyarakat lokal / setempat dapat di libatkan dalam proses pengerjaan tapak tower. 	Masyarakat akan dilibat dalam pembangunan sesuai dengan ketentuan dalam dokumen UKL / UPL dan ketentuan lainnya.
6	Alimin	 Luas tanah tapak tower yang di gunakan untuk tapak tower. Berpa harga tanah permeternya. Tentang Surat - surat tanah. 	• Luas tanah yang digunakan 15 x 15 = 225 m² dan 20 x 20 = 400 m².

Demikian Berita Acara Sosialisasi ini dibuat sesuai dengan keadaan yang sebenarnya.

23. Sanggota P2T PT PLN (Persero) UPK RING KAL 1

24. Anggota P2T PT PLN (Persero) UPK RING KAL 1

Bersama – sama telah melakukan Konsultasi Publik atau Sosialisasi pembangunan tapak tower SUTT 150 kV Tayan – Sanggau di Kantor Kecamatan Balai.

- Sosialisasi dilakukan dengan berpedoman kepada :
 - UU No.2 tahun 2012 tentang Pengadaan Tanah bagi Pelaksanaan Pembangunan untuk Kepentingan Umum.
 - Perpres No. 40 tahun 2014 tentang Perubahan atas Peraturan Presiden No. 71 tahun 2012 tentang Penyelenggaraan Pengadaan Tanah Bagi Pembangunan untuk Kepentingan Umum.
 - Peraturan Kepala Badan Pertanahan Nasional Republik Indonesia No. 05 tahun 2012 tentang Pengadaan Tanah bagi Pelaksanaan Pembangunan untuk Kepentingan Umum.
 - Keputusan Direksi PT PLN (Persero) No. 0289.K/DIR/2013 tentang Pengadaan Tanah untuk Kepentingan Penyediaan Tenaga Listrik, Biaya Oprasional Pengadaan Tanah dan Biaya Oprasional Kompensasi di Lingkup PT PLN (Persero).
 - Rekomendasi Gubernur Kepala Daerah Tingkat I Kalimantan Barat No. 671.1 / 1167 / DPE-C3 tanggal 29 April 2009 tentang Pembangunan Sarana Ketenagalistrikan di kalimantan Barat.

- 6. Keputusan Bupati Sanggau No. 250 Tahun 2014 tanggal 28 April 2014 Tentang Penetapan Lokasi Tower Saluran Udara Tegangan Tinggi 150 kV di Wilayah Tayan Hilir, Tayan Hulu, Parindu, Kapuas dan Mukok.
- 7. Di capai kesepakatan lokasi Pembangunan tanah tapak tower sesuai hasil pendataan Inventarisasi di lapangan.
- Sosialisasi dihadiri oleh Camat Balai, Muspika Balai, Kades Tamiang Mali, Kades Hilir, Kades Kebadu, Kades Senyabung, Kades Tamiang Taba, Tokoh Masyarakat, Panitia Pengadaan Tanah dan ROW PT PLN (Persero) UPK Jaringan Kalimantan 1 dan Pemilik Tanah. (daftar hadir terlampir).
- Pembangunan SUTT 150 kV Tayan Sanggau mencakup :
 - Panjang jalur ± 87 km
 - Jumlah titik tower ± 250 tower
- Daerah yang dilalui jalur SUTT 150 kV Tayan Sanggau di Kecamatan Balai adalah :
 - Desa Temiang Mali
 - Desa Hilir
 - Desa Kebadu
 - Desa Senyabung
 - Desa Temiang Taba
- Ruang Bebas :

adalah ruang yang dibatasi oleh bidang vertikal dan horizontal di sekeliling dan di sepanjang saluran udara dimana tidak boleh ada benda didalamnya demi keselamatan manusia, mahluk hidup dan benda lainnya serta keamanan operasi.

- 6. Pengadaan lahan:
 - Tanah tapak tower, dibebaskan dengan ganti rugi
 - b. Luas tanah untuk tapak tower:
 - 15 x 15 m² untuk tower lurus
 - 20 x 20 m² untuk tower sudut
 - Penetapan nilai ganti rugi berdasarkan musyawarah antara PLN dengan pemilik
- 7. Pembebasan tanam tumbuh:
 - a. Tanam tumbuh yang dibebaskan adalah tanaman/tumbuhan keras dan dibudidayakan yang tingginya mencapai 4 meter, misalnya durian, karet, kelapa, sawit, cempedak, jati, dll.
 - Nilai ganti rugi berdasarkan ketentuan tarif yang berlaku di daerah setempat.
- 8. Induksi Medan Magnet & Medan Listrik berdasarkan Standar WHO, SNI dan Depkes untuk SUTET adalah:
 - a. Medan magnet
- $= 0.1 \, \text{mT}$
- b. Medan listrik
- = 5 kV/m
- Hasil pengukuran medan magnet & medan listrik pada SUTT dan SUTET:
 - a. Medan magnet
- = 0.001 0.0032 mT
- b. Medan listrik
- = 1.32 2.4 kV/m

Sedangkan hasil pengukuran medan magnet pada handphone adalah 0,6 - 1,3 mT, Lebih besar bila dibandingkan dengan medan magnet pada SUTT dan SUTET.

10. Sesi Tanya Jawab :

No.	Nama	Saran/Pertanyaan	Tanggapan
1	Cenghin (Kades Kebadu)	 Mekanisme Pembangunan tapak Tower dan Luasan yang dibebaskan. Apa Jenis tanaman yang dibebaskan bawah Jalur. Apa Jenis tanaman yang di budidayakan dan tidak. 	 Luas tanah yang digunakan 15 x 15 = 225 m² dan 20 x 20 = 400 m². Tanaman dengan tinggi diatas 4 m Tanaman yang di rawat atau dipelihara oleh pemilik tanah dan memiliki nilai ekonomis.
2	Suparman (Kades Hilir)	 Mohon di jelaskan Apa bila Pembangunan tapak tower melintasi bangunan rumah penduduk dapat kompensasi atau tidak. Berapa nilai Ganti Rugi yang akan di terima. 	Kompensasi / ganti rugi sesuai dengan rumusan Permen ESDM No. 038 tahun 2012. Nilai ganti rugi sesuai dengan penilaian oleh tim Penilai / Appraisal / KJPP.
3	Bakri	Mohon di cek kembali tanam tumbuh di dalam tapak tower yang telah di lakukan pendataan	Akan dilakukan Verifikasi data tanah dan Jumlah Tanam tumbuh di dalam tapak tower.
4	Izwardinal	Teknis Pemasangan / Penarikan kabel untuk lokasi yang bangunannya terlintasi jalur. Tanah dibawah jalur dapat dimanfaatkan atau tidak	Teknis pemasangan/ penarikan akan di pasang pengaman pada bangunan tersebut. Dapat dimanfaatkan kembali oleh pemilik tanah.
5	Nicodemus	Berapa luasan tanah yang di bebaskan	 Luas tanah yang digunakan 15 x 15 = 225 m² dan 20 x 20 = 400 m².
6	Yulianus	Berapa nilai ganti rugi jika terkena dibatas tanah dua pemilik.	
7	Bambang	Pemilik yang belum jelas. Harga ganti rugi yang di terima pemilik	Akan dilakukan Verifikasi kembali pemilik tanah. Akan dilakukan penilaian harga oleh tim penilai Appraisal / KJPP

8	Unus	Berapa nilai ganti rugi dan kapan dilaksanakannya.	 Akan dilakukan penilaian harga oleh tim penilai / Appraisal / KJPP Akan dilakasanakan sesuai dengan tahapan – tahapan prosesnya.
9	Yacobus Sidin	 Agar supaya kepemilikan tanah lebih di verifikasi kembali suapaya tidak terjadi kesalahan dalam pembayaran. 	 Akan dilakukan verifikasi menyeluruh di tikat desa dar kecamatan.

Demikian Berita Acara Konsultasi Publik atau Sosialisasi ini dibuat sesuai dengan keadaan yang

sebenarnya.

 - a. Medan magnet
- = 0,001 0,0032 mT
- b. Medan listrik
- = 1,32 2,4 kV/m

Sedangkan hasil pengukuran medan magnet pada handphone adalah $0,6-1,3\,$ mT, Lebih besar bila dibandingkan dengan medan magnet pada SUTT dan SUTET.

10. Sesi Tanya Jawab :

No.	Nama	Saran/Pertanyaan	Tanggapan
1	Sainan	 Bagaiman status penggantian dengan lahan – lahan yang terkena perusahan sawit yang berupa HGU. Kepada siapa Ijin pelaksanaan pembangunan tapak tower tersebut. 	 Akan dilakukan koordinasi dengan pihak perusahaan dan pemda terkait sesuai dengan peruntukannya. Tentunya PLN akan Berkoordinasi / Ijin dengan pihak perusahaan selaku pemegang HGU dan warga selaku pemilik tanah awal.
2	Ucat	Berapa Nilai ganti rugi / Kompensasi yang akan di dapat pemilik lahan / tanah.	Akan dilakukan penilaian harga oleh tim Appraisal / Tim KJPP / Tim Penilai.
3	Triyono (Lurah Beringin)	 Berapa lebar jalur di bawah tapak tower yang akan d tebang dan jenis tanaman apa saja yang akan di tebang. Bagaimana dengan status tanah yang belum diketahui pemiliknya. Bagaimana dengan status bangunan yang ada di bawah jalur ROW. 	 Dengan lebar 20 m dan jenis tanaman di atas 4 m yang berpotensi memasuki area ruang bebas. Akan dilakukan pendataan ulang dan verifikasi pemilik kembali. Akan dilakukan kompensasi sesuai dengan peraturan yang berlaku (Permen ESDM No.038 tahun 2013).
4	Bahtiar	Bagaimana status tanah yang belum memiliki surat menyurat.	Diharapkan warga pemilik tanah dapat membuat surat – menyurat sebagai bukti kepemilikan tanah.
5	Sakdah	Bagaimana status tanah dibawah jalur apakah dapat dimanfaatkan kembali.	Status tanah di bawah jalur dapat dimanfaatkan kembali oleh pemilik tanah dan PLN Menghimbau agar pemilik tanah tidak menanam tanaman dengan ketinggian diatas 4 m.

Demikian Berita Acara Konsultasi Publik atau Sosialisasi ini dibuat sesuai dengan keadaan yang

sebenarnya.

12. Wawan Gunawan : Anggota P2T PT PLN (Persero) UPK RING KAL 1
13. Tatok Hermanto : Anggota P2T PT PLN (Persero) UPK RING KAL 1

14. Muhammad Hidayat : Anggota P2T PT PLN (Persero) UPK RING KAL 1

Bersama – sama telah melakukan Konsultasi Publik atau Sosialisasi pembangunan tapak tower SUTT 150 kV Tayan – Sanggau di Kantor Kecamatan Parindu.

- 1. Sosialisasi dilakukan dengan berpedoman kepada:
 - UU No.2 tahun 2012 tentang Pengadaan Tanah bagi Pelaksanaan Pembangunan untuk Kepentingan Umum.
 - Perpres No. 40 tahun 2014 tentang Perubahan atas Peraturan Presiden No. 71 tahun 2012 tentang Penyelenggaraan Pengadaan Tanah Bagi Pembangunan untuk Kepentingan Umum.
 - Peraturan Kepala Badan Pertanahan Nasional Republik Indonesia No. 05 tahun 2012 tentang Pengadaan Tanah bagi Pelaksanaan Pembangunan untuk Kepentingan Umum.
 - Keputusan Direksi PT PLN (Persero) No. 0289.K/DIR/2013 tentang Pengadaan Tanah untuk Kepentingan Penyediaan Tenaga Listrik, Biaya Oprasional Pengadaan Tanah dan Biaya Oprasional Kompensasi di Lingkup PT PLN (Persero).
 - Rekomendasi Gubernur Kepala Daerah Tingkat I Kalimantan Barat No. 671.1 / 1167 / DPE-C3 tanggal 29 April 2009 tentang Pembangunan Sarana Ketenagalistrikan di kalimantan Barat.
 - Keputusan Bupati Sanggau No. 250 Tahun 2014 tanggal 28 April 2014 Tentang Penetapan Lokasi Tower Saluran Udara Tegangan Tinggi 150 kV di Wilayah Tayan Hilir, Balai, Tayan Hulu, Parindu, Kapuas dan Mukok.

- 7. Di capai kesepakatan lokasi Pembangunan tanah tapak tower sesuai hasil pendataan Inventarisasi di lapangan.
- 2. Sosialisasi dihadiri oleh Camat Parindu, Muspika Parindu, Kades Suka Gerundi, Kades Palem Jaya, Kades Pusat Damai, Kades Sebbara, Tokoh Masyarakat, Panitia Pengadaan Tanah dan ROW PT PLN (Persero) UPK Jaringan Kalimantan 1 dan Pemilik Tanah. (daftar hadir terlampir).
- 3. Pembangunan SUTT 150 kV Tayan Sanggau Sekadau mencakup :
 - Panjang jalur ± 119 km
 - Jumlah titik tower ± 346 tower
- 4. Daerah yang dilalui jalur SUTT 150 kV Tayan Sanggau di Kecamatan Parindu adalah :
 - Desa Suka Gerundi
 - Desa Palem Jaya
 - Desa Pusat Damai
 - Desa Sebbara
- 5. Ruang Bebas:

adalah ruang yang dibatasi oleh bidang vertikal dan horizontal di sekeliling dan di sepanjang saluran udara dimana tidak boleh ada benda didalamnya demi keselamatan manusia, mahluk hidup dan benda lainnya serta keamanan operasi.

- 6. Pengadaan lahan:
 - a. Tanah tapak tower, dibebaskan dengan ganti rugi
 - b. Luas tanah untuk tapak tower:
 - 15 x 15 m² untuk tower lurus
 - 20 x 20 m² untuk tower sudut
 - c. Penetapan nilai ganti rugi berdasarkan musyawarah antara PLN dengan pemilik
- 7. Pembebasan tanam tumbuh:
 - a. Tanam tumbuh yang dibebaskan adalah tanaman/tumbuhan keras dan dibudidayakan yang tingginya mencapai 4 meter, misalnya durian, karet, kelapa, sawit, cempedak, jati, dll.
 - Nilai ganti rugi berdasarkan ketentuan tarif yang berlaku di daerah setempat.
- 8. Induksi Medan Magnet & Medan Listrik berdasarkan Standar WHO, SNI dan Depkes untuk SUTET adalah:

a. Medan magnet

 $= 0.1 \, \text{mT}$

b. Medan listrik

= 5 kV/m

9. Hasil pengukuran medan magnet & medan listrik pada SUTT dan SUTET:

a. Medan magnet = 0,001 - 0,0032 mT

b. Medan listrik

= 1.32 - 2.4 kV/m

Sedangkan hasil pengukuran medan magnet pada handphone adalah 0,6 - 1,3 mT, Lebih besar bila dibandingkan dengan medan magnet pada SUTT dan SUTET.

10. Sesi Tanya Jawab :

No.	Nama	Saran/Pertanyaan	Tanggapan
1	Yulianus	 Mohon keterbukaan untuk masalah harga ganti rugi / kompensasi sesuai dengan aturan yang berlaku. Biaya Pemecahan SHM di tanggung oleh siapa. Berapa nominal biaya kompensasi yang akan di bayarkan. 	dan musyawarah pengumuman harga dilaksanakan secara terbuka dan sesuai dengan harga dar tim Appraisal / penilai / KJPP.
2	Agus	 Kenapa terjadi perbedaan pemakaian luas lahan ada yang 15 x 15 = 225 m² dan 20 x 20 = 400 m². Standar harga antara yang Ber SHM dan SPT gimana. 	dengan peruntukannya, terdapat tower lurus dan sudut sesuai dengan arah
3	Nikodimus	Bagaimana dengan pemiliki tanah yang belum memiliki surat menyurat.	Diharapkan pemilik tanah sudah mulai melengkapi surat – surat kepemilikan tanah agar proses pembayaran dapat segera di laksanakan.
4	Kurbinus	Bagaimana teknis pembebasan tanah yang terkena tanah wakaf atau adat.	Akan dilakukan Verifikasi ulang jika memungkinkan untuk dilakukan pergeseran akan dilakukan pergeseran tapak tower.
5	Dimas	Gimana status tanah - tanah yang terkena jalur.	Selama proses pembangunan akan menjadi tanggung jawab PLN dan kontraktor pelaksana.
6	Antonius	Bagaimana Surat tanah berupa SHM Hilang.	Di harapkan kepada pemilik agar segera mengurus surat – menyurat tanahnya

7	Bukuit	Bagaimanan dengan penggantian tanaman kecil - kecil yang di tebang ketika proses inventarisasi.	Tidak dilakukan penggantian bukan termasuk objek ganti rugi.
8	Petrus yonar	Gimana status tanah yang terkena tapak tower.	 Akan menjadi milik negara dengan luasan pembebasan tanah tapak tower, setelah dilakukan pemecahan.
9	Sartono	Bagaiman terhadap tanah – tanah yang belum diketahui pemiliknya	 Akan dilakukan Verifikasi ulang kepemilikan tanah hingga diketahui pemilik tanah.

Demikian Berita Acara Konsultasi Publik atau Sosialisasi ini dibuat sesuai dengan keadaan yang

sebenarnya.

13. Aulia Rachman Maulana : Anggota Tim Pengadaan Tanah dan ROW PT PLN UPP KITRING KBB 2

14. Nur Cahyani : Anggota Tim Pengadaan Tanah dan ROW PT PLN UPP KITRING KBB 2

Bersama – sama telah melakukan konsultasi publik atau sosialisasi pembangunan tower SUTT 150 kV Sekadau – Sintang di Kantor Desa Bokak Sebumbun.

I. Sosialisasi dilakukan dengan berpedoman kepada :

- UU No.2 tahun 2012 tentang Pengadaan Tanah bagi Pelaksanaan Pembangunan Untuk Kepentingan Umum.
- Perpres No. 40 tahun 2014 tentang Perubahan atas Peraturan Presiden No. 71 tahun 2012 tentang Penyelenggaraan Pengadaan Tanah Bagi Pembangunan untuk Kepentingan Umum.
- Peraturan Kepala Badan Pertanahan Nasional Republik Indonesia No. 05 tahun 2012 tentang Pengadaan Tanah bagi Pelaksanaan Pembangunan Untuk Kepentingan Umum.

- Keputusan Direksi PT PLN (Persero) No. 0289.K/DIR/2013 dan Perdir 0344.P/DIR/2016 tentang Pengadaan Tanah Untuk Kepentingan Penyediaan Tenaga Listrik, Biaya Operasional Pengadaan Tanah dan Biaya Operasional Kompensasi di Lingkup PT PLN (Persero).
- Rekomendasi Gubernur Kepala Daerah Tingkat I Kalimantan Barat No. 671.1 / 1167 / DPE-C3 tanggal 29 April 2009 tentang Pembangunan Sarana Ketenagalistrikan di Kalimantan Barat.
- 6. Keputusan Bupati Sekadau 671.32/ 133 /UMUM/ 2016 tanggal 1 Maret 2016 Tentang Penetapan Lokasi pembangunan Gardu Induk 150 kV dan Tower Saluran Udara Tegangan Tinggi 150kV di Wilayah Kecamatan Sekadau Hilir Desa Gonis Tekam, Peniti, Sungai Ringin, Mungguk, Gonis Tekam, Tapang Semadak Kabupaten Sekadau.
- Dicapai kesepakatan lokasi Pembangunan Tanah tapak tower sesuai hasil pendataan inventarisasi di lapangan.
- II. Sosialisasi dihadiri oleh Camat Sekadau Hilir, Danramil, Kapolsek, Pihak aparat desa, Perwakilan Pemilik Tanah, Tokoh Masyarakat, dan Tim Pengadaan Tanah dan ROW PT PLN UPP KITRING KBB 2.
- III. Pembangunan SUTT 150 kV Sekadau Sintang mencakup :
 - a. Panjang Jalur ± 60 km.
 - b. Jumlah titik tower ± 195 tower.
- IV. Daerah yang dilalui jalur SUTT 150 kV Sekadau –Sintang di Kecamatan Sekadau Hilir adalah :
 - a. Desa Mungguk
 - b. Desa Bokak
 - C.
 - d. Desa Gonis Teka
 - e. m
 - f. Desa Tapang Semadak

V. Ruang Bebas :

Adalah ruang yang dibatasi oleh bidang vertikal dan horizontal di sekeliling dan di sepanjang saluran udara dimana tidak boleh ada benda di dalamnya demi keselamatan manusia, makhluk hidup dan benda lainnya serta keamanan operasi.

VI. Pengadaan Lahan:

- a. Tanah tapak tower, dibebaskan dengan ganti rugi.
- b. Luas tanah untuk tapak tower:
 - 1. 15 x 15 m² untuk tower lurus.
 - 2. 20 x 20 m² untuk tower sudut.

VII. Pembebasan tanam tumbuh:

- a. Tanam tmbuh yang dibebaskan adaah tanaman / tumbuhan keras dan dibudidayakan yang tingginya mencapai 4 meter, misalnya durian, karet, kelapa, sawit, cempedak, jati, dll.
- b. Nilai ganti rugi berdasarkan ketentuan tarif yang berlaku di daerah setempat.

VIII. Induksi Medan Magnet dan Medan Listrik berdasarkan standar WHO, SNI dan Depkes untuk SUTET adalah:

- a. Medan Magnet
- = 0.1 mT
- b. Medan Listrik
- = 5 kV/m

IX. Hasil pengukuran medan magnet dan medan listrik pada SUTT dan SUTET:

- a. Medan Magnet
- = 0.001 0.0032 Mt
- b. Medan Listrik
- = 1,32 2,4 Ky/m

Sedangkan hasil pengukuran medan magnet pada handphone adalah $0,6-1,3\,$ Mt, Lebih besar jika dibandingkan dengan medan magnet pada SUTT maupun SUTET.

X. Tanya Jawab:

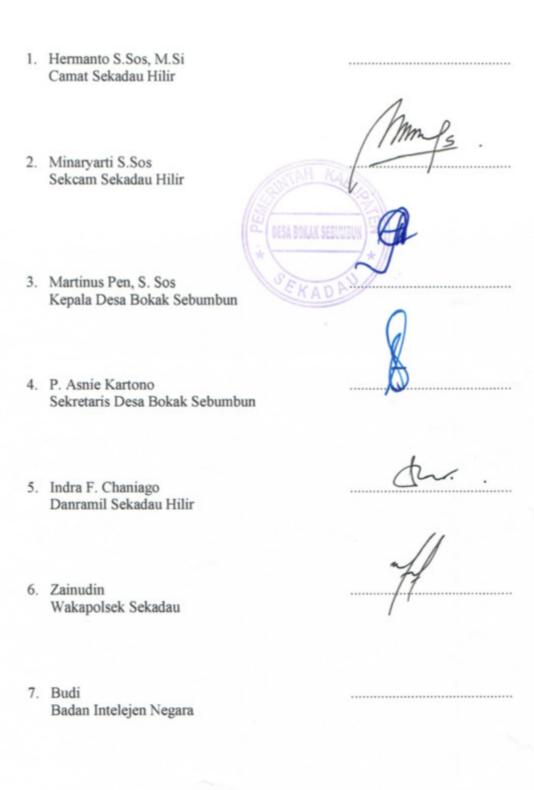

No	Nama	Saran/ Pertanyaan			
1.	Manu	Bagaimana untuk penggantian tanaman yang berada di bawah jalur?			
2.	Iskandar	Bagaimana untuk tanah yang letaknya di pinggir jalan apakah sama harganya dengan yang di dalam hutan?	Untuk harga tanah pasti berbeda pak, karena penentuan harga menggunakan banyak factor baik jarak, jalan, lokasi dsb.		
3.	Sapar	Bagaimana untuk pembangunan tower kyang berada di Tanah Adat yang didalamnya terdapat makam tua? Kita meminta untuk diadakan MUDAS.	persyaratan dan data-data lembaga		

Tim Pengadaan Tanah dan ROW PT PLN UPP KITRING KBB 2

 Nur Cahyani Anggota

Demikian Berita Acara Konsultasi Publik atau Sosialisasi Pembangunan ini dibuat sesuai dengan keadaan yang sebenarnya .

Appendix 10 Project Disclosure

PROJECT INFORMATION BOOKLET/LEAFLET 150 kV TAYAN-SANGGAU –SEKADAU TRANSMISSION LINE (150 kV TSS)

WHAT IS 150 kV TAYAN - SANGGAU-SEKADAU TRANSMISSION LINE?

The proposed Project consists of two 150 kV Transmission lines from Tayan to Sanggau and Sanggau to Sekadau in West Kalimantan; adding the existing substation at Tayan West Kalimantan, and two new 150/20 kV substations in Sanggau and Sekadau.

The 150 kV Transmission lines will improve electric power supply as well as reliability of the power service in Sanggau and Sekadau regencies, West Kalimantan. It is expected that these transmission lines will create multiplier effects in economic development at various scales in Sanggau and Sekadau regencies and surrounding regions in West Kalimantan.

WHO WILL BE IMPLEMENTING THE PROJECT?

The Project proponent is PT Perusahaan Listrik Negara Persero (PT PLN (Persero), a state owned utility company responsible for generation, transmission and distribution of electricity in Indonesia.

The project implementation will be conducted by PT PLN (Persero) Unit Induk Pembangunan (UIP) KALBAGBAR. Development of transmission networks in this project will be under supervision of PLN UPP 2 with office located in Sintang. Once constructed, management of transmission networks is handed over to Transmission Management Unit under PLN Regional office of West Kalimantan which will be responsible for all aspects of the operation and maintenance of transmission networks

WHAT WILL BE THE SCOPE OF 150 kV TSS

The scope of 150 kV TSS will include: (i) construction of two new substation in Sanggau and Sekadau which consist of one 150/20 kV transformer bay with a 30 MVA transformer, four 150 kV line bays, capacitor bank, control building with 20 kV indoor switchgear, computer-based substation control system, protection and metering equipment, telecommunication facilities, AC/DC supply and other accessories, and extention of substation in Tayan, (ii) construction of 360 tower base in located in 7 Sub District, (iii). Installment of 124.4 km of transmission line from Tayan substation to Sekadau substation

ARE THE AFFECTED PEOPLE ENTITLED TO ANYTHING FOR THEIR LOSSES?

Yes, as provided for in the Project resettlement policy agreed by the PLN and the ADB are as follows: All entitlement will be appraised by Independen Appraisal

1. Loss of Land (including agriculture and residential land)

Cash compensation at replacement cost and reflective of fair market value at the time of payment of compensation; or land replacement with at least similar attributes to the acquired land in term of value, productivity, location, and titling. Financial assistance for the renewal of land ownership documents (certificate and land documents recognized as full title) for the residual area of the entitled persons' land.

2. Loss of Ulayat land/ customary land

Land replacement will be provided with similar value or higher (in terms of value, productivity, location, and titling) based on the consultation with customary members and customary leader witnessed by head of villages.

3. Loss of Crops and Trees:

- Annual crops: cash compensation will be paid based on prevailing market rates.
- Perennial crops: compensation at replacement cost taking into account their productivity and age
- Timbers/trees: compensation at current market rate based on age, type of trees and diameter of trunk at breast height

4. Affected Asset under Transmission Lines

a. Agriculture and or residential land

Easement fee in the amount of 15% of the current land value for land area under the transmission line without any deduction of tax (for transaction cost) and administrative cost.

b. Main structure (houses, office etc) and secondary structure

Easement fee in the amount of 15% of full replacement cost reflects prevailing market prices of materials and cost of labor for dismantling, transferring and rebuilding at the time of compensation payment. of building area under the transmission line. No depreciation should be applied

- c. Trees more than 5m tall
- Annual crops: cash compensation will be paid based on prevailing market rates
- Timbers/trees: compensation at current market rate based on age, type of trees and diameter of trunk at breast height

5. Impacts during Construction

- For lease payments of the affected land by the contractor based on the applicable rental fees and agreements with landowners.
- Compensation for non-land assets acquired (trees / plants, structure) permanently affected will be compensated at replacement cost
- Land will be restored to pre-project conditions or even better after the construction is completed

6. Severelly Affected AHs and Vulnerable Group

- Participate in Income restoration program (IRP)
- Priority for Project related employment, where qualified.

WHO ARE ELIGIBLE TO BE COMPENSATED AND ASSISTED UNDER THE PROJECT?

All affected people, households, and institutions/organizations that satisfy the cut-off date for eligibility to project entitlements are eligible to be compensated and assisted under the Project. In this Project, the cut-off-date The cut-off-date of eligibility refers to date when the Inventory of Losses census of AHs was carried out by PLN. The cut-off-date will be varied for each affected villages between March – Sept 2018.

HOW ARE THE GRIEVANCES OF AHS HEARD AND RESOLVED?

A well-defined, gender and culturally sensitive grievance redress and resolution mechanism will be established to resolve AHs grievances and complaints in a timely, transparent and satisfactory manner. All AHs will be made aware of their rights. Following are the grievance redress mechanism

Related To Location of Project Component

- 1. An AP/AH may raise any complaint to the District Head or Head of PLN UIP Kalbagbar
- 2. The District Head establishes a team to assess the complaint
- 3. If the complaint is meritorious, the District Head will ask PLN to find another location for that component of the project. However, if the complaint is not acceptable, the team will recommend the District to reaffirm the project location determination/permit.
- 4. If the aggrieved party is not satisfied with the decision of the District Head, she/he may file the complaint to the court for adjudication.

Related To Inventory of Affected Assets

 An aggrieved AP/AH may appeal the result of the DMS on affected land and other assets found on the affected land (buildings, plants, other objects) to PLN Land Acquisition Committee (PLN LAC)

- 2. PLN LAC within 14 days will verify the results of the DMS on affected assets of the AH and will make necessary revisions/corrections, as needed. If the AH is still not satisfied with the findings of PLN LAC, the AH can bring the appeal matter to the district court for resolution.
- 3. If the grievance/complaint concerns ownership/control of land and/or other assets found on the affected land, PLN LAC will seek a settlement with the contending parties through consultation.
- 4. If the consultation does not produce a settlement, PLN LAC will advise the APs to resolve the case through the court.
- 5. PLN LAC keeps the record of complaints and disputes handled.

Related To Compensation

- An AP/AH who is not satisfied with the amount of compensation initially offered by PLN LAC
 has within 90 days to come into agreement with PLN LAC on the level of compensation for
 affected assets, including income loss for adversely affected business or employment.
- 2. If negotiation on compensation with PLN LAC fails, the AP/AH may file within 14 days to the district court a complaint on the compensation offered by PLN LAC. The court will judge on the case within 30 days.
- 3. If the AP/AH is not satisfied with the decision of the district court, the AP/AH within 14 days following judgment by the district court may bring the case to the Supreme Court and seek a reversal of the ruling of the district court. The Supreme Court will judge on the case within 30 days.

Related To Other Aspects Of the Project

- 1. An aggrieved AP/AH may bring any complaint either to the "Jaya" customary leader in the sub village level, "Temenggung" customarry leader in village level, contractor or project office, in the first instance to seek resolution.
- 2. If the grievance cannot resolved, the AP/AHs may convey the grievance to Head of Village, contractor or project office to seek resolution.
- 3. Ife the grievance cannot resolved, the AP/AHs may convey the grievance to "Pati" customary community in the sub district level before bring to head of sub district to get resolution.
- 4. If the grievance cannot be resolved, the AP/AH may convey the grievance to the district office for resolution.
- 5. If the aggrieved AP/AH is not satisfied with the action taken on the complaint, she/he may file the complaint to the court for final adjudication.

WHAT IS THE TENTATIVE SCHEDULE FOR RCCP PREPARATION AND IMPLEMENTATION?

No.	Task	Timing	
	Preparation		
1	Inventory of Losses (IOL) and Socio Economic Survey (SES)	16 Nov –11 Dec 2015 continued on 12– 16 Jan 2016	
2	Finalization of draft Resettlement Customary Community Plan	August 2016	
3	ADB Approval and uploading to ADB website	August 2016	
4	Resettlement disclosure in component area	August 2016	

No.	Task	Timing		
	RCCP Updating			
5	PLN LAC establishment*)	January 2016		
6	Route and design finalization (including rerouting of tower located inside the forest)	March 2016 - September 2018		
7	Inventory of Losses (IOL)	Dec 2015 – Jan 2016		
8	DMS and socioeconomic survey	February – September 2018		
9	Finalization of updated RCCP	October 2018		
10	Submission of updated RCCP to ADB and its approval	October 2018		
11	Public disclosure of updated RCCP	October 2018		
	Updated RCCP Implementation			
12	Designation of Independent Appraisal a. Tower base and substation b. ROW	a. May 2016 b. March2017		
13	Compensation payment for towers and substation	May 2016 - September 2018		
14	Compensation payment for RoW	September 2018 – March 2019		
15	Delivery of income restoration program for vulnerable & severely AHs	September 2018 and March 2019		
	Monitoring			
16	Internal and External Monitoring (Tower base and RoW)	September 2016 – resettlement completion		

WHO MIGHT BE CONTACTED FOR ANY INQUIRIES ABOUT THE PROJECT?

MEMUTUSKAN:

Menetapkan

:

KESATU

Menetapkan Lokasi Pembangunan Gardu Induk 150 kV dan Tower Saluran Udara Tegangan Tinggi (SUTT) 150 kV Di Wilayah Kecamatan Sekadau Hilir Desa Sungai Kunyit, Peniti, Sungai Ringin, Mungguk, Gonis Tekam, Tapang Semadak Kabupaten Sekadau.

KEDUA

: Lokasi Pembangunan Gardu Induk 150 kV dan Tower Saluran Udara Tegangan Tinggi (SUTT) 150 kV, berada di lokasi sebagai berikut :

- A. Lokasi Pembangunan Tower SUTT 150 kV di wilayah Kecamatan Sekadau Hilir terletak di :
 - Desa Sungai Kunyit sebanyak 8 Lokasi;
 - Desa Peniti sebanyak 31 Lokasi;
 - 3. Desa Sungai Ringin sebanyak 16 Lokasi;
 - 4. Desa Mungguk sebanyak 19 Lokasi;
 - Desa Gonis Tekam sebanyak 38 Lokasi; dan
 - 6. Desa Tapang Semadak sebanyak 23 Lokasi
- B. Untuk rincian detail letak lokasi pembangunan Gardu Induk 150 kV dan Tower SUTT 150 kV di wilayah Kabupaten Sekadau dapat dilihat pada daftar table Tower Schedule Transmisi 150 kV dan peta lokasi sebagaimana tercantum dalam Lampiran Keputusan ini.

KETIGA

Kebutuhan tanah yang diperlukan bagi pembangunan Gardu Induk 150 kV di wilayah Kecamatan Sekadau Hilir sebagaimana dimaksud Diktum KESATU tersebut memerlukan luas tanah ± 3 Ha.

KEEMPAT

Keputusan Bupati ini mulai berlaku pada tanggal ditetapkan.

Ditetapkan di Sekadau pada tanggal 1 Maret 2016

 Peraturan Menteri Dalam Negeri Nomor 1 Tahun 2011 tentang Pembentukan Produk Hukum Daerah.

Memperhatikan

: Surat Menteri Kehutanan Nomor S.100/ Menhut-Vil/ 2014 tentang Persetujuan Prinsip Penggunaan Kawasan Hutan a.n. PT. PLN (Persero) untuk Pembangunan SUTET 275 Kv Bengkayang – Jagoi Babang dan SUTT 150 Kv Singkawang – Bengkayang, Bengkayang – Ngabang, Ngabang – Tayan di Kabupaten Bengkayang, Kabupaten Landak dan Kabupaten Sanggau Provinsi Kalimantan Barat;

MEMUTUSKAN:

Menetapkan

KESATU

: Menetapkan Lokasi Pembangunan Tower Saluran Udara Tegangan Tinggi (SUTT) 150 kV Di Wilayah Kecamatan Tayan Hilir, Balai, Tayan Hulu, Parindu, Kapuas dan Mukok dengan rincian sebagai berikut :

A. Lokasi Pembangunan Tower SUTT 150 kV di Kecamatan Tayan Hijir terletak di :

- 1. Desa Cempedak sebanyak 30 lokasi; dan
- 2. Desa Tebeng Benua sebanyak 24 lokasi.

B. Lokasi Pembangunan Tower SUTT 150 kV di Kecamatan Balai terletak di :

- Desa Makkawing sebanyak 17 lokasi;
- Desa Temlangmali sebanyak 9 lokasi;
- Desa Tae sebanyak 7 lokasi;
- 4. Desa Hilir sebanyak lokasi;
- Desa Kebadu sebanyak 19 lokasi:
- Desa Padekaye sebanyak 15 lokasi;
- 7. Desa Senyabang sebanyak 13 lokasi; dan
- 8. Desa Temiangtaba sebanyak 11 lokasi.

C. Lokesi Pembangunan Tower SUTT 150 kV di Kecamatan Tayan Hulu terletak di :

- Desa Menyabo sebanyak 18 lokasi;
- Desa Sosok sebanyak 15 lokasi;
- Desa Binjai sebanyak 20 lokasi;
- Desa Sukagerundi sebanyak 12 lokasi; dan
- Desa Palemjaya sebanyak 17 lokasi.

D. Lohnsi Fembangunan Tower SUTT 150 kV di Kecamatan Parindu terletak di :

- 1. Desa Pusat Damai sebanyak 18 lokasi; dan
- Desa Sebara sebanyak 18 lokasi.

E. Lohnsi Pembanganan Tower SUTT 150 kV di Kecamatan Kapuas terletak di :

- 1. Desa Lape sebanyak 6 lokasi;
- Desa Sei Mawang sebanyak 14 lokasi;
- 3. Kelurahan Bunut sebanyak 16 lokasi;
- 4. Kelurahan beringin sebanyak 9 lokasi;
- Kelurahan Tenjungkapuse sebanyak 5 lokasi; dan
- Desa Penyeladi sebanyak 21 lokasi.

- P. Lokasi Pembangunan Tower SUTT 150 kV di Kecamatan Mukok terletak di :
 - 1. Desa Semuntai sebanyak 11 lokasi.
- G. Untuk rincian detail letak lokasi pembangunan Tower SUTT 150 kV di wilayah Kabupaten Banggau dapat dilihat pada daftar table Tower Schedule Transmisi 150 kV dan peta lokasi sebagaimana tercantum dalam Lampiran I, II dan III Keputusan Bupati ini.

KEDUA

: Kebutuhan tanah yang diperlukan bagi pembangunan Tower SUTT 150 kV di wilayah 6 Kecamatan sebagaimana dimaksud dalam Diktum KESATU tersebut memerlukan luas tanah 60.890 Meter Persegi (6,9 Ha).

KETIGA

: Keputusan ini mulai berlaku pada tanggal ditetapkan dengan ketentuan apabila terdapat kekeliruan dalam penetapan ini, akan diadakan perbaikan sebagaimana mestinya.

> Ditetapkan di Sanggau pada tanggal 28 April 2014

> > BUPATI SANGGAU,

4. PLN UPP Kitring KBB 4

u.p. Manajer UPP.

Menindaklanjuti surat dari PLN Kantor Pusat Nomor: 2644/STH/02.03/SKOM/2017 tanggal 14 Agustus 2017 perihal Rencana Kerja Anggaran CSR 2018, mohon untuk tiap Unit Pelaksana Proyek segera menyiapkan usulan program Corporate Social Responsibility (CSR) dengan memperhatikan hal-hal sebagai berikut:

Usulan program sesuai dengan sistematika TOR Program terlampir:

2. Sasaran program diutamakan bagi masyarakat/stakeholders yang berada di ring 1 proyek (terkena dampak langsung proyek pekerjaan PLN) yang sedang dan/akan dikerjakan serta untuk lokasi yang tingkat kerawanannya

3. Memiliki tema program menarik dan diutamakan untuk program peningkatan mutu pendidikan masyarakat, program penghijauan/lingkungan hidup. peningkatan ekonomi masyarakat, dan peningkatan mutu kesehatan masyarakat:

4. Usulan program akan dievaluasi dan diajukan ke PLN Kantor Pusat untuk disetujui;

5. Harap untuk segera mengirimkan usulan program paling lambat pada Jumat, 15 September 2017.

Demikian surat ini kami sampaikan, atas perhatiannya diucapkan terima kasih.

GENERAL MANAGER

AJI SUTRISNO 1.88

UNIT INDUS

1. PENDAHULUAN

1.1. LATAR BELAKANG

PT PLN (Persero) Unit Pelaksana Proyek Kalimantan Bagian Barat 2 yang berdudukan di Kabupaten Sintang Provinsi Kalimantan Barat menjalakan 2 proses bisnis utama yaitu pembangunan pembangkit dan jaringan. Pembangkit yang menjadi proyek Unit Pelaksana Proyek Kalimantan Bagian Barat 2 yaitu Proyek PLTU Sintang (3x7 MW), PLTMH Jitan, PLTMH Kalis, dan PLTMH Mahap sedangkan untuk kegiatan pembangunan transmisi atau jaringan yaitu Jalur Tayan - Sanggau - Sekadau - Sintang, Sintang - Nanga Pinoh, Nanga Pinoh-Kota Baru, dan Sintang-Putusibau. Dalam menyelesaikan proyek-proyek tersebut terdapat beberapa hambatan masalah sosial dari masyarakat yang dihadapi, untuk itu perlunya ada pendekatan kepada masyarakat melalui program *Corporate Social Responbility* (CSR) dengan cara mengidentifikasi jenis bantuan yang diberikan kepada masyarakat yang membutuhkan sehingga dapat menjadi nilai bagi perusahaan dalam menyelasaikan proyek.

1.2. NAMA PROGRAM

PLN SAHABAT RAKYAT KALIMANTAN BARAT

1.3. TUJUAN

- a. Sebagai investasi sosial bagi perusahaan
- b. Untuk memperlancar kegiatan pembangunan
- c. Menurunnya kerentanan gejolak sosial karena adanya perhatian dari perusahaan

1.4. SASARAN

- a. Masyarakat
- b. Pemerintah

1.5. MANFAAT

1.5.1. MANFAAT BAGI PLN

Dalam memberikan CSR manfaat bagi perusahaan meningkatnya citra perusahaan dimata masyarakat dan dapat mengurangi gejolak sosial yang terjadi akibat adanya pembangunan yang dilakukan oleh perusahaan.

1.5.2. MANFAAT BAGI MASYARAKAT

Manfaat yang diterima masyarakat dapat membantu kehidupan mereka dan dapat mendukung kegiatan perusahaan.

2. IDENTIFIKASI PROGRAM / PERENCANAAN

2.1. KEBUTUHAN SOSIAL, EKONOMI, LINGKUNGAN, PERMASALAHAN YANG MENGHAMBAT PROSES BISNIS PLN

Permasalahan yang dihadapi oleh perseroan yaitu beberapa masyarakat disekitar daerah proyek Unit Pelaksana Proyek Kalimantan Bagian Barat 2 banyak menentang kegiatan pembangunan sehingga menghambat kinerja/progres perseroan dalam menyelesaikan proyek. Dalam hal ini perlu adanya pendekatan kepada masyarakat sehingga dapat membantu kegiatan pembangunan, salah satu cara yang dapat dilakukan dengan memberi bantuan Corporate Social Responbility kepada daerah sekitar yang terkena dampak pembangunan Pembangkit dan Jaringan dari Unit Pelaksana Proyek Kalimantan Bagian Barat 2.

2.2. NAMA PROGRAM

PLN SAHABAT RAKYAT KALIMANTAN BARAT

2.3. AKSI - AKSI YANG DILAKUKAN

2.3.1. Fasilitas Olahraga Untuk Desa Anggah Jaya dan Kelurahan Kedabang

Pembangunan proyek PLTU Sintang (3x7MW) yang berada disekitar Desa Anggah Jaya Kecamatan Sintang Kabupaten Sintang Kalimantan Barat menimbulkan dampak bagi warga sekitar, banyak warga sekitar yang beranggapan bahwa pembangunan PLTU Sintang (3x7MW) hanya untuk kepentingan perseroan semata. Kami melihat belum adanya fasilitas olahraga khususnya lapangan sepakbola di Desa Anggah Jaya dan adanya lahan hutan milik Desa yang dapat difungsikan sebagai lapangan sepakbola namun masih perlu dilakukan pembersihan hutan sehingga dapat digunakan sebagai bermain sepakbola untuk warga Desa Anggah Jaya.

Letak PLTU Sintang secara administratif berada di Kelurahan Kedabang Kecamatan Sintang Kabupaten Sintang juga memberikan dampak bagi sekitar terutama dalam hal pengangkutan batubara dan tingkat kebisingan. Hal ini perlu dilakukan pencegahan agar tidak terjadinya konflik, sehingga dengan memberikan bantuan CSR berupa fasilitas olahraga untuk masyarakat kedabang dapat menjadi jembatan bagi perusahaan untuk menjalin hubungan baik dengan masyarakat.

2.3.2. Pembuatan Halte Bus

Jalur transmisi Tayan – Sanggau – Sekadau yang merupakan Paket 6 dan Paket 7 yang melewati desa Lape Kecamatan Kapuas Kabupaten Sanggau, melihat warga sekitar Desa Lape Kecamatan Kapuas selalu menunggu Bus ataupun travel di Pinggir jalan raya sehingga perlunya di berikan bantuan dalam bentuk Halte sehingga memudahkan masyarakat sekitar dalam menunggu bus ataupun travel.

2.3.3. Bantuan Ternak Ayam atau Bebek

Dalam menjalankan proyek pekerjaan transmisi Tayan – Sanggau dan Sanggau – Sintang (Paket 6 dan Paket 7), ada dampak yang harus diterima oleh pemilik lahan SUTT dan yang terkena Kabel SUTT. Sehingga perlu diberi bantuan untuk masyarakat yang terkena dampak agar tetap dapat mendapatkan penghasilan.

2.3.4. Bantuan Air Bersih dan Penampungan Air

Kecamatan Balai merupakan salah satu kecamatan yang dilalui jalur pembangunan transmisi oleh Unit Pelaksana Proyek Kalimantan Bagian Barat 2, warga sekitar proyek masih banyak yang belum merasakan fasilitas air bersih sehingga warga dapat meningkatkan tingkat kesehatannya.

Revis Surat Persetujuan Anggaran

Program TJSL/CSR Tahun 2018

26 Maret 2018

Kepada Yth. General Manager PT PLN (Persero) UIP

KALIMANTAN BAGIAN BARAT JI Letjen Soeprapto No. 50 G

PONTIANAK,

KALIMANTAN BARAT

Sehubungan dengan surat PT PLN (Persero) UIP KALBAGBAR Nomor 0881/STH.02.02/UIP KALBAGBAR/2018 tanggal 13 Maret 2018 Perihal Penyampaian Revisi Usulan Rencana Kerja Anggaran CSR Tahun 2018 dan menyusuli surat KSKOM Nomor 0787/STH.02.02/ SKOM/2018 tanggal 28 Februari 2018, dengan ini disampaikan sebagai berikut:

- Setelah dilakukan evaluasi usulan program TJSL/CSR unit Saudara, dengan memperhatikan kriteria sebagai berikut :
 - Program recommended (diprioritaskan yang mendapatkan rekomendasi stakeholders utama);
 - b. Lokasi (diutamakan yang berada di Ring-1);
 - Kondisi calon penerima manfaat (diprioritaskan untuk masyarakat terdampak proyek/aset perusahaan dan atau kurang mampu);
 - Jenis program bantuan (diprioritaskan untuk program pemberdayaan masyarakat/program inovatif/program kreatif/unik dan atau mempunyai potensi mandiri);
 - e. Kontra prestasi (diprioritaskan program yang memberikan kontra prestasi yang memadai bagi perusahaan)

Dengan ini kami sampaikan Persetujuan Tambahan Program/Revisi Anggaran TJSL/CSR 2018 Unit Saudara yang semula sebesar **Rp. 1.315.000.000,-** menjadi sebesar **Rp 1.075.000.000** (terbilang: *Satu Milyar Tujuh Puluh Lima Juta Rupiah*) bersumber dari Anggaran Operasi PLN Kantor Pusat Tahun 2018..

- Atas dasar surat persetujuan ini, saudara dapat segera mengusulkan rencana disburse dan droping dana Tahun 2018 ke Kepala Satuan Komunikasi Korporat (KSKOM) untuk diproses lebih lanjut, sesuai mekanisme dana imprest yang berlaku (formulir permohonan droping terlampir -1).
 Unit yang bersangkutan agar selalu berkoordinasi dan memonitor iadwal droping
 - Unit yang bersangkutan agar selalu berkoordinasi dan memonitor jadwal droping dimaksud.
- Kelengkapan dokumen sebagai syarat administrasi pembayaran ke Penerima Manfaat adalah sebagai berikut:
 - Ada dasar pelaksanaan program antara lain dapat berupa Surat Permohonan, proposal (program eksternal), TOR atau dasar lainnya yang mendukung program;
 - Evaluasi kelayakan program;
 - c. Risalah hasil survey;
 - d. Dokumen pembayaran antara lain kwitansi dan dokumen pembayaran lainnya:

PT PLN (PERSERO) KANTOR PUSAT

Halaman	No.	
Surat	No.	
Tanggal		

- e. Dokumen penyerahan bantuan berupa Berita Acara Serah Terima Bantuan dan Komitmen Bantuan.
- Dokumen Perjanjian Kerjasama atas Bantuan, bila ada.
- g. Laporan Realisasi program dan dokumentasi yang memadai.
- Program TJSL/CSR ini merupakan beban TJSL/CSR Kantor Pusat, oleh karena itu seluruh pembiayaan program TJSL/CSR agar dinota bukukan ke PLN Kantor Pusat sesuai prosedur nota buku yang berlaku dan sesuai kode akun masing-masing (format nota buku terlampir-2).
- Laporan pelaksanaan program TJSL/CSR dilakukan setiap selesai program setiap bulan, sedangkan rangkuman seluruh program dilaporkan setiap triwulan, paling lambat 10 hari setelah akhir triwulan (Format laporan terlampir-3).
- Laporan pelaksanaan program harus sesuai dengan yang telah dinota bukukan, untuk itu agar dilakukan rekonsiliasi setiap bulannya.

Membuat Laporan Khusus untuk Program Unggulan yang memberi dampak pemberdayaan ekonomi maupun meningkatkan kesejahteraan masyarakat dan pelestarian lingkungan.

Dengan adanya persetujuan ini, pelaksanaan program sepenuhnya menjadi tanggungjawab Saudara atas kebenaran, akuntabilitas, kewajaran dan kesesuaian dengan ketentuan SOP dan prinsip-prinsip *Good Corporate Governance (GCG)*, serta penetapan ini tidak membebaskan Saudara dari tanggung jawab, sejak perencanaan sampai dengan selesainya program, termasuk harga satuan, volume (kuantitas) dan kualitas, serta penyerapan anggaran dapat mencapai 100%.

Demikian disampaikan untuk dilaksanakan dengan penuh tanggung jawab dan atas kerjasamanya diucapkan terima kasih.

: Surat Persetujuan Anggaran

Program TJSL/CSR Tahun 2018

28 Februari 2018

Kepada Yth. General Manager PT PLN (Persero) UIP

KALIMANTAN BAGIAN BARAT JI Letjen Soeprapto No. 50 G

PONTIANAK.

KALIMANTAN BARAT

Sehubungan dengan program Tanggung Jawab Sosial dan Lingkungan (TJSL)/CSR PT PLN (Persero) tahun 2018, dengan ini disampaikan sebagai berikut:

- 1. Setelah dilakukan evaluasi usulan program TJSL/CSR unit Saudara, dengan memperhatikan kriteria sebagai berikut :
 - a. Program recommended (diprioritaskan yang mendapatkan rekomendasi stakeholders utama);

b. Lokasi (diutamakan yang berada di Ring-1);

Kondisi calon penerima manfaat (diprioritaskan untuk masyarakat terdampak proyek/aset perusahaan dan atau kurang mampu);

- program bantuan (diprioritaskan untuk program pemberdayaan masyarakat/program inovatif/program kreatif/unik dan atau mempunyai potensi
- e. Kontra prestasi (diprioritaskan program yang memberikan kontra prestasi yang memadai bagi perusahaan)

Dengan ini kami sampaikan Persetujuan anggaran TJSL/CSR 2018 Unit Saudara sebesar Rp. 1.315.000.000,- (terbilang : Satu milyar tiga ratus lima belas juta rupiah) bersumber dari Anggaran Operasi PLN Kantor Pusat Tahun 2018.

- Atas dasar surat persetujuan ini, saudara dapat segera mengusulkan rencana disburse dan droping dana Tahun 2018 ke Kepala Satuan Komunikasi Korporat (KSKOM) untuk diproses lebih lanjut, sesuai mekanisme dana imprest yang berlaku (formulir permohonan droping terlampir -1). Unit yang bersangkutan agar selalu berkoordinasi dan memonitor jadwal droping dimaksud.
- 3. Kelengkapan dokumen sebagai syarat administrasi pembayaran ke Penerima Manfaat adalah sebagai berikut:
 - Ada dasar pelaksanaan program antara lain dapat berupa Surat Permohonan, proposal (program eksternal), TOR atau dasar lainnya yang mendukung program;
 - Evaluasi kelayakan program;
 - c. Risalah hasil survey;
 - Dokumen pembayaran antara lain kwitansi dan dokumen pembayaran lainnya;
 - e. Dokumen penyerahan bantuan berupa Berita Acara Serah Terima Bantuan dan Komitmen Bantuan.

PT PLN (PERSERO) KANTOR PUSAT

Halaman	No.	
Surat	No.	
Tanggal		

- f. Dokumen Perjanjian Kerjasama atas Bantuan, bila ada.
- g. Laporan Realisasi program dan dokumentasi yang memadai.
- Program TJSL/CSR ini merupakan beban TJSL/CSR Kantor Pusat, oleh karena itu seluruh pembiayaan program TJSL/CSR agar dinota bukukan ke PLN Kantor Pusat sesuai prosedur nota buku yang berlaku dan sesuai kode akun masing-masing (format nota buku terlampir-2).
- Laporan pelaksanaan program TJSL/CSR dilakukan setiap selesai program setiap bulan, sedangkan rangkuman seluruh program dilaporkan setiap triwulan, paling lambat 10 hari setelah akhir triwulan (Format laporan terlampir-3).
- Laporan pelaksanaan program harus sesuai dengan yang telah dinota bukukan, untuk itu agar dilakukan rekonsiliasi setiap bulannya.

Membuat Laporan Khusus untuk Program Unggulan yang memberi dampak pemberdayaan ekonomi maupun meningkatkan kesejahteraan masyarakat dan pelestarian lingkungan.

Dengan adanya persetujuan ini, pelaksanaan program sepenuhnya menjadi tanggungjawab Saudara atas kebenaran, akuntabilitas, kewajaran dan kesesuaian dengan ketentuan SOP dan prinsip-prinsip *Good Corporate Governance (GCG)*, serta penetapan ini tidak membebaskan Saudara dari tanggung jawab, sejak perencanaan sampai dengan selesainya program, termasuk harga satuan, volume (kuantitas) dan kualitas, serta penyerapan anggaran dapat mencapai 100%.

Demikian disampaikan untuk dilaksanakan dengan penuh tanggung jawab dan atas kerjasamanya diucapkan terima kasih.

Undangan Pelaksanaan Program CSR PT PLN (Persero) UIP KALBAGBAR Kepada : *) Terlampir

Dengan Hormat,

Sehubungan akan dilaksanakan program CSR (Corporate Social Responsibility) oleh PT PLN (Persero) UIP Kalimantan Bagian Barat berupa Bantuan Ternak Ayam dan Pelatihan Budidaya Ayam, dengan ini bermaksud untuk mengundang Bapak/Ibu untuk hadir dalam acara tersebut yang akan dilaksanakan pada:

Hari, tanggal : Selasa, 18 September 2018

Waktu : 09.00 WIB - Selasa

Tempat : Aula Mess Pemerintah Kabupaten Sekadau (Depan Hotel

Pelangi)

Untuk PIC kegiatan tersebut diatas dapat menghubungi Hendy (082390778282).

Demikian disampaikan, atas perhatian dan kerjasamanya kami ucapkan terima kasih.

MANAJER

DJOKO PRIBADI

- *) Terlampir (Untuk dihadiri)
 - 1. Camat Mukok
 - 2. Camat Sekadau Hilir
 - 3. Kepala Desa Semuntai
 - 4. Kepala Desa Sunyai Kunyit
 - 5. Kepala Desa Peniti
 - Kepala Desa Ensalang
 - 7. Kepala Desa Sei Ringin
 - 8. Kepala Desa Mungguk
 - 9. Penerima Bantuan

Appendix 13 Guide to Developing Indicator

Guide to Developing Monitoring Indicators¹

Internal Monitoring

Monitoring Aspects	Potential Indicators	
Delivery of Entitlements	• Entitlements disbursed, compared with number and category of losses set out in the	
	entitlement matrix.	
	Disbursements against timelines.	
	• Identification of the displaced persons losing land temporarily, e.g. through soil disposal,	
	borrow pits, contractors' camps, been included.	
	• Timely disbursements of the agreed transport costs, relocation costs, income substitution	
	support, and any resettlement allowances, according to schedule.	
	 Provision of replacement land plots. Quality of new plots and issue of land titles. 	
	Restoration of social infrastructure and services.	
	 Progress on income and livelihood restoration activities being implemented as set out in the 	
	income restoration plan, for example, utilizing replacement land, commencement of	
	production, the number of the displaced persons trained in employment with jobs,	
	microcredit disbursed, number of income-generating activities assisted.	
	Affected businesses receiving entitlements, including transfer and payments for net losses	
	resulting from lost business.	
Consultation and Grievances	• Consultations organized as scheduled including meetings, groups, and community activities.	
	Knowledge of entitlements by the displaced persons.	
	• Use of the grievance redress mechanism by the displaced persons.	
	• Information on the resolution of the grievances.	
	 Information on the implementation of the social preparation phase. 	
	Implementation of special measures for Indigenous Peoples.	
Communications and	 Number of general meetings (for both men and women). 	
Participation	Percentage of women out of total participants.	
	Number of meetings exclusively with women.	
	Number of meetings exclusively with vulnerable groups.	
	Number of meetings at new sites.	
	Number of meetings between hosts and the displaced persons.	
	• Level of participation in meetings (of women, men, and vulnerable groups).	
	 Level of information communicated—adequate or inadequate. Information disclosure. 	
Budget and Time Frame	 Translation of information disclosure in the local languages. Land acquisition and resettlement staff appointed and mobilized on schedule for the field 	
Budget and Time Trame	and office work.	
	 Capacity building and training activities completed on schedule. 	
	 Achieving resettlement implementation activities against the agreed implementation plan. 	
	• Funds allocation for resettlement to resettlement agencies on time.	
	Receipt of scheduled funds by resettlement offices.	
	• Funds disbursement according to the LARP.	
	Social preparation phase as per schedule.	
	Land acquisition and occupation in time for implementation.	
Livelihood and Income	Number of displaced persons under the rehabilitation programs (women, men, and	
Restoration	vulnerable groups).	
	Number of displaced persons who received vocational training (women, men, and	
	vulnerable groups).	
	Types of training and number of participants in each.	

¹ ADB. Involuntary Resettlement Safeguards: A Planning and Implementation Good Practice Sourcebook – Draft Working Document. November 2012

Monitoring Aspects	Potential Indicators		
	Number and percentage of displaced persons covered under livelihood programs (women,		
	men, and vulnerable groups).		
	Number of displaced persons who have restored their income and livelihood patterns		
	(women, men, and vulnerable groups).		
	Number of new employment activities.		
	Extent of participation in rehabilitation programs.		
	Extent of participation in vocational training programs.		
	Degree of satisfaction with support received for livelihood programs.		
	• Percentage of successful enterprises breaking even (women, men, and vulnerable groups).		
	 Percentage of displaced persons who improved their income (women, men, and vulnerable groups) 		
	 Percentage of displaced persons who improved their standard of living (women, men, and vulnerable groups) 		
	 Number of displaced persons with replacement agriculture land (women, men, and vulnerable groups) 		
	 Quantity of land owned/contracted by displaced persons (women, men and vulnerable groups) 		
	Number. of households with agricultural equipment		
	Number of households with livestock		
Benefit Monitoring	 Noticeable changes in patterns of occupation, production, and resource use compared to the pre-project situation. 		
	 Noticeable changes in income and expenditure patterns compared to the pre-project situation. 		
	Changes in cost of living compared to the pre-project situation.		
	Changes in key social and cultural parameters relating to living standards.		
	Changes occurred for vulnerable groups.		
	Benefiting from the project by the displaced persons.		

External Monitoring Indicators

Monitoring Indicator Basis for Indicator			
Monitoring Indicator			
Basic information on	Location of the project		
displaced persons'	Composition and structure, ages, educational, and skill levels		
households	Gender of household head		
	Ethnic group		
(Gender disaggregated	 Access to health, education, utilities, and other social services 		
data essential for all	Housing type		
aspects)	Land and other resource-owning and resource-using patterns		
,	Occupations and employment patterns		
	Income sources and levels		
	Agricultural production data (for rural households)		
	Participation in neighborhood or community groups		
	Access to cultural sites and events		
	Valuation of all assets		
Restoration of living	Were house compensation payments made free of depreciation, fees, or transfer costs to the displaced		
standards	persons?		
	• Have displaced persons adopted the housing options developed?		
	Have perceptions of community been restored?		
	Have displaced persons achieved replacement of key social and cultural elements?		
Restoration of livelihoods	• Were compensation payments free of deductions for depreciation, fees, or transfer costs to the displaced persons?		
(Disaggregate data for	 Were compensation payments sufficient to replace lost assets? 		
displaced persons moving			
to group resettlement sites,	• Did income substitution allow for reestablishment of enterprises and production?		
self-relocating displaced	Have affected enterprises received sufficient assistance to reestablish themselves?		
22 23.000	Have vulnerable groups been provided income-earning opportunities?		

Monitoring Indicator	Basis for Indicator		
persons, displaced persons	sons, displaced persons • Are these opportunities effective and sustainable?		
with enterprises affected)	ected) • Do jobs provided restore pre-project income levels and living standards?		
Levels of displaced	How much do the displaced persons know about resettlement procedures and entitlements?		
persons' satisfaction	Do the displaced persons know their entitlements?		
	Do they know whether these have been met?		
	How do the displaced persons assess the extent to which their own living standards and livelihoods have		
	been restored?		
	How much do the displaced persons know about grievance procedures and conflict resolution		
	procedures?		
Effectiveness of	Were the displaced persons and their assets correctly enumerated?		
resettlement planning	• Was the time frame and budget sufficient to meet objectives, were there institutional constraints?		
	Were entitlements too generous?		
	Were vulnerable groups identified and assisted?		
	How did resettlement implementers deal with unforeseen problems?		

Appendix 14 Term of Reference External Monitoring

Independent Monitoring Agency (IMA) T/L 150 Kv Tayan – Sanggau- Sekadau Di Kalimantan Barat Tahun 2016

1 LATAR BELAKANG

Rencana jangka panjang PT PLN (Persero) membangun dan mengembangkan Sistem Kelistrikan di Pulau Kalimantan adalah menginterkoneksikan seluruh Sistem Tenaga Listrik (STL). Saat ini STL di Kalimantan dibagi menjadi 3 wilayah besar yaitu Kalimantan Timur, Kalimantan Tengah - Selatan, dan Kalimantan Timur - Utara.

Pemerintah Indonesia cq PT. PLN (Persero) , dengan dana bantuan dari Multi-tranche pembiayaan fasilitas (MFF) dari Asian Development Bank (ADB), menerapkan pengembangan sumber daya kelistrikan secara bertahap, diantaranya pekerjaan 150 kV Sanggau-Sekadau Transmission Line yang akan dibangun sebagai perluasan West Kalimantan 150 kV Transmission Line Project Strengthening West Kalimantan Power Grid yang dimaksudkan untuk meningkatkan keandalan pasokan listrik melalui transmisi listrik trans-perbatasan dari perbatasan 275 kV TL Bengkayang-Malaysia, dan meningkatkan rasio elektrifikasi Indonesia khususnya Kalimantan Barat. Proyek yang diusulkan terdiri pembangunan dua ruas saluran transmisi 150 kV dari Tayan ke Sanggau dan Sanggau ke Sekadau; penambahan gardu yang ada di Tayan, dan pembangunan dua gardu baru dengan kapasitas 150/20 kV di Sanggau dan Sekadau.

Pekerjaan ini secara signifikan melibatkan pemilik, penggarap atau pengguna lahan/aset dan bisa terjadi pengalih fungsian aset atau alih profesi orang yang berada rencana tapak tower SUTT, lokasi Gardu Induk dan jalur ruang bebas/RoW.

Pada Prinsipnya PLN dan ADB menghendaki pekerjaan ini memberikan kontribusi terhadap kehidupan sosial ekonomi warga terkena dampak dan sekitar lokasi pekerjaan, memberikan kesempatan untuk warga terkena dampak sekurang-kurangnya mempertahankan standar hidup mereka, dan dampak yang ditimbulkan bisa diminimalkan. Untuk memastikan hal ini Resettlement and Customary Communities Plan (RCCP) disusun, sesuai dengan Safeguard Policy ADB dan harmonis dengan Peraturan-Peraturan yang diberlakukan oleh Pemerintah Indonesia serta dan kebijakan PLN.

Untuk memastikan pelaksanaan penggantian ganti rugi, kompensasi dan penanganan dampak lainnya) dilaksanakan sesuai dengan ketentuan yang disepakati dalam dokumen RCCP yang disetujui, maka diperlukan kegiatan monitoring oleh Independent Monitoring Agency (IMA).

2 TUJUAN

a. Memonitor dan mengevaluasi pelaksanaan pengadaan tanah dan pemberian ganti rugi pada tapak tower,gardu induk dan pemberian kompensasi pada aset dibawah ROW apakah sudah sesuai dengan rencana aksi (action plan) sebagaima tertuang dalam dokumen RCCP, serta mengidentifikasi faktor-faktor penyebabnya jika rencana aksi tidak dapat terlaksana.

- b. Menilai pengaruh pembangunan transmission line terhadap perubahan kehidupan ekonomi, pendapatan dan mata pencaharian hidup.
- menilai restorasi dan atau perbaikan basis ekonomi dan sosial dari warga sekitar yang terkena dampak.
- d. Menilai efektivitas dan keberlanjutan hak warga terkena dampak atas kegiatan ekonomi dan asset yang dimilikinya.
- e. Merumuskan tindakan mitigasi lanjut atas dampak yang ditimbulkan dari pembangunan transmission line terhadap warga terkena dampak.
- f. Mendapatkan contoh yang baik (*best practice*) mengenai pengadaan tanah dan pemukiman kembali di lapangan, termasuk mengidentifikasi faktor-faktor yang diperlukan guna menghasilkan suatu hasil yang baik tersebut.
- g. Memberikan masukan atau saran perbaikan dalam pelaksanaan paket-paket berbantuan yang akan datang.

3 PERATURAN PERUNDANG-UNDANGAN

Penyusunan Dokumen Independent Monitoring Agency (IMA) Tayan – Sanggau - Sekadau ini harus memperhatikan peraturan perundang-undangan dan standar yang berlaku, diantaranya namun tidak terbatas pada hal-hal berikut ini:

- a. UU dan Peraturan terkait pengadaan tanah; Perpres No. 36/2005, Perpres No. 65/2006, UU No 2 Tahun 2012 tentang Pengadaan Tanah Bagi Pembangunan Untuk Kepentingan Umum
- b. Keputusan Direksi PT PLN (Persero) No 0289.K/DIR/2013 tentang Pengadaan Tanah untuk Kepentingan Penyediaan Tenaga Listrik, Biaya Operasional Pengadaan Tanah dan Biaya Operasional Kompensasi di Lingkungan PT PLN (Persero)
- c. ADB Safeguard Policy Statement (2009)yang mencakup kebijakan pemindahan tidak sukarela, masyarakat adat dan lingkungan.
- d. Peraturan-peraturan daerah yang terkait.

4 URAIAN RENCANA USAHA DAN/ATAU KEGIATAN

4.1 Identitas Pemrakarsa

Nama Pemrakarsa : PT. PLN (Persero) UIP X

Penanggung Jawab : General Manager

Jenis Perusahaan : BUMN

Alamat : JI.MT.Haryono No. 384 Balikpapan

Kalimantan Timur (76114)

Telepon : 0542-871559 Faksimile : 0542-871558

4.2 Rencana Lokasi Kegiatan

Jalan : Tersebar

Kecamatan : Tayan Hilir, Balai, Tayan Hulu, Parindu, Kapuas, Mukok

dan Sekadau Hilir

Kabuputen/Kota : Sanggau dan Sekadau

Provinsi : Kalimantan Barat

5 DESKRIPSI PROYEK

Pembangunan 150 Kv Tayan – Sanggau-Sekadau Transmission Line adalah perluasan West Kalimantan 150 kV Transmission Line Project Strengthening West Kalimantan Power Grid yang dimaksudkan untuk meningkatkan keandalan pasokan listrik melalui transmisi listrik trans-perbatasan dari perbatasan 275 kV TL Bengkayang-Malaysia

Saluran transmisi terdiri dari 313 tower melintasi 25 (dua puluh lima) desa di 7 (tujuh) kecamatan di Kabupaten Sanggau dan Sekadau

150 kV Tayan – Sanggau – Sekadau Transmission Line terdiri dari;

- 1. Pembangunan Garu Induk (GI) di Desa Sungai Mawang, Kecamatan Kapuas, Kabupaten Sanggau yang membutuhkan tanah seluas 1.535 Ha
- 2. Pembangunan Garu Induk (GI) di Desa Sungai Kuring, Kecamatan Sekadau Hilir, Kabupaten Sekadau yang membutuhkan tanah seluas 1.37 Ha
- 3. Pembangunan 313 towers SUTT 150 kV (21 menara sudut dan 298 menara normal, 14 tower yang terletak di tanah milih departemene Kehutanan akan di reroute) sepanjang 148.42 km (ruas Tayan Sanggau 71.13 km) dan (ruas Sanggau Sekadau sepanjang 77.29 km).
- 4. Penarikan kawat (stringing) double sirkuit sepanjang jalur 148.42 km Tayan Sanggau _ Sekadau

Jalur transmisi 150 kV Tayan – Sanggau melalui 16 Desa, di 5 Kecamatan di Kabupaten Sanggau dan jalur transmisi 150kV Sanggau –Sekadau melalui 9 Desa di 3 Kecamatan di Kabupaten Sekadau seperti pada table di bawah ini.

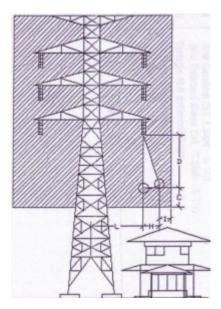

NO	District	Sub District	Village

			Sungai Ringin

Ruang Bebas dan ROW Transmisi

Sesuai Peraturan Menteri Energi dan Sumber Daya Mineral No 18 tahun 2015, Ruang Bebas adalah ruang yang dibatasi oleh bidang vertikal dan horizontal di sekeliling dan di sepanjang konduktor SUTT,SUTET dan SUTTAS dimana tidak boleh ada benda di dalamnya demi keselamatan manusia, makhluk hidup dan benda lainnya serta keamanan operasi SUTT, SUTET dan SUTTAS

Jarak bebas minimum horizontal dari sumbu vertical menara/tiang adalah jarak terpendek secara horizontal dari sumbu vertical menara/tiang ke bidang vertical ruang bebas; bidang vertical tersebut sejajar dengan sumbu vertical menara/tiang dan konduktor.Besarnya Jarak Minimum Horizontal dapat dilihat pada Tabel 5.2 dan dilustrasikan pada Gambar1.dibawah ini.

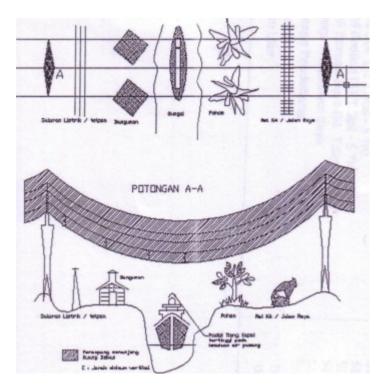

Gambar 5.1 Jarak Minimum Horizontal Tower SUTT 150 KV

Tabel.5.1 Jarak Bebas Minimum Horizontal

Saluran Udara	SUTT 150 KV
Jarak dari Sumbu Vertikal Menara ke Konduktor (L)	4,20 meter
Jarak datar Akibat Ayunan Konduktor (H)	3,76 meter
Jarak Bebas Impuls Petir (I)	1,50 meter

Total (L + H + I) 9,46 z. 10 meter	-
------------------------------------	---

Jarak bebas minimum vertikal dari konduktor adalah terpendek jarak vertikal SUTT **SUTET** secara antara konduktor atau dengan permukaan bumi atau bends di atas permukaan bumi yang tidak boleh kurang dari jarak yang telah ditetapkan demi keselamatan manusia, makhluk hidup dan benda lainnya serta keamanan operasi SUTT dan SUTET.

B. GARDU INDUK

Gardu induk merupakan salah satu komponen sistem tenaga listrik yang memegang peranan penting dalam penyaluran energi dan pengaturan beban.Gardu induk merupakan pusat pengaturan, pusat pemulihan dari gangguan, pusat pencatatan besaran listrik dan pusat penurunan atau kenaikan tegangan.

Secara singkat, komponen-komponen gardu induk adalah sebagai berikut :

a. Trafo Tegangan

Trafo tegangan berupa transformator satu fasa step down yang mentransformasi tegangan pada jaringan tegangan tinggi ke suatu sistem tegangan rendah.

b. Trafo Arus

Trafo arus berupa transformator yang digunakan untuk pengukuran arus yang besarnya hingga ratusan ampere dan arus yang mengalir pada jaringan tegangan tinggi atau tegangan menengah. Di samping untuk pengukuran arus, transformator arus juga digunakan untuk pengukuran daya dan energifo Arus lCurebt Transformers)

c. Pemutus Daya / Ch-cuit Breaker ICB)

Circuit Breaker atau Pemutus Daya IPMT) adalah peralatan pada sistem tenaga listrik yang berfungsi untuk memutuskan hubungan antara sisi sumber tenaga listrik dan sisi beban yang dapat bekerja.

6. LINGKUP PEKERJAAN

Lingkup pekerjaan adalah semua kegiatan yang harus dilaksanakan dalam penyusunan dokumen Independent Monitoring Agency (IMA) T/L150 Kv Bengkayang – Tayan, antara lain:

Monitoring Proses Penyusunan RCCP

- 1. Kualitas pengumpulan data dasar
 - Pengumpulan data dasar tentang informasi sosial ekonomi warga terkena dampak melalui sampel survey warga terkena dampak. Hal ini digunakan untuk menilai reliabilitas dan validitas data survei RCCP.
- 2. Akurasi survey akhir dan penilaian aset
- 3. Kualitas dan efektivitas dari mekanisme penyampaian keluhan dan komplain dan penyelesaiaannya untuk warga terkena dampak dan pemangku kepentingan lainnya selama proses penyusunan RCCP
- 4. Dimasukkannya perspektif gender. Apakah data survey sudah dipilah berdasarkan gender dan apakah RCCP telah mempertimbangkan aspek gender dan kebutuhan kelompok rentan

Monitoring Kesesuaian Pelaksanaan RCCP

- Melakukan analisa data dan evaluasi terhadap:
 - Apakah survei dan penilaian aset dilakukan dengan akurat
 - Apakah proses pemberian kompensasi terhadap tanah, tanam tumbuh dan tegakan, pembatasan penggunaan tanah di bawah ROW di sepanjang jalur transmission line(tapak tower, gardu induk dan RoW diberikan dengan cukup dan mengikuti

mekanisme yang sesuai dengan yang tertuang dalam dokumen RCCP

- Apakah penyelesaian pengaduan dan keluhan yang diajukan oleh AP telah berjalan dengan baik dan memuaskan
- Apakah kondisi warga terkena dampak lebih baik atau lebih buruk setelah asetnya terkena dampak proyek dan pemberian ganti rugi serta pemulihan matapencaharian
- Melakukan identifikasi dan evaluasi khusus, apakah ada warga terkena dampak yang termasuk kelompok rentan dan kelompok terkena dampak serius yang lebih buruk taraf kehidupannya setelah adanya proyek
- Memberikan justifikasi kualitatif dan kuantitatif yang jelas terhadap kajian diatas
- Apakah pelaksanaan RCCP sudah melaksanakan dan mempertimbangkan isu gender sesuai kebijakan ADB
- Pengaruh pembangunan transmission line terhadap perubahan kehidupan ekonomi, pendapatan dan mata pencaharian hidup
- Restorasi dan atau perbaikan basis ekonomi dan sosial dari masyarakat sekitar yang terkena dampak
- 6. Merumuskan pelajaran yang didapat untuk diterapkan pada proyek berikutnya, dan
- 7. Memberikan rekomendasi untuk meningkatkan pelaksanaan pengadaan tanah dan pemukiman kembali di masa depan.

7 DATA ACUAN DAN PENUNJANG

- Dokumen Resettlement and Customary Communities Plan (RCCP)
- Data inventarisasi pemilik tanam tumbuh dan tegakan untuk jalur transmisi 150 KV Tayan – Sanggau-Sekadau

8 METODE KERJA

8.1 Pekerjaan Persiapan

Pekerjaan persiapan mencakup pembuatan program kerja yang mengacu pada RCCP. Penyedia Jasa harus menyampaikan program kerja yang menguraikan dengan rinci perihal : rencana kerja, waktu pelaksanaan tiaptiap pekerjaan, cara/prosedur pelaksanaan pekerjaan dan alat yang akan digunakan dan tenaga ahli yang ditugaskan. Program kerja ini harus disampaikan kepada Direksi Pekerjaan dalam bentuk Laporan Pendahuluan selambat- lambatnya 14 (empat belas) hari kalender setelah penandatanganan kontrak guna mendapatkan persetujuan Direksi Pekerjaan

8.2 Pengumpulan Data dan Informasi

Seluruh data sekunder guna penyusunan dokumen Penyusunan Dokumen Independent Monitoring Agency (IMA) T/L150 Kv Tayan-Sanggau-Sekadau ini dikumpulkan sendiri oleh Penyedia Jasa, termasuk data teknis SUTT yang akan dibangun, data pembebasan lahan, peta jalur SUTT dan data pendukung lainnya. Melakukan sampling survei formal dan informal dengan penduduk di daerah proyek yang terkena dan non-terkena dampak .

8.3 Evaluasi dan Analisa data

a. Melakukan evaluasi dan menganalisa data mengenai pembangunan T/L150 Kv Tayan-Sanggau-Sekadau termasuk rekomendasi hasil studi

- sebelumnya (Dokumen UKL UPL),
- b. Mengindentifikasi dengan melakukan sampling pada masyarakat yang terkena dampak, mengevaluasi kesepakatan ganti rugi, mengindentifikasi permasalahan sebelum dan sesudah pelaksanaan proyek, memberikan gambaran kondisi sosial ekonomi di jalur pembangunan SUTT.
- c. Menilai dampak mata pencaharian pada APs melalui sampling survei formal dan informal dengan penduduk di daerah proyek yang terkena dan non-terkena dampak.
- d. Menilai kepuasan jangka panjang dengan penilaian aset dan hak, waktu pembayaran, tersedianya dana dan pencairan . Menilai jangka panjang efisiensi, efektivitas, dan keberlanjutan program pengadaan tanah.
- 8.4 Penyusunan Dokumen Independent Monitoring Agency (IMA) T/L150 Kv Tayan – Sanggau -Sekadau

Berdasarkan data-data tersebut diatas Penyedia Jasa melakukan penyusunan dokumen Dokumen Independent Monitoring Agency (IMA) T/L150 Kv Tayan – Sanggau-Sekadau yang meliputi :

- 1. Laporan Kemajuan Pekerjaan.
- 2. Laporan Draft Akhir, meliputi:
 - a. Analisa data
 - b. Laporan Hasil sampling survei atau inventaris terkena dampak dari aset;
 - c. Mengevaluasi penilaian aset terkena berdasarkan penggantian biaya dan ganti rugi yang dibayarkan sebelum pekerjaan sipil.
 - d. Menyusun semua masukan atau keluhan dari APs.
- 3. Laporan Draft Akhir, meliputi:
 - a. Hasil akhir dari studi Independent Monitoring Agency (IMA)
 - b. Menyusun semua masukan atau keluhan dari APs.
 - c. Memberikan kesimpulan rekomendasi

9 KUALIFIKASI LEMBAGA DAN TENAGA AHLI

PLN UIP X akan merekrut sebuah lembaga dari LSM, lembaga pendidikan atau perusahaan konsultan yang memiliki pengalaman sebelumnya dalam melakukan kegiatan pemantauan pemukiman eksternal atau evaluasi untuk proyek-proyek pembangunan. Lembaga atau Konsultan yang paham dengan Kebijakan ADB tentang Involuntary Resettlement (1995) dan ADB SPS 2009 akan mendapat penilaian lebih.

Tenaga ahli yang ditugaskan dalam melaksanakan studi Independent Monitoring Agency (IMA) harus memehuhi kualifikasi minimal sebagai berikut :

- Ketua Tim (Ahli Sosial dan Resettlement):
 Pendidikan minimal Sarjana S-1 Ilmu Sosial/Ekonomi/ MIPA, mempunyai pengalaman minimal 10 tahun .
- 2. Ahli Lingkungan :
 Pendidikan minimal Sarjana S-1 Lingkungan/Teknik Penyehatan. Pengalaman kerja minimal 3 tahun.
- 3. Surveyor:

Pendidikan minimal Sarjana D-3 Sosial/ekonomi/Teknik. Pengalaman kerja minimal 3 tahun.

4. Asisten Pengolah Data:

Pendidikan minimal Sarjana D-3 Sosial/ekonomi/Teknik. Pengalaman kerja minimal 3 tahun

Penyedia Jasa harus menyediakan tenaga ahli yang menguasai tentang studi monitoring dan evaluasi dan mampu melakukan identifikasi dampak-dampak teknis yang akan terjadi dari pembangunan SUTT nya sehingga menjadi suatu bahan kajian bagi Tenaga Ahli lainnya sesuai bidangnya.

10 PELAPORAN

Laporan yang harus disampaikan kepada pemberi kerja dalam bentuk dan berisi keluaran yang diharapkan sebagai berikut:

1. Laporan Bulanan

Penyedia Jasa wajib membuat laporan kegiatan bulanan yang berisi hal-hal sebagai berikut :

- a. Uraian singkat kegiatan pada bulan yang dilaporkan, yang meliputi kegiatan di lapangan dan di kantor Penyedia Jasa.
- b. Kemajuan pekerjaan pada bulan yang dilaporkan berupa uraian presentase setiap item pekerjaan.
- c. Kurva-S yang menunjukkan target/rencana progress yang akan dicapai dan realisasi progress yang diperoleh.
- d. Daftar pemakaian Man Month tenaga ahli dilengkapi absensi kehadiran yang ditandatangani oleh Direktur Perusahaan Penyedia Jasa.
- e. Copy Surat Penugasan tenaga ahli ke lapangan yang ditandatangani oleh Direktur Perusahaan Penyedia Jasa.
- f. Copy hasil kuesioner.
- g. Photo kegiatan dilapangan yang meliputi : photo sekitar lokasi proyek dan kegiatan saat pengambilan kuesioner pada masyarakat,

Laporan Bulanan dibuat dalam 5 set dan dikirim kepada Direksi Pekerjaan pada awal bulan berikutnya.

2. Draft Laporan IMA

Draft dibuat dalam Bahasa Indonesia dengan jumlah 5 set Laporan Draft Akhir, meliputi:

- a. Analisa data
- b. Laporan Hasil sampling survey kuesinoner atau inventaris terkena dampak dari aset;
- c. Mengevaluasi penilaian aset terkena berdasarkan penggantian biaya dan ganti rugi yang dibayarkan sebelum pekerjaan sipil.
- d. Menyusun semua masukan atau keluhan dari APs 1 minggu sebelum pelaksanaan pembahasan dokumen akhir.

3. Laporan Akhir

Laporan akhir dibuat dalam Bahasa Indonesia sebanyak 5 set dan Bahasa Inggris sebanyak 5 set.

4. Dokumen Softcopy Laporan

Penyedia Jasa harus menyerahkan 2 (dua) dokumen softcopy laporan dalam bentuk flashdisk.

11. PEMBIAYAAN DAN PEMBAYARAN

Pekerjaan Penyusunan Dokumen Independent Monitoring Agency (IMA) T/L150 Kv Tayan-Sanggau-Sekadau ini dibiayai dengan sumber dana APLN Penyedia Jasa dapat mengajukan permohonan pembayaran sesuai kemajuan pekerjaan yang diperoleh dengan dilengkapi data pendukung yang diperlukan.

12 JANGKA WAKTU PELAKSANAAN
